

Subject Index

- ABCA12* 39
ABCA12 72, 73, 75
ABHD5 38, 40–42
Acquired ichthyosis, definition 138
ALD3A2 44, 45
ALOX12B 36, 37, 39
ALOXE3 36, 37, 39
AP1S1 77, 78
Arthrogryposis, renal dysfunction, and
 cholestasis syndrome
 clinical features 77
 ultrastructure 78
Atopic dermatitis
 ichthyosis vulgaris association 37, 113
 Netherton syndrome association 93
ATP2A 12
ATP2C1 12
Autosomal recessive congenital ichthyosis,
 see also Harlequin ichthyosis
 classification 5, 7
 clinical features 30, 33, 35, 36, 105, 106, 109
 gene mutations 30, 32, 33, 36, 37, 107
 pathogenesis 37–39, 107
 ultrastructure 39, 40, 108–110

Calcium, ultrastructural localization 136, 137
CEDNIK syndrome
 clinical features 76, 77
 ultrastructure 78
CGI58, *see ABHD5*
Chanarin-Dorfman syndrome
 biochemical genetics 40
 diagnosis 40
 pathogenesis 41–43
 ultrastructure 43
Cholesterol sulfatase, cholesterol sulfate cycle
 and regulatory significance 59–61

Classification, disorders of cornification 4–12
Colloidon membrane, definition 138
Congenital hemidysplasia with ichthyosiform
 erythroderma and limb defects syndrome
 biochemical genetics 53
 classification 12
 clinical features 52, 53
 pathogenesis 53, 54
 ultrastructure 55–57
Congenital ichthyosiform erythroderma
 clinical features 7
 definition 138
Conradi-Hünemann-Happle syndrome
 biochemical genetics 53
 clinical features 52
 pathogenesis 53, 54
 ultrastructure 54, 55
CTSC 11
CYP4F22 38

Disorder of cornification
 classification 4–12
 definition 138
 historical pathogenic concepts 15, 16
 systemic consequences of barrier
 abnormalities 22–24

EBP 12
Electron microscopy, *see* Ultrastructure
Epidermolytic ichthyosis
 biochemical genetics 100, 101
 classification 7, 9, 10
 clinical features 98–100
 pathogenesis 101–104
 ultrastructure 104, 105
Erythrokeratoderma variabilis, clinical
 features 11

- FATP4* 69
FLG 114, 116–120
 Functional classification, ichthyosis 3, 16–18
- Gaucher disease
 biochemical genetics 65–67
 clinical features 64, 65
 pathogenesis 67
 ultrastructure 67, 68
- GJB3* 11
GJB4 11
 β -Glucocerebrosidase 65–67
- Harlequin ichthyosis
 biochemical genetics 72, 73
 clinical diagnosis 70, 71
 pathogenesis 73, 75
 ultrastructure 75, 76
- Hyperkeratosis, definition 138
 Hystrix, definition 138
- Ichthyosis en confettis
 clinical features 122
 pathogenesis 122–124
 ultrastructure 122–126
- Ichthyosis prematurity syndrome
 clinical features 68, 69
 molecular genetics 69
 pathogenesis 69, 70
 ultrastructure 70
- Ichthyosis vulgaris
 barrier abnormality 119
 biochemical genetics 114, 116
 clinical characteristics 113, 114
 pathogenesis 116–120
 ultrastructure 120–122
- Inflammation, ichthyosis 19, 20
- K1* 99–101
K2 100
K10 99–101
- Keratopathic ichthyosis
 classification 7, 9, 10
 epidermolytic ichthyosis 98–100
- Keratitis/ichthyosis/deafness syndrome 10, 11
 Keratoderma, definition 138
- Lamellar ichthyosis
 clinical features 7
 definition 138
- Lanthanum, tracer perfusion 135, 136
 LEKTI-1, *see SPINK5*
 Light microscopy, diagnostic limitations 1, 2
 Loricrin keratoderma
 biochemical genetics 111
 clinical characteristics 110
 pathogenesis 111, 112
- MEDNIK syndrome
 clinical features 77
 ultrastructure 78
- Molecular diagnostics, resources by country 140–142
- Netherton syndrome
 atopic dermatitis association 93
 biochemical genetics 90
 classification 11
 clinical features 89, 90
 pathogenesis 90–92
 ultrastructure 92, 93
- Nonsyndromic ichthyosis
 classification 8, 9
 definition 139
- NSDL1* 12, 54
- Oil Red O, staining for neutral lipids 137
- PAHX* 51
- Pathogenesis
 autosomal recessive congenital ichthyosis 37–39, 107, 109
 Chanarin-Dorfman syndrome 41–43
 CHILD syndrome 53, 54
 Conradi-Hünemann-Happle syndrome 53, 54
 desquamation 20–22
 epidermolytic ichthyosis 101–104
 function-driven pathogenesis 16–18
 Gaucher disease 67
 Harlequin ichthyosis 73, 75
 historical pathogenic concepts 15, 16
 ichthyosis en confettis 122–126
 ichthyosis prematurity syndrome 69, 70
 ichthyosis vulgaris 116–120
 inflammation 19, 20
 Loricrin keratoderma 111, 112
 Netherton syndrome 90–92
 permeability barrier dysfunction 18, 19
 recessive X-linked ichthyosis 61–64
 Refsum disease 51

