**SUBJECT INDEX**

Abattoir  
Non-O157 STEC in beef abattoirs of Argentina, 2008  
Acetilum Aloreña de Málaga  
ZnCl₂ as a preservative in table olives, 2169  
Acid  
*L. monocytogenes* response to pH and aₜ shifts, 78  
Acidic calcium sulfate  
*L. monocytogenes* inhibition by combined antimicrobials, 122  
Acidified food  
Antimicrobial effects of weak acids, 893  
Acid sprays  
Pork decontamination by acid spray-steam condensation, 1338  
Acute gastroenteritis  
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592  
Adherence-associated genes  
EHEC virulence gene expression in ground beef, 1434  
Adhesion  
*L. gasseri* aggregation and adhesion to specific pathogens, 1482  
Adsorption  
Myco toxin adsorption by yeast products, 1175  
ZEN removal by montmorillonite K10 and pillared montmorillonite K10, 954  
Aerobic microflora  
Bacterial radiosensitization in broccoli, 1065  
Aflatoxins  
Aflatoxins and mold growth in hot peppers during storage, 830  
Reduction of aflatoxin in peanuts using *C. cerevisiae*, 1003  
Agave nectar  
Behavior of microorganisms in pulque, 580  
Aggregation  
*L. gasseri* aggregation and adhesion to specific pathogens, 1482  
Aging  
Reduce *E. coli* O157:H7 and *Salmonella* by simulated chilling and aging, 289  
Air chill  
Microbiological quality of WIC and AC broilers, 1531  
Alcohol shock  
*C. difficile* in cattle at harvest in the United States, 1618  
*Alicyclobacillus*  
Recovery of *Alicyclobacillus* from fruit juice, 1370  
*Alicyclobacillus* spp.  
Detection of *Alicyclobacillus* spp. using DNA chip, 933  
Alkaline phosphatase  
Modified rapid chemiluminescent phosphatase detection method, 1144  
Allergy  
*A. nisakasi* heated under controlled conditions, 2119  
Raw milk systematic review and meta-analysis, 1814  
Allyl isothiocyanate  
Influence of NaCl and NaNO₃ on bacterial sinigrin hydrolysis, 2162  
Almonds  
*Pediococcus* sp. as a surrogate for *Salmonella* Enteritidis PT30, 603  
*Alternaria alternata*  
Effects of oligochitosan on jujube fruit postharvest rot, 783  
*Alternaria* spp.  
PCR detection of *Alternaria* DNA in foodstuffs, 240  
Ammonium hydroxide  
Antimicrobial effect of ammonium hydroxide, 475  
Anaerobic  
Antimicrobial effects of weak acids, 893  
Analytical methods  
LC-MS in food allergen detection, 316  
Animals  
Bacteriocinogenic *Enterococcus* spp. isolated from animals, 1252  
*A. nisakasi*  
*A. nisakasi* heated under controlled conditions, 2119  
*A. nisakas*  
*A. nisakas* heated under controlled conditions, 2119  
*A. nisakasidaceae* in teleosts and cephalopods in Sardinia, 1769  
*A. nisakas simplex*  
*A. nisakas* heated under controlled conditions, 2119  
Antibacterial  
Antibacterial activity of reactive quaternary ammonium compounds, 2107  
Antibacterial silver  
Functional coatings and brewery surface microorganisms, 1891  
Antibiotic resistance  
*C. jejuni* and *C. coli* in Hungary, 905  
Evaluation of the potential pathogenicity of food enterococci, 465  
*Salmonella* in retail meat products, 161  
Virulence and ESBL of *Klebsiella* in meat sources, 559  
Antibiotics  
Susceptibility of *Salmonella* spp. to bacteriocins of *B. thuringiensis*, 274  
Antifungal  
Evaluation of antifungal activity by gaseous contact, 2192  
*T. violacea* extracts inhibit conidial germination, 1007  
Antifungal activity  
Antifungal δ-dodecalactone from LAB, 651  
Antimicrobial(s)  
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55  
Control of listeriae on pork scrapple, 394  
Effect of antimicrobials on *L. monocytogenes*, 994  
Meta-analysis of antimicrobial soaps, 1875  
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468  
Small molecule screening for compounds that inhibit *E. coli* O157:H7, 2148  
Antimicrobial activity  
Antibiotics in milk, 311  
Antimicrobial activity of egg white, 24  
Bacteriocinogenic *Enterococcus* spp. isolated from animals, 1252  
Effect of saccharides on lactoperoxidase system, 134  
Antimicrobial agent resistance  
Porcine salmonellosis in Spain, 1070  
Antimicrobial coating  
Bacterial radiosensitization in broccoli, 1065  
Antimicrobial effect  
Essential oil effect on growth boundaries of *Listeria* and *Salmonella*, 45  
Antimicrobial materials  
Antimicrobial materials and food hygiene, 1200  
Antimicrobial properties  
Incorporation of nisin in EVA films by melt processing, 1137  
Antimicrobial resistance  
Antimicrobial resistance of vibrios isolated from farmed fish, 380  
Antimicrobial-resistant *Campylobacter* from retail meats, 616  
Antimicrobial-resistant enterococci in poultry, 1639  
Antimicrobial-resistant *S. aureus* in retail meats, 1625  
Characterization of *S. aureus* from milk, 1353  
ExPEC in retail meats, 38  
Microbiological hygiene of meat in Burkina Faso, 1547  
Prevalence and resistance of *L. monocytogenes* in chicken, 1017  
*Salmonella* from oysters served raw in restaurants, 1025  
Antimicrobial resistance patterns  
*Salmonella* prevalence in chicken meat in Japan, 270  
Antimicrobial susceptibility  
AMR in *Campylobacter*, *Salmonella*, and *E. coli* from retail grain-fed veal, 1245  
Antimicrobial resistance in *E. coli* isolated from milk-fed veal, 1328  
Microbiological safety of imported seafood, 1451  
Antisera  
*L. monocytogenes* serotyping, 403  
API 32E  
Comparative study of *Cronobacter* identification technologies, 2182  
Apple extract  
Antimicrobial formulations against *S. enterica* on organic leafy greens, 1676  
Apple juice  
Patulin reduction in apple juice, 149  
Thermal resistance of *E. coli* in apple juice, 1231  
Aquaculture  
Lipophilic shellfish toxins along the south coast of Korea, 2127
Arcobacter
Occurrence of Arcobacter in feces of Nigerian chicken, 119

