

temperature are reported, as well as their specific gravities relative to water at 37 C.

Baric gravities, computed from a comparison of the densities of solutions and cerebrospinal fluid at body temperature, will clearly represent the state of the baricities of the solutions.

We express our appreciation to Abbott Laboratories and Ciba Pharmaceutical Products, Inc., for their products and to Dr. H. V. Petzold for collecting the cerebrospinal fluid.

CONNECTICUT STATE SOCIETY OF ANESTHESIOLOGISTS

The annual meeting of the Connecticut State Society of Anesthesiologists will be held in conjunction with the annual meeting of the Connecticut State Medical Society in Hartford, Connecticut, on the afternoon of Thursday, May 1, 1952.

Dr. Stanley J. Sarnoff, Harvard University, will speak on, "The Physiology of Electrophrenic Respiration."

Dr. Raymond F. Courtin, Mayo Clinic, will speak on, "Electroencephalography in Clinical Anesthesia."
