

.....

Subject Index

- Adolescence, Prader-Willi syndrome
 features 4–6
- Adrenal axis, Prader-Willi syndrome 17
- Angelman syndrome, genetic imprinting
 9, 10
- Appetite
 childhood 3
 growth hormone therapy effects 52–54
 oxytocin role 10
- Behavior profile
 adolescents 5
 children 3, 4
- Body composition, *see also* Obesity
 assessment 32, 35, 37, 81
 growth hormone therapy effects 21, 29,
 30, 32–38, 81–83
 Prader-Willi syndrome features 81
- Bone age, Prader-Willi syndrome develop-
 ment 6
- Chromosome 15q, deletions 9
- Clomiphene, Prader-Willi syndrome
 management 14, 15
- Cryptorchidism
 management 3
 prevalence 6,7
- Developmental milestones, Prader-Willi
 syndrome 3
- Diabetes type 2
 incidence 18
 management 18
 monitoring 94, 95
- Diagnostic criteria, Prader-Willi syndrome
 major criteria 92
 minor criteria 92
 supportive criteria 93
- Discovery, Prader-Willi syndrome 1, 2
- Dual-energy X-ray absorptiometry, body
 composition assessment 32, 35, 37,
 81
- Energy balance, Prader-Willi syndrome
 19, 53, 54, 84, 85
- Follicle-stimulating hormone, Prader-Willi
 syndrome levels 14–16
- Genetic imprinting, Prader-Willi syndrome
 role 9, 10
- Glucose tolerance
 diabetes, *see* Diabetes type 2
 Prader-Willi syndrome 12, 44
- Gonadotropin, releasing hormone response
 in Prader-Willi syndrome 14
- Growth hormone
 arginine response 12, 13
 binding protein in Prader-Willi
 syndrome 41

- deficiency diagnostics in Prader-Willi syndrome 78, 79, 87, 88
- L*-dopa response 12, 13
- leptin relationship 86, 87
- obesity effects 13, 76
- secretion after oral glucose tolerance test 12
- treatment of Prader-Willi syndrome
 - body weight and composition effects 21, 29, 30, 32–38, 81–83
 - catch-up growth 79, 80
 - consensus recommendations 95
 - dosing 24, 31
 - efficacy criteria 88
 - gonadal effects 16
 - growth velocity and height gain 25, 29, 31, 32, 79, 80, 89, 94
 - historical perspective 20–22
 - indications 91
 - infants 84, 91
 - insulin sensitivity effects 44, 45, 48, 86, 91
 - insulin-like growth factor I response 39, 40
 - lipid metabolism effects 49, 50
 - nutritional management 51–54, 89–91
 - photographic documentation 59–69, 71
 - physical activity and performance effects 55, 56, 83, 84
 - rationale 76, 77
 - risks 95
 - study design 23, 24
 - Swiss vs. international outcomes 77, 78
- Growth hormone-releasing hormone, Prader-Willi syndrome abnormalities 10
- Height, Prader-Willi syndrome growth pattern 6, 79, 94
- Human chorionic gonadotropin, Prader-Willi syndrome management 16
- Hyperlipidemia, Prader-Willi syndrome 19
- Hypogonadism
 - hypothalamic defects 14
 - incidence 7, 8
- Hypothalamus
 - adrenal axis 17
 - gonadal axis 14–16
 - growth hormone axis 12–14
 - morphological changes in Prader-Willi syndrome 10, 11
 - thyroid axis 16
- Insulin
 - growth hormone therapy effects on sensitivity 44, 45, 48, 86, 91
 - Prader-Willi syndrome levels 43, 44, 85, 86, 90
- Insulin-like growth factor I
 - binding protein levels 39, 40, 79, 94
 - growth hormone therapy effects 39
 - Prader-Willi syndrome levels 13, 14, 20, 38, 39, 94
- Labhart, A., Prader-Willi syndrome discovery 1, 2
- Leptin
 - functions 86
 - growth hormone relationship 86, 87
 - obesity role 42, 43
 - Prader-Willi syndrome levels 42, 43, 90
 - regulation of expression 86
- Life expectancy, Prader-Willi syndrome 6
- Lipid profile, growth hormone therapy effects 49, 50
- Luteinizing hormone-releasing hormone, response in Prader-Willi syndrome 14, 15
- Menstruation, Prader-Willi syndrome 8
- Mental retardation, degree in Prader-Willi syndrome 4
- Nutritional management, Prader-Willi syndrome 51–54, 89–91

- Obesity, *see also* Leptin
 genetic disposition 84, 85
 growth hormone therapy effects 29, 30, 32–38, 81–83
 management 5, 22, 23, 85, 89
 morbidity and mortality 19
 Oxytocin, appetite role 10
- Photographic documentation, Prader-Willi syndrome
 developmental features 57, 70, 72–75
 growth hormone therapy effects 59–69, 71
 hypotonia 57, 58
 twins 57
- Physical activity, growth hormone therapy effects 55, 56, 83, 84
- Prader, A., Prader-Willi syndrome discovery 1, 2
- Precocious puberty, Prader-Willi syndrome 7, 9
- Satiety, *see* Appetite
- Selective serotonin reuptake inhibitors, adolescent treatment 5
- Thyroid hormone, Prader-Willi syndrome levels 16
- Weight
 growth hormone therapy effects 21, 29, 30, 32–38, 81–83
 Prader-Willi syndrome development 6, 81
- Willi, H., Prader-Willi syndrome discovery 1, 2