Arctic shrimp
Detection of shrimp-derived components in food by real-time PCR, 1776

Argentina
Non-O157 STEC in beef abattoirs of Argentina, 2008

Array
EHEC hybridization array system, 365

Artisan cheese
Characterization of S. aureus from milk, 1353

Aspergillus
Reduction of aflatoxin in peanuts using C. cerevisiae, 1003
T. violacea extracts inhibit conidial germination, 1007

Aspergillus flavus
Evaluation of antifungal activity by gaseous contact, 2192

Aspergillus niger
Fumonisins B₃–producing A. niger in California raisins, 672

Aspergillus tubingensis
Fumonisins B₃–producing A. niger in California raisins, 672

Atomic absorption spectroscopy
Metals in farmed fish from Tenerife Island, 1938

ATP bioluminescence
Rapid ATP assessment of hygienic status of food contact surfaces, 686

Attachment
Attachment of E. coli O157 to stainless steel, 1359

Autoinducer-2–like activity
Lactic acid bacteria exhibit autoinducer-2–like activity, 631

Automated most-probable-number method
Automated MPN comparison, 1558

Avian influenza
Thermal inactivation of AI and NDV in fat-free egg product, 1161

Avocado
Electrolyzed oxidizing water for disinfecting avocados, 1552

Bacillus cereus
Characterization of a probiotic B. cereus strain, 1189
Enumeration of B. cereus spores in milk, 461
Growth of B. cereus in wet noodles, 658
Heat resistance of spores of a psychrotolerant B. cereus isolate, 1662
Mild heat germination and inactivation of B. cereus spores, 2079

