# Preface: 2018 International Conference on Biotechnology and Bioengineering (8th ICBB)

The 2018 International Conference on Biotechnology and Bioengineering (ICBB-2018) was held successfully during October 24-26, 2018 in Budapest, Hungary. It was jointly organized by Asia-Pacific Association of Science, Engineering and Technology, Chinese Journal of Biologicals, in collaboration with Szent Istvan University, Centre for Agricultural Research Hungarian Academy of Sciences and Institute of Bioorganic Chemistry, Polish Academy of Sciences.

There is no doubt that over the past few years Biotechnology and Bioengineering have been amongst the most dynamically developing areas of biology. Both of these disciplines provide new techniques, tools and products, which can be applied in such prominent fields as agriculture, industry, environment, medicine and health care, and of course, in scientific research. The advancements in Biotechnology and Bioengineering raise new challenges and opportunities, which should be thoroughly considered and discussed. In order to address these needs, this Conference provides an excellent occasion to discuss new ideas, share knowledge and experience, exchange opinions, considerations, as well as doubts within the constantly expanding areas of Biotechnology and Bioengineering.

The conference has been designed to provide an innovative and comprehensive overview of biotechnology and bioengineering, and a focus has been given to major research advances, including New Approaches & Methods; Cell and Immunology; Genomics & Molecular Biology; Biomaterials, Biopolymers & Bioenergy; Biomedicine, Pharmacology & Toxicology; Biomedical Engineering & Techniques and other related aspects. More information about the conference can be found at <http://icbb.apaset.org/2018/>.

Finally, we would like to thank all of the reviewers and members of international scientific committee who have dedicated their constant support and countless time to bring these scratches into a book. The ICBB 2018 proceeding is a credit to a large group of people, and everyone should be proud of the outcome.
