Administration (FDA), further revised the label and package insert for Diprivan®, as summarized below, further emphasize the importance of adherence to strict aseptic techniques:
Prepare just prior to each procedure
Withdraw contents immediately after opening
Administer promptly
Complete administration in 6 h
The 6-h time limit for use after opening an ampule or vial was established in close consultation with the FDA. This time limit was selected to reinforce the importance of using safe handling procedures in the preparation and administration of Diprivan®.