Bacillus thuringiensis
Susceptibility of Salmonella spp. to bacteriocins of B. thuringiensis, 274

Bacteria detection
Multiplex immunoassay for detection of foodborne pathogens, 2039

Bacterial pathogens
Inhibiting bacterial propagation in raw milk, 1475

Bacterial survival
Survival of E. coli and C. jejuni in bottled water, 254

Bacteriocins
Susceptibility of Salmonella spp. to bacteriocins of B. thuringiensis, 274

Bacteriocin structural genes
Bacteriocinogenic Enterococcus spp. isolated from animals, 1252

Bacteriophage
Phages as control agents of beer spoilage, 2157

Bactometer
Bactometer system for monitoring bacterial populations in sachlínch, 145

Barley
Ozone treatment of malting barley, 2134

BAX PCR
Detection of L. monocytogenes, 1930

Beef
Additional cooking procedures to achieve lethality performance standards, 1741
Alternative procedures to achieve stabilization performance standards, 101
C. difficile in cattle at harvest in the United States, 1618
E. coli and psychrotrophic bacteria inhibition in brine-injected beef, 359
E. coli O157:H7 translocation and decontamination, 1048

Reduce E. coli O157:H7 and Salmonella by simulated chilling and aging, 289
Translocation of E. coli into beef striploins, 1334

Beef bologna
Radiation inactivation of Y. pestis in bologna, 627

Beef carcass
Multiplex PCR detection of Shiga toxin–producing E. coli, 228

Beech cattle
Fecal prevalence of E. coli O157:H7 in beef steers, 912
Isolation methods for C. difficile, 130
Reduction in dietary WDGS and E. coli O157, 1611

Beef grinding logs
Outbreak of multidrug-resistant Salmonella Newport infections, 1315

Beef patties
Control of E. coli O157:H7 in beef, 2018

Beef trim
Multiplex PCR detection of Shiga toxin–producing E. coli, 228

Beer
Growth and survival of pathogens in beer, 1670

Bench cover materials
Salmonella biofilms on bench cover materials, 32

Benzoalkonium chloride
Cross-responses in BAC-adapted L. monocytogenes, 1112

Bermuda
Vitamin A fish poisoning, 1581

Bifidobacteria
Probiotic bacteria in whey cheese, 1194

Bioaccumulation
Selected POPs bioaccumulation in outdoor-farmed pigs, 261

Biodegradation
Biodegradation of patulin by yeasts, 154

Biofilm
Control of Salmonella in poultry, 2024

Cross-responses in BAC-adapted L. monocytogenes, 1112

Inactivation of C. sakazakii biofilm by trans-cinnamaldehyde, 200

Biofilm formation
Salmonella biofilms on bench cover materials, 32

Biogenic amine
Characterization of ornithine decarboxylase from O. oeni, 1309

Biogenic amine composition
Biogenic amines in Egyptian foods, 681

Biological control
Reduction of aflatoxin in peanuts using C. cerevisiae, 1003

Biomuniscence
Bioluminescent imaging of C. sakazakii, 573

Blade tenderized
Translocation of E. coli into beef striploins, 1334

Blood-free media
Modified enrichment for Campylobacter, 221

Blue crabmeat
Detection of L. monocytogenes, 1930

Bottled water
Survival of E. coli and C. jejuni in bottled water, 254

Botulism outbreaks
Home-canned vegetables and botulism outbreaks, 2090

Bread
Pathogen growth in no-knead dough, 285

Brewing industry
Phages as control agents of beer spoilage, 2157

Brine injection
Antimicrobial effect of ammonium hydroxide, 475

E. coli and psychrotrophic bacteria inhibition in brine-injected beef, 359
Broiler chicken cecum
trans-Cinnamaldehyde fails to combat Campylobacter in chicks, 1729

Bulk tank milk
Zoonotic bacteria in bulk tank milk and filters from U.S. dairies, 759

