

## ERRATUM

An exchange of correspondence by Aldrete and Orkin published in the December 1998 issue of ANESTHESIOLOGY contained an error. The table provided with Dr. Aldrete's letter was inadvertently omitted from the correspondence. The table appears below. Also, the correct spelling for Dr. Orkin's name is Fredrick K. Orkin, M.D., M.B.A.

**Table 1. Anesthesia Personnel in Rural Counties of Northwest Florida**

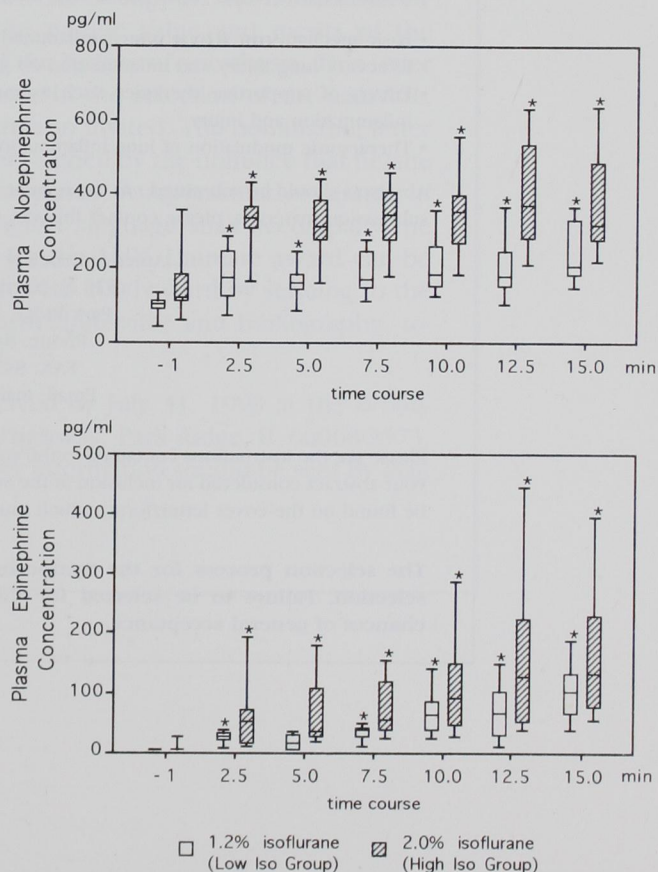

| County     | Estimated Population* | Hospital and No.† of Beds | Anesthesiologists | CRNAs |
|------------|-----------------------|---------------------------|-------------------|-------|
| Walton     | 31,000                | 1 (30)                    | 2                 | 1     |
| Washington | 21,000                | 1 (30)                    | 0                 | 1     |
| Holmes     | 17,000                | 1 (20)                    | 0                 | 1     |
| Franklin   | 10,500                | 1 (28)                    | 0                 | 1     |
| Jackson    | 49,500                | 1 (40)                    | 0                 | 4     |
| Gulf       | 11,500                | 1 (20)                    | 1                 | 0     |
| Calhoun    | 12,000                | 1 (30)                    | 0                 | 0     |

\* Obtained from either the local court house or the chamber of commerce.

† Number of acute care beds.

## AUTHOR CORRECTION

For the article by Segawa *et al.* in the December 1998 issue of ANESTHESIOLOGY (1998; 89(6):1407-13), the authors would like to make the following correction: figures 1 and 2 were duplicates. The correct figure 1 appears here (right).

**Fig. 1.** Plasma norepinephrine (*upper*) and epinephrine (*lower*) concentrations during isoflurane anesthesia. Box-and-whisker plots represent the 10th, 25th, 50th (median), 75th, and 90th percentile of catecholamine concentrations at each sampling point. \* Significant difference *versus* the values at -1 min ( $P < 0.05$ ).
