

Brain Stem Death

Translational Research in Biomedicine

Vol. 8

Series Editor

Samuel H.H. Chan Kaohsiung

Associate Editor

Julie Y.H. Chan Kaohsiung

The Chang Gung Medical Foundation is the patron of this book series.

Brain Stem Death

A Chronicle of Three Decades of Search
for Its Cellular and Molecular Mechanisms

Samuel H.H. Chan Kaohsiung

20 figures, 13 in color, 2022

Disclaimer. The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements in the book is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety. The publisher and the editor(s) disclaim responsibility for any injury to persons or property resulting from any ideas, methods, instructions or products referred to in the content or advertisements.

Drug Dosage. The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

Contents

VII Dedication

VIII Preface

Chapter 1

1 Introduction

Chapter 2

4 Identification of a Life-and-Death Signal: A Serendipitous Finding

Chapter 3

13 Rostral Ventrolateral Medulla as a Suitable Neural Substrate for Mechanistic Investigation of Brain Stem Death

Chapter 4

22 Nitric Oxide in the Rostral Ventrolateral Medulla Plays both a Pro-Life and Pro-Death Role during Brain Stem Death

Chapter 5

35 Multiple Roles of Mitochondria in the Rostral Ventrolateral Medulla during Brain Stem Death

Chapter 6

47 Pro-Life Role of Heat Shock Proteins in the Rostral Ventrolateral Medulla during Brain Stem Death

Chapter 7

57 Hypoxia-Inducible Factor-1 in the Rostral Ventrolateral Medulla Is Pro-Life during Brain Stem Death

Chapter 8

65 A Double-Edged Sword Role for Ubiquitin-Proteasome System in the Rostral Ventrolateral Medulla during Brain Stem Death

Chapter 9

72 Sumoylation in the Rostral Ventrolateral Medulla Plays a Pro-Life Role during Brain Stem Death

Chapter 10

80 PTEN/FLJ10540/PI3K/Akt Signaling in the Rostral Ventrolateral Medulla Plays both Pro-Life and Pro-Death Roles during Brain Stem Death

Chapter 11

87 Lessons on Brain Stem Death Learnt from Diffusion Tensor Imaging

Chapter 12

99 Concluding Remarks

104 Subject Index