Burden of illness
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592

By-products
Fusarium mycotoxins in rice and by-products, 1169
Cabbage
Bacterial flora of cabbage during growing, 645
E-beam inactivation of norovirus in food, 1155
Caenorhabditis elegans
Preselection of Lactobacillus isolates by C. elegans, 86
Calicivirus
Irradiation of calicivirus on lettuce, 1500
Virolysis of feline calicivirus and human GI4 norovirus, 2113
Campylobacter
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592
AMR in Campylobacter, Salmonella, and E. coli from retail grain-fed veal, 1245
Antimicrobial-resistant Campylobacter from retail meats, 616
Campylobacter and chicken meat, 2048
Campylobacter and Salmonella in retail chicken in Ireland, 1912
Effect of polyphosphate additives on pH, 1735
Microbiological quality of WIC and AC broilers, 1531
Modified enrichment for Campylobacter, 221
Campylobacter jejuni
Detection of C. jejuni with various detection tools, 456
Survival of E. coli and C. jejuni in bottled water, 254
trans-Cinnamaldehyde fails to combat Campylobacter in chicks, 1729
Campylobacter spp.
Campylobacter in poultry products in Poland, 986
C. jejuni and C. coli in Hungary, 905
Enrichment media specificity revealed by microarray analysis, 1030
Cancer
Raw milk systematic review and meta-analysis, 1814
Canned corn
ZEN removal by montmorillonite K10 and pillared montmorillonite K10, 954
Canning
FSO approach for commercially sterile foods, 1956
Carbohydrate
Effects of an oxidative agent and lectins on HAV binding, 157
Carvacrol
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55
Listeria survival in response to heat and aroma compounds, 2070
Carya illinoinensis
Behavior of Salmonella on pecans, 588
Carya illinoinensis
Inactivation of Salmonella on pecans, 1441
Cassava
Hydrocyanic acid in cassava chips, 980
Catfish
Foodborne hazards associated with catfish consumption, 500
Cattle
C. difficile in cattle at harvest in the United States, 1618
E. coli O157:H7 genetic diversity in bovine fecal samples, 1186
E. coli risk for beef carcasses, 1422
ESBL in farm animals at slaughter, 446
Gallium maltolate treatment of cattle, 524
Transport of cattle and E. coli O157, 1605
Vaccination of cows and calves with E. coli O157 SRP extract, 1599
Cause and effect
Indicator organisms, 1387
CDC biofilm reactor
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55
Cell culture
Rapid detection method for HAV, 1756
Cellular viability
Salmonella biofilms on bench cover materials, 32
Cell wall thickening
T. violacea extracts inhibit conidial germination, 1007
Cephalopods
Anisakidae in teleosts and cephalopods in Sardinia, 1769
Checklist
Food handling and quality in long-term care facilities, 1504
Cheese
L. monocytogenes in cheese plants, 816
M. paratuberculosis in food, 480
Prevalence of Listeria spp. and L. monocytogenes in farm dairies, 919
Cheesemaking
Growth limits of L. monocytogenes in a cheese matrix, 1805
Cheese whey
Inhibitory activity of fermented whey, 94
Chelonodon patoca
Identification of toxicity and fish species in fish poisoning, 789
Cheloniidae
Detection of toxicity and fish species in fish poisoning, 789
Chemiluminescence detection
Modified rapid chemiluminescent phosphatase detection method, 1144
Chesapeake Bay
High salinity relay to reduce V. vulnificus in oysters, 1902
Chicken
Campylobacter and Salmonella in retail chicken in Ireland, 1912
Control of Salmonella in poultry, 2024
Efficacy of sequential application of decontamination agents, 743
Predictive microbiology model for Salmonella on chicken, 279
Salmonella reduction on whole-muscle chicken, 1079
Virulence and ESBL of Klebsiella in meat sources, 559
Chicken breast
Control of Salmonella in chicken, 1833
Chicken eggs
Salmonella Enteritidis in irradiated eggs, 2031
Chicken liver
