

- Cardiac-specific overexpression of caveolin-3 induces endogenous cardiac protection by mimicking ischemic preconditioning. *Circulation* 2008; 118:1979-88
6. Koneru S, Penumathsa SV, Thirunavukkarasu M, Samuel SM, Zhan L, Han Z, Das DK, Maulik N: Redox regulation of ischemic preconditioning is mediated by the differential activation of caveolins and their association with eNOS and GLUT-4. *Am J Physiol Heart Circ Physiol* 2007; 292: H2060-72
 7. Penumathsa SV, Thirunavukkarasu M, Samuel SM, Zhan L, Maulik G, Bagchi M, Bagchi D, Maulik N: Niacin bound chromium treatment induces myocardial Glut-4 translocation and caveolar interaction *via* Akt, AMPK and eNOS phosphorylation in streptozotocin induced diabetic rats after ischemia-reperfusion injury. *Biochim Biophys Acta* 2009; 1792:39-48
 8. Gratton JP, Fontana J, O'Connor DS, Garcia-Cardena G, McCabe TJ, Sessa WC: Reconstitution of an endothelial nitric-oxide synthase (eNOS), hsp90, and caveolin-1 complex *in vitro*. Evidence that hsp90 facilitates calmodulin stimulated displacement of eNOS from caveolin-1. *J Biol Chem* 2000; 275:22268-72
 9. Amour J, Brzezinska AK, Jager Z, Sullivan C, Weihrauch D, Du J, Vladoic N, Shi Y, Warltier DC, Pratt PF, Kersten JR: Hyperglycemia adversely modulates endothelial nitric oxide synthase during anesthetic preconditioning through tetrahydrobiopterin- and heat shock protein 90-mediated mechanisms. *ANESTHESIOLOGY* 2010; 112:576-85
 10. Parpal S, Karlsson M, Thorn H, Stralfors P: Cholesterol depletion disrupts caveolae and insulin receptor signaling for metabolic control *via* insulin receptor substrate-1, but not for mitogen-activated protein kinase control. *J Biol Chem* 2001; 276:9670-8
 11. Somanath S, Barg S, Marshall C, Silwood CJ, Turner MD: High extracellular glucose inhibits exocytosis through disruption of syntaxin 1A-containing lipid rafts. *Biochem Biophys Res Commun* 2009; 389:241-6

ANESTHESIOLOGY REFLECTIONS

Rolland Whitacre's Wandering Testament

Less than 6 yr after serving as president of the American Society of Anesthesiologists (ASA) and 5 yr after co-inventing his namesake spinal needle, Dr. Rolland Whitacre (*above right*) suffered a fatal heart attack in 1956. He received the ASA's Distinguished Service Award later that year. More than half a century later, a New Testament (*above left*) bearing the inscription "Rolland John Whitacre" appeared in an online auction. Deemed outside the Wood Library-Museum's collecting parameters, the book was purchased with personal funds and mailed as a gift in 2008 from the WLM curator to Whitacre's family. When the wandering book returned to the WLM curator as a "lost shipment" in early 2010, he shipped it, finally successfully, by registered mail to Whitacre's daughter.
