VII Preface

Bradley, P.J. (Nottingham); Eisele, D.W. (Baltimore, Md.)

1 Classification of Salivary Gland Neoplasms

Bradley, P.J. (Nottingham)

9 Frequency and Histopathology by Site, Major Pathologies, Symptoms and Signs of Salivary Gland Neoplasms

Bradley, P.J. (Nottingham)

17 Molecular Pathology and Biomarkers

Ha, P.K (San Francisco, Calif.); Stenman, G. (Gothenburg)

25 Evaluation: Imaging Studies

Kontzialis, M. (Baltimore, Md.); Glastonbury, C.M. (San Francisco, Calif.); Aygun, N. (Baltimore, Md.)

39 Evaluation: Fine Needle Aspiration Cytology, Ultrasound-Guided Core Biopsy and Open Biopsy Techniques

Howlett, D.C. (Eastbourne); Triantafyllou, A. (Liverpool)

46 Facial Nerve Monitoring

Guntinas-Lichius, O. (Jena); Eisele, D.W. (Baltimore, Md.)

53 Surgery for Benign Salivary Neoplasms

Gillespie, M.B. (Charleston, S.C.); Iro, H. (Erlangen)

63 Recurrent Benign Salivary Gland Neoplasms

Witt, R.L. (Newark, Del.); Nicolai, P. (Brescia)

71 Prognostic Scoring for Malignant Salivary Gland Neoplasms

Vander Poorten V. (Leuven); Guntinas-Lichius, O. (Jena)

83 Surgery for Primary Malignant Parotid Neoplasms

Deschler D.G. (Boston, Mass.); Eisele, D.W. (Baltimore, Md.)

95 Metastatic Cancer to the Parotid

Clark, J. (Sydney, N.S.W.); Wang, S. (San Francisco, Calif.)

104 Surgery for Malignant Submandibular Gland Neoplasms

Silver, N.L.; Chinn, S.B. (Houston, Tex.); Bradley, P.J. (Nottingham); Weber, R.S (Houston, Tex.)

113 Surgery for Malignant Sublingual and Minor Salivary Gland Neoplasms

Bradley, P.J. (Nottingham); Ferris, R.L. (Pittsburgh, Pa.)

- 120 Facial Reconstruction and Rehabilitation**
Guntinas-Lichius, O. (Jena); Genther, D.J.; Byrne, P.J. (Baltimore, Md.)
- 132 Management of Regional Metastases of Malignant Salivary Gland Neoplasms**
Medina, J. (Oklahoma City, Okla.); Zbären, P. (Bern); Bradley, P.J. (Nottingham)
- 141 Indications for Salivary Gland Radiotherapy**
Thomson, D.J.; Slevin, N.J. (Manchester); Mendenhall, W.M. (Gainesville, Fla.)
- 148 Chemotherapy and Targeted Therapy**
Sen, M.; Prestwich, R. (Leeds)
- 157 Management of Inoperable Malignant Neoplasms**
Kiess, A.P.; Quon, H. (Baltimore, Md.)
- 168 Management of Recurrent Malignant Salivary Neoplasms**
Merdad, M.; Richmon, J.D.; Quon, H. (Baltimore, Md.)
- 175 Salivary Gland Neoplasms in Children and Adolescents**
Bradley, P.J. (Nottingham); Eisele, D.W. (Baltimore, Md.)
- 182 Distant Metastases and Palliative Care**
Glazer, T.A.; Shuman, A.G. (Ann Arbor, Mich.)
- 189 Quality of Life after Salivary Gland Surgery**
Wax, M.K. (Portland, Oreg.); Talmi, Y.P. (Tel Hashomer)

- 200 Author Index**
- 201 Subject Index**

Preface

Salivary gland neoplasms are uncommon, and for the majority of clinicians, exposure to their diagnosis and management is gained over the clinician's lifetime. In 1991, the World Health Organization published that there were 12 recognised benign and 19 malignant primary epithelial salivary gland neoplasms, and a decade later, in 2001, it published an update stating that there were now 13 benign and 24 malignant primary epithelial salivary gland neoplasms. Since that time, a number of 'new' primarily malignant primary epithelial salivary gland neoplasms have been described.

This volume on salivary gland neoplasms is considered by the volume editors to be a beneficial educational resource for clinicians involved in the management of patients with salivary gland disorders, especially when considering the possible diagnosis of a salivary gland neoplasm. This volume is composed of twenty-three chapters, each written by world-renowned experts on salivary gland neoplasms. The intent for each chapter was to be concise, with concentration on the advances in this clinical area that have recently been made, while still summarising what is known. This editorial process has minimised duplication

of information, except where it has been considered important, and each chapter has a bibliography of relevant publications that might be consulted should additional information be required.

The chapters cover the breadth of salivary gland neoplasms, from the major to the minor salivary glands, from benign to malignant, from primary to secondary, from children to adults, and from recurrent benign to malignant disease, and describe management of local regional metastasis, reconstructive procedures following radical parotidectomy, indications for radiotherapy, usage of chemotherapy and targeted therapy, management of distant metastasis and palliative care, quality of life and methods of prognostic scoring for malignant salivary gland neoplasms. The final chapter presents the volume editors' comments on the future perspective necessary to improve treatment outcomes and patients' quality of life.