Campylobacter and chicken meat, 2048
Chicken meat
Campylobacter and chicken meat, 2048
Salmonella prevalence in chicken meat in Japan, 270
Chicken skin
Growth of Salmonella on chicken as affected by inoculum size, 1630
Chiller
Chiller heating for Listeria control, 999
China
Salmonella on raw poultry in China, 1724
Survey of fumonisins B1 and B2 in corn, 1374
Chips
Hydrocyanic acid in cassava chips, 980
Chlorfenapyr
Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
Chlorine
Virolysis of feline calicivirus and human GI4 norovirus, 2113
Chlorine alternative
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468
Chopped iceberg lettuce
Outbreak of Salmonella serotypes Newport and Reading, 1035
Citral
Listeria survival in response to heat and aroma compounds, 2070
Citrus juice
Decontamination of orange surfaces, 1684
Citrus peel
Orange peel products reduce E. coli O157:H7 in ruminants, 1917
Clade 8
Emergence of O157 strains in clade 8, 1324
Cladosporium
Quantitative analysis of mycoflora on commercial fruits in Japan, 1488
Clinical profiles
Salmonella screening tool for complaint-based surveillance, 106
Clonal dissemination
Emergence of O157 strains in clade 8, 1324
Clostridium botulinum
FSO approach for commercially sterile foods, 1956
Growth of group II C. botulinum, 1797
Clostridium difficile
C. difficile in cattle at harvest in the United States, 1618
Isolation methods for C. difficile, 130
L. gasseri aggregation and adhesion to specific pathogens, 1482
Clostridium perfringens
Alternative procedures to achieve stabilization performance standards,
Naturally cured processed meats inoculated with *C. perfringens*, 417
Survival of *C. perfringens* in naturally cured meats, 410
Coagulase gene polymorphism
Characterization of *S. aureus* in Urfa cheese, 1788
Coating
Antibacterial activity of reactive quaternary ammonium compounds, 2107
Cockroach
A novel detection method for four violative vector species, 1883
Coliforms
Automated MPN comparison, 1558
Bactometer system for monitoring bacterial populations in salchichón, 145
Combined treatments
Yeast inactivation by combined treatments, 1751
Commercial fruit
Quantitative analysis of mycoflora on commercial fruits in Japan, 1488
Commercial sanitizers
Toxicity and efficacy of selected neutralizing agents, 820
Complaints
Foodborne illness surveillance by local health departments, 432
Component identification
Detection of shrimp-derived components in food by real-time PCR, 1776
Concentration
*Salmonella* and *E. coli* O157:H7 concentration from water, 1934
Confocal laser microscopy
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55
Confocal laser scanning microscopy
Inactivation of pork pathogens by steam-ultrasound treatment, 769
Conidial germination
*T. violacea* extracts inhibit conidial germination, 1007
Consumer complaint
*Salmonella* screening tool for complaint-based surveillance, 106
Consumer food handling
Consumer burger preparation, 1708
Trends in food handling and consumption practices, 1513
Consumer perceptions and practices
Consumer food safety perceptions and practices, 1922
Contamination
*Campylobacter* in poultry products in Poland, 986
Comparison of pathogen contamination route of leafy greens, 1536
Financial impact of a milk-dioxin incident, 967
Inhibiting bacterial propagation in raw milk, 1475
Microbiological survey of lettuce in Japan, 1543
MRSA in a pork production chain, 126
Contamination level
Growth limits of *L. monocytogenes* in a cheese matrix, 1805
Continuous flow centrifugation
*Salmonella* and *E. coli* O157:H7 concentration from water, 1934
Cooked meat products
Food handling and quality in long-term care facilities, 1504
Cooking
Fate of *E. coli* in nonintact beef, 1054
Cooking fish
Physical factors in the viability of *G. binucleatum*, 844
Corn
