

# The Congenital Methemoglobinemias

Physiology and Pathophysiology of the Hemoglobin Metabolism

By OTMAR TÖNZ

University Children's Hospital of Berne

With 28 figures and 6 tables

---

BASEL (Switzerland)

S. KARGER

NEW YORK

Published simultaneously as  
**Bibliotheca Haematologica, No. 28**

Redactor: A. HÄSSIG, Berne

At a reduced price for subscribers to "Acta Haematologica" and "Vox Sanguinis"

S. Karger AG, Arnold-Böcklin-Strasse 25, 4000 Basel (Switzerland)

## Contents

Acknowledgements . . . . .	V
Introduction . . . . .	1
<i>I. The Pathological Significance of Methemoglobin</i> . . . . .	2
<i>II. Energy Metabolism of the Erythrocytes</i> . . . . .	5
1. Embden-Meyerhof Pathway . . . . .	7
2. Pentose-Phosphate Shunt . . . . .	7
3. Energy Gain . . . . .	8
4. Influence of Redox Substances on the Pentose Shunt . . . . .	9
5. Reduction of Glutathione . . . . .	15
<i>III. Iron Binding in Hemoglobin.</i> . . . . .	18
<i>IV. Formation and Reduction of Methemoglobin</i> . . . . .	24
1. Formation of Methemoglobin . . . . .	24
2. Methemoglobin Reduction . . . . .	26
<i>V. Methemoglobin and Aging of the Erythrocytes</i> . . . . .	32
1. Hemoglobin . . . . .	33
2. Glycolysis . . . . .	36
<i>VI. Methemoglobin Formation in Infantile Erythrocytes</i> . . . . .	40
<i>VII. Hemoglobin-M-Disease</i> . . . . .	45
1. Physico-chemical Properties of Hb M . . . . .	47
(a) Spectroscopy . . . . .	47
(b) Functional Behaviour . . . . .	49
(c) Electrophoretic Properties . . . . .	50
2. Group Classification . . . . .	51
3. Structure . . . . .	53
4. Genetic and Clinical Problems . . . . .	56
(a) Genetics . . . . .	56
(b) Clinical Patterns . . . . .	58
(c) Differential Diagnosis . . . . .	59
5. Diagnosis . . . . .	60
6. Therapy . . . . .	60
7. Hemoglobin M Related Blood Pigment . . . . .	61

<i>VIII. Congenital Enzymopenic Methemoglobinemia</i> . . . . .	63
1. Genetics . . . . .	64
2. Pathogenesis . . . . .	65
(a) NADH Diaphorase Defect . . . . .	65
(b) Methemoglobinemias without NADH- Diaphorase Defect . . . . .	66
(c) Methemoglobinemias Due to Extracorporeal Metabolic Disorders . . . . .	68
3. Clinic of Methemoglobinemia . . . . .	69
4. Diagnosis and Differential Diagnosis . . . . .	71
5. Therapy . . . . .	72
<i>IX. Methods</i> . . . . .	75
1. Determination of Methemoglobin . . . . .	75
2. Morphological Demonstration of Methemoglobin . . . . .	76
3. Reduction of Methemoglobin: Use of Intact Cells . . . . .	79
4. Methemoglobin Reduction: Induction by Methylene Blue . . . . .	81
5. Methemoglobin Reduction: Examinations on the Hemolysate . . . . .	84
6. Measurement of the Diaphorase Activity by the Optical Test . . . . .	85
7. Demonstration of NADH Diaphorase by Means of Agar Gel Electrophoresis . . . . .	91
8. Spectrographic and Functional Studies of Hemoglobin M . . . . .	93
<i>X. Results</i> . . . . .	100
A. Hemoglobin M . . . . .	100
1. Spectrophotometric Data . . . . .	102
2. Estimation of the Proportion of Hemoglobin M . . . . .	107
3. Electrophoresis . . . . .	108
4. Formation of the Cyanide Complex. . . . .	109
5. Rate of Reduction . . . . .	110
6. Rate of Oxidation . . . . .	111
7. Globin Structure. . . . .	111
Discussion . . . . .	112
B. Enzymopenic Methemoglobinemias . . . . .	114
1. Clinical Observations . . . . .	116
2. Measures of Methemoglobin Reduction . . . . .	117
3. Determination of the Diaphorase Activity . . . . .	119
4. Morphological Demonstration of Diaphorase Activity . . . . .	121
5. Electrophoretic Demonstration of Diaphorase . . . . .	126
Discussion . . . . .	127
<i>XI. Conclusion</i> . . . . .	131
<i>References</i> . . . . .	132

## Acknowledgements

I am deeply indebted to Prof. E. Rossi, director of the University Children's Hospital, Berne, for continuous support and encouragement during the time of this work. To Prof. BETKE, director of the University Children's Hospital, Munich, I wish to extend my sincerest appreciation. Under his supervision I first got acquainted with the techniques and methodology of work with red cells and methemoglobin. To Dr. U. WIESMANN I am very grateful for valuable discussions and help with biochemical problems.

Furthermore I wish to express my gratitude to Miss E. ERNST for skillful technical assistance; to Mrs. DE WECK for translation and to Dr. HUMPHREY GYDE (Lewisham Hospital, London) for correcting the proofs. I am obliged to Mr. M. STILLHARD of the KARGER Company for careful edition of this monograph.

Last, but by no means least, I wish to thank my wife. Her encouragement, help and support made this work possible.

Lucerne, January 1968

O. TÖNZ

Supported by the 'Schweizerischer Nationalfonds zur Förderung der wissenschaftlichen Forschung'. Grant number 3780.
