
Manuscripts dealing with Latin American history in Rome are here described and listed under forty headings. Of these, thirty-six are under the title "Manoscritti provenienti dall'Archivio della Compagnia di Gesù"; one group from the "Fondo S. Apostoli"; and three from the "Fondo Sessoriano." These forty entries vary from a single item to a shelf of documents, depending on how they had been catalogued in the library. Dr. Tentori emphasizes the ethnological content of these manuscripts in his comments.

NEW PERIODICALS

This new quarterly journal of the State Archive of Chiapas began publication in 1953 with two clearly printed and attractively bound numbers containing 145 and 125 pages of documents relating to the history of Chiapas. According to Fernando Castaño Gamboa, the Director of this newly established Archive, the purpose of the Boletín is to help scholars extend their investigations into the history of Chiapas by publishing selected items from the archive's substantial holdings of both originals and photocopies of records. The documents published include a real cédula of 1543, a variety of items relating to the activities of the regular and secular clergy, reports on the production and commerce of cochineal and cacao, accounts of Indian uprisings, and a travel diary of the 1780's. Catalogs of the archive's holdings are being run serially. (J. P. H.)

Mélange of historical, literary, philosophical, and bibliographical articles plus documents, reviews, and notes on the activities of this new institute. (L. H.)

A new and broadly based review, practically unique of its kind in Latin America. Edited by José Luis Romero and a group of active younger writers in Argentina who have a universal outlook on the history of culture. (L. H.)

An important publication which promises to become a reference tool of the first importance. Succinct, honest notes on the widely scattered current articles and books on all periods of Spanish history. The section on Spain in America is satisfactory only for publications issued in Spain, because the Índice includes, for the time being, only such books or other items issued