Survey of fumonisins B1 and B2 in corn, 1374
Cost of illness
Costs and burden of STEC O157 in The Netherlands, 545
Critical code violations
GIS mapping to track retail foods safety risks, 1524
*Cronobacter*
Isolation of *Cronobacter*, 387
*Cronobacter* identification
Comparative study of *Cronobacter* identification technologies, 2182
*Cronobacter* sakazakii
Bioluminescent imaging of *C. sakazakii*, 573
Hemorrhagic diarrhea caused by *C. sakazakii*, 2177
Inactivation of *C. sakazakii* biofilm by *trans*-cinnamaldehyde, 200
*L. gasseri* aggregation and adhesion to specific pathogens, 1482
*Cronobacter* spp.
Inhibition of *Cronobacter* by vanilla compounds, 2062
Cross-contamination
Antimicrobial materials and food hygiene, 1200
*L. monocytogenes* contamination of deli meats at retail, 1860
Cross hybridization
Detection of *Alicyclobacillus* spp. using DNA chip, 933
Cross protection
Thermal inactivation of stress-adapted *E. coli* O157:H7 in beef, 531
Crustaceans
Total and inorganic arsenic in marine animals, 450
Cryptosporidium
Foodborne disease caused by *Cryptosporidium* and *Giardia*, 1944
Levulinic acid against parasites, 140
Cuticle
Effect of egg washing on cuticle quality, 1649
Cyanogen
Hydrocyanic acid in cassava chips, 980
Cytokines
Yoghurt feeding and recurrence of IBD, 801
Dairy cattle
Isolation methods for *C. difficile*, 130
Dairy chain
Financial impact of a milk-dioxin incident, 967
Dairy food
Probiotic bacteria in whey cheese, 1194
Dairy products
Modified rapid chemiluminescent phosphatase detection method, 1144
Debaryomyces
Proteolytic activity of LAB and fungal biota in dry-cured ham, 826
Decontamination
Decontamination of orange surfaces, 1684
*E. coli* O157:H7 translocation and decontamination, 1048
Efficacy of sequential application of decontamination agents, 743
Inactivation of pork pathogens by steam-ultrasound treatment, 769
UV decontamination of chicken, packaging, and contact surfaces, 565
Deli meats
*L. monocytogenes* contamination of deli meats at retail, 1860
D-Deoxynivalenol
Antifungal D-deoxynivalenol from LAB, 651
Demographics
GIS mapping to track retail foods safety risks, 1524
Deoxynivalenol
Ozone treatment of malting barley, 2134
Desiccation
Chiller heating for *Listeria* control, 999
Detection
Attachment of *E. coli* O157 to stainless steel, 1359
Detection methodology
Norovirus screening of fruit products, 425
Diacetate
Control of listeriae on pork scrapple, 394
Diarrhea
Factors associated with working while ill, 215
Diarrhetic shellfish poisoning
Lipophilic shellfish toxins along the south coast of Korea, 2127
Dicentrarchus labrax
Metals in farmed fish from Tenerife Island, 1938
Dietary intake
Metals in farmed fish from Tenerife Island, 1938
Digestive tissue
   Effects of an oxidative agent and lectins on HAV binding, 157
Dihydroxy fatty acids
   Inhibition of *Fusarium* by oat compounds, 2188
Diovin
   Financial impact of a milk-dioxin incident, 967
Direct selling
   Prevalence of *Listeria* spp. and *L. monocytogenes* in farm dairies, 919
Disability-adjusted life years
   Costs and burden of STEC O157 in The Netherlands, 545
Disclosure
   Designing a national restaurant inspection disclosure tool, 1869
Disease burden
   Costs and burden of STEC O157 in The Netherlands, 545
Disease resistance
   Effects of oligochitosan on jujube fruit postharvest rot, 783
Disinfectant
   Levulinic acid against parasites, 140
Disinfection
   Electrolyzed oxidizing water for disinfecting avocados, 1552
   Slicing under chlorinated water, 2142
Display
   *E. coli* and psychrotrophic bacteria inhibition in brine-injected beef, 359
Distillers grains
   Reduction in dietary WDGS and *E. coli* O157, 1611
Diversity
   Prevalence and molecular characterization of *E. coli* O157:H7 in sheep, 1413
DNA microarray chip