- Pathogenesis (continued)
 - Sjögren-Larsson syndrome 45, 49
 - systemic consequences of barrier abnormalities 22–24
- Peeling skin syndrome
 - clinical features 94, 95
 - genetics 95
 - ultrastructure 95
- PEX7* 51
- PNPLA2* 40
- Recessive X-linked ichthyosis
 - biochemical genetics 58, 59
 - cholesterol sulfate cycle and regulatory significance 59–61
 - clinical features 57, 58
 - desquamation mechanisms 63, 64
 - pathogenesis 61–64
 - permeability barrier abnormality 62, 63
 - ultrastructure 64
- Refsum disease
 - biochemical genetics 49
 - clinical diagnosis 47, 49
 - pathogenesis 51
 - ultrastructure 50–52
- Scaling, definition 139
- Sjögren-Larsson syndrome
 - biochemical genetics 44, 45
 - clinical features 43, 44
 - pathogenesis 45, 49
 - ultrastructure 45–48
- SLC24A4* 69
- SLURP1* 11
- SNAP29* 77
- SPINK5* 11, 21, 22, 90, 91, 93, 95
- SSase 58–60
- Stratum corneum
 - desquamation 20–22
 - inflammation 19, 20
 - permeability barrier dysfunction 18, 19
 - structure and function 2, 3, 12–15
- Syndromic ichthyosis
 - classification 5, 6
 - definition 139
- TGM1* 7, 14, 21, 32, 36, 37, 61, 94, 105–112
- TGM3* 94
- Transepidermal water loss 21–23
- Ultrastructure
 - arthrogryposis, renal dysfunction, and cholestasis syndrome 78
 - autosomal recessive congenital ichthyosis 39, 40, 108–110
 - calcium localization 136, 137
 - CEDNIK syndrome 78
 - Chanarin-Dorfman syndrome 43
 - CHILD syndrome 55–57
 - Conradi-Hünemann-Happle syndrome 54, 55
 - differential diagnosis of ichthyosis 24–26
 - epidermolytic ichthyosis 104, 105
 - Gaucher disease 67, 68
 - Harlequin ichthyosis 75, 76
 - ichthyosis en confettis 122–126
 - ichthyosis prematurity syndrome 70
 - ichthyosis vulgaris 120–122
 - lanthanum tracer perfusion 135, 136
 - lipase cytochemistry 136
 - MEDNIK syndrome 78
 - Netherton syndrome 92, 93
 - peeling skin syndrome 95
 - pyridine treatment 135
 - recessive X-linked ichthyosis 64
 - Refsum disease 50–52
 - Sjögren-Larsson syndrome 45–48
 - tissue preparation
 - dehydration 134
 - embedding 135
 - fixation 133, 134
- VPS33B* 77, 78
