<b>The Pharmacological Basis of Therapeutics 6th</b>	Alfred Goodman Gilman Louis S. Goodman Alfred Gilman (Editors)	New York, New York Macmillan Publishing Co., 1980	1,843	\$45.00
<i>The primary objectives of this book are the correlation of pharmacology with related medical sciences; the reinterpretation of the actions and the uses of drugs from the viewpoint of important advances in medicine; the placing of emphasis on the applications of pharmacodynamics to therapeutics.</i>				
<b>Chemical Diagnosis of Disease</b>	Stanley S. Brown Frederick L. Mitchell Donald S. Young (Editors)	Amsterdam, the Netherlands Elsevier/North-Holland Biomedical Press 1980	1,374	\$74.75
<i>This book has been written to meet the demand for authoritative and integrated information on the topic. It should prove valuable as a reference source for physicians, surgeons and laboratory scientists, and as a textbook for both postgraduates and undergraduate students of medicine and biochemistry.</i>				
<b>Diagnostic Techniques in Pulmonary Disease—Part One</b>	Marvin A. Sackner. (Editor)	New York, New York Marcel Dekker, Inc. 1980	560	\$49.50
<i>This book is a reference on the diagnosis, classification, management, and prognosis of lung disease. The techniques presented in this book range from the needs of general internists dealing with lung disease to the very sophisticated techniques that have only recently become available to clinical pulmonary specialists.</i>				
<b>Obstetric Anaesthesia and Analgesia</b>	Donald D. Moir	New York, New York Macmillan Publishing, Co., Inc. 1980	326	\$43.95
<i>This book is written for the practicing anesthetist, and particularly for the anesthetist in training, who is in the process of acquiring experience in obstetric anesthesia and analgesia after a period of general anesthetic work. The book provides a succinct yet comprehensive account of the role of anesthesia and analgesia in modern obstetrics.</i>				
<b>1980 Yearbook of Anesthesia</b>	James E. Eckenhoff, M.D., D.Sc. (Editor)	Chicago, Illinois Yearbook Medical Publishers, Inc. 1980	363	\$27.50
<i>The Yearbook series provides the essence of the best of the recent international medical literature in condensed form. The material is selected by distinguished editors who critically review more than 500,000 journal articles each year.</i>				
<b>Body Temperature Control— in Anaesthesia, Surgery and Intensive Care</b>	Anita Holdcroft	London WC1R 4SG Bailliere Tindall Division of Cassell Ltd. 1980	179	\$29.95
<i>This book provides a rational basis for monitoring and controlling skin and deep body temperature and brings together the previously scattered information on body temperature changes, induced and spontaneous, that occur during anesthesia, surgery, and intensive care.</i>				
<b>Microcirculation Volume 3</b>	Gabor Kaley Burton M. Altura (Editors)	Baltimore, Maryland University Park Press 1980	531	\$65.00
<i>This book examines the effects of physical factors on pathophysiology, host defense and circulatory shock and inflammation, hypertension and vascular disease, in vivo methods, quantitative studies in single vessels, in vitro methods, electronmicroscopic techniques, and future trends in microcirculation research. It critically evaluates work done in the past, describes the present state of the art, and points out future directions that seem profitable and challenging.</i>
