

A-259 Room 302, 10/18/2000 9:00 AM - 10:30 AM (PD)
Myocardial Ischemia Following Coronary Artery Bypass Grafting (CABG): Does the Inotrope Matter? *Mark L. Blas, MD; Monica Botero, MD; Gregory M. Janelle, MD; Phillip Hess, MD; Emilio B. Lobato, MD, Anesthesiology, University of Florida & VAMC, Gainesville, FL, United States.* In patients undergoing CABG, the use of milrinone following CPB, seems to be associated with less episodes of ischemia.

A-260 Room 302, 10/18/2000 9:00 AM - 10:30 AM (PD)
Incidence of Perioperative Myocardial Injury Based on ACC/AHA Guidelines in Vascular Surgery Patients *Sbamsuddin Akhtar, M.D.; Lee A. Fleisher, M.D.; Roland Jermyn, B.A.; J. Weiss, M.D.; Stanley H. Rosenbaum, M.D., Department of Anesthesiology, Yale University School of Medicine, New Haven, CT, United States.* Risk stratification based on guidelines may not have additive value in vascular surgery patients.
