Editor's Foreword

As Volume VIII of this series appears, it is still difficult to discern any clear-cut trend in the progress of cancer research, except perhaps to note that interest in the role and mode of action of viruses maintains itself. There is also a persisting concern with questions of interactions between hosts and tumors.

This volume, as its predecessors, continues to offer reviews of recent progress together with new observations through the device of the micromonograph, which combines historical perspective with original contributions.

The excellent reception given the recently adopted biannual publication schedule justifies the increased work load imposed upon editor, publisher, and our faithful editorial assistant, Mrs. MARY MILLER, whose efforts are gratefully acknowledged.

Editor F. HOMBURGER, M.D.

INDEX

The Internal Milieu of Tumors

PIETRO M. GULLINO

| | |
|--|----|
| A. Introduction | 1 |
| B. The Vascular Compartment | 2 |
| 1. The vascular space | 2 |
| 2. The blood flow | 6 |
| 3. Regulation of the blood flow | 9 |
| C. The Interstitial Compartment | 11 |
| 1. The interstitial space | 11 |
| 2. The stroma | 13 |
| 3. The interstitial fluid | 16 |
| D. The Acid-Base Status of the Internal Milieu and its Modification <i>in Vivo</i> | 20 |
| E. Concluding Remarks | 23 |
| F. References | 24 |

Local Cell Interactions in Neoplasms and in the Foci of Carcinogenesis

JURI M. VASILIEV and VITA I. GUELSTEIN

| | |
|---|----|
| I. Local Interactions of Tumor Cells | 27 |
| A. 'Conditioning' of the microenvironment by tumor cells | 27 |
| B. Interactions of neoplastic cells in the complexes | 30 |
| C. Competition of tumor cells for nutrients | 35 |
| II. Local Interactions of Tumor and Normal Cells | 35 |
| A. Replacement of normal tissue by the tumor | 36 |
| B. Processes of stroma formation | 40 |
| III. Local Cell Interactions in the Foci of Chemically Induced Tumors | 43 |
| A. The role of cell damage during the early stages of chemical carcinogenesis | 44 |
| B. The evolution of the cell capacity for invasive growth during the course of carcinogenesis | 51 |
| IV. Conclusion | 57 |
| V. References | 60 |

Pathogenesis of Spontaneously-Occurring and Induced Melanotic Granuloma in *Drosophila Melanogaster*

ANTONIO ROTTINO and M. J. KOPAC

| | |
|--|----|
| Introduction | 67 |
| Method of Study | 70 |
| Observations | 70 |
| Non-tumor strains | 70 |
| Strains with spontaneous, hereditary melanotic tumor | 71 |
| Experiments with strain 51-52 | 75 |
| Injection of cell-free extracts | 75 |
| TIC prepared from serum of normal donors | 75 |
| TIC prepared from serum of pregnant women | 75 |
| TIC prepared from a variety of tumors | 75 |
| TIC extracted from fish | 76 |
| Observation of a possible transformation | 77 |

| | |
|---|----|
| Lesions caused by injection of organic and inorganic substances | 77 |
| Alumina | 77 |
| Tris buffer | 77 |
| Methionine | 78 |
| Lysine | 78 |
| Cholesterol | 78 |
| Radio-opaque material | 78 |
| Carbon tetrachloride | 78 |
| Experiments with Canton-S-strain | 79 |
| Lesions simulating melanotic tumor | 79 |
| Discussion | 81 |
| Summary and Conclusions | 87 |
| References | 89 |

Interpretation of Structural Detail in Viruses of the Polyoma Group

JUNE D. ALMEIDA, A. P. WATERSON and E. W. L. FLETCHER

| | |
|--|-----|
| Introduction | 95 |
| The Appearance of Oncogenic Viruses with Negative Staining | 96 |
| Image Formation in the Electron Microscope | 99 |
| Methods of Preparing Virus Specimens for Electron Microscopy | 100 |
| Particular Considerations Relevant to the Polyoma Group | 102 |
| Virus Models | 113 |
| Methods for Determining Capsomere Number | 116 |
| Discussion | 120 |
| References | 123 |

Transformation *in vitro* of Mammalian Cells by Polyoma and Simian 40 Viruses

VITTORIO DEFENDI

| | |
|--|-----|
| Introduction | 125 |
| Viruses | 127 |
| Test Cell Systems | 130 |
| Mouse cells | 130 |
| Hamster cells | 132 |
| Human cells | 132 |
| General Process of Transformation in Infected Cultures | 134 |
| Mouse cells-PV | 137 |
| Hamster cells-PV | 138 |
| Hamster cells-SV ₄₀ | 139 |
| Human cells-SV ₄₀ | 140 |
| Morphological Transformation | 142 |
| Karyological Changes | 152 |
| Neoplastic Changes | 159 |
| Fate of the Virus and Antigenic Changes | 164 |
| <i>PV-ITA</i> and <i>SV₄₀-ITA</i> | 168 |
| <i>PV-ICFA</i> and <i>SV₄₀-ICFA</i> | 171 |
| Conclusion | 176 |
| References | 179 |

The Metaphase-Arresting Plant Alkaloids and Cancer Chemotherapy

HERBERT SAVEL

| | |
|---|-----|
| Introduction | 189 |
| Tumor Screening | 190 |
| Preclinical Pharmacology | 192 |
| Clinical Pharmacology | 196 |
| Chemotherapy | 200 |
| Mechanism of Action Studies | 205 |
| a) Cytologic studies | 205 |
| b) Biochemical studies | 208 |
| c) Studies in human neoplasia | 210 |
| Discussion | 215 |
| Summary | 217 |
| References | 218 |

Local Irradiation of Lymph Nodes in Rats:

Morphological and Functional Alterations with Relation to Cancer Therapy

ARNFINN ENGESET

| | |
|---|-----|
| Introduction and Review of Literature | 226 |
| Scope of Present Investigation | 229 |
| Methods | 231 |
| A. Irradiation technique | 233 |
| B. Intralymphatic injections | 233 |
| 1. Roentgen contrast medium | 233 |
| 2. Cells and particles | 234 |
| a) Human erythrocytes | 234 |
| b) Toad erythrocytes | 234 |
| c) Charocal particles | 234 |
| d) Walker rat carcinoma cells | 236 |
| e) Diphtheria-tetanus-pertussis vaccine | 236 |
| C. Measurement of radioactivity | 237 |
| Results | 237 |
| A. Morphology of the lymph nodes | 238 |
| B. The lymphatic pathway | 241 |
| 1. In the popliteal region | 241 |
| 2. In the region of the renal nodes | 243 |
| C. Filtering capacity | 245 |
| 1. Human erythrocytes | 245 |
| 2. Toad erythrocytes | 248 |
| 3. Charcoal particles | 252 |
| 4. Walker rat carcinoma cells | 256 |
| 5. Diphtheria-tetanus-pertussis vaccine | 258 |
| D. Lymph node reaction after fractionated irradiation | 260 |
| Discussion | 260 |
| A. Changes in the morphology of the lymph nodes | 260 |
| B. Lymphatic pathways | 262 |
| C. Barrier function | 263 |
| D. Clinical implications | 265 |
| Summary | 266 |
| References | 267 |