   Detection of *Alicyclobacillus* spp. using DNA chip, 933
   Detection of irradiated dry-cured ham using RPLC-GC-MS, 960
Dose
   Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
   Dried distiller’s grains
   Fecal prevalence of *E. coli* O157:H7 in beef steers, 912
Drinking water
   *M. paratuberculosis* in food, 480
   Survival of *E. coli* and *C. jejuni* in bottled water, 254
Dry-cured ham
   Proteolytic activity of LAB and fungal biota in dry-cured ham, 826
   Dry sausages
   Bacometer system for monitoring bacterial populations in salchichón, 145
Durum wheat
   Effect of milling on T-2 and HT-2 toxins, 1700
D-values
   High hydrostatic pressure inactivation of foodborne microorganisms, 2097
   Inhibition of *Cronobacter* by vanilla compounds, 2062
*(E)-2-hexenal
   *Listeria* survival in response to heat and aroma compounds, 2070
Egg quality
   Effect of egg washing on cuticle quality, 1649
   Egg washing
   Effect of egg washing on cuticle quality, 1649
   Egg white
   Antimicrobial activity of egg white, 24
   Electrolyzed oxidizing water
   Electrolyzed oxidizing water for disinfecting avocados, 1552
   Electrolyzed water
   Human norovirus binding to lettuce and raspberries, 1364
Electron beam
   E-beam inactivation of norovirus in food, 1155
   Electron-beam irradiation
   E-beam processing of fresh-cut cabbage, 115
Encephalitozoon
   Levulinic acid against parasites, 140
Enrichment
   Detection of *E. coli* O157:H7 in raw ground beef, 6
   Enrichment medium
   Modified enrichment for *Campylobacter*, 221
Enteric bacteria
   Rapid ATP assessment of hygienic status of food contact surfaces, 686
Enterobacteriaceae
   Bacometer system for monitoring bacterial populations in salchichón, 145
   ESBL in farm animals at slaughter, 446
Enterocins
   Bacteriocinogenic *Enterococcus* spp. isolated from animals, 1252
Enterococci
   Evaluation of the potential pathogenicity of food enterococci, 465
   *Enterococcus faecalis*
   Antimicrobial-resistant enterococci in poultry, 1639
   *Enterococcus faecium*
   Antimicrobial-resistant enterococci in poultry, 1639
   Enterococcus spp.
   Bacteriocinogenic *Enterococcus* spp. isolated from animals, 1252
Enterohemorrhagic *E. coli*
   EHEC hybridization array system, 365
   Enterohemorrhagic *Escherichia coli* (EHEC) O157
   Emergence of O157 strains in clade 8, 1324
Enterotoxin
   Characterization of *S. aureus* from milk, 1353
   Characterization of *S. aureus* in Urfa cheese, 1788
Enumeration
   Quantitative analysis of mycoflora on commercial fruits in Japan, 1488
Environment
   *L. monocytogenes* in cheese plants, 816
   *L. monocytogenes* in retail establishments, 1083
   Selected POPs bioaccumulation in outdoor-farmed pigs, 261
Enzymatic activity
   Characterization of dairy and human lactic acid bacteria, 1379
Enzyme-linked immunosorbent assay
   Characterization of *S. aureus* in Urfa cheese, 1788
Epidemiology
   *E. coli* risk for beef carcasses, 1422
   Porcine salmonellosis in Spain, 1070
Epoxy fatty acids
   Inhibition of *Fusarium* by oat compounds, 2188
*Escherichia coli*
   AMR in *Campylobacter*, *Salmonella*, and *E. coli* from retail grain-fed veal, 1245
   Antimicrobial activity of egg white, 24
   Antimicrobial resistance in *E. coli* isolated from milk-fed veal, 1328
   Automated MPN comparison, 1558
   E-beam processing of fresh-cut cabbage, 115
   Inactivation of pork pathogens by steam-ultrasound treatment, 769
   Indicator organisms, 1387
   Inhibitory activity of fermented whey, 94
   Microbiological hygiene of meat in Burkina Faso, 1547
   Rapid ATP assessment of hygienic status of food contact surfaces, 686
   Relationship between virulence genes and *E. coli*, 18
   Risk assessment for *E. coli* in leafy greens, 700
   *Salmonella* and *E. coli* in chili peppers, 874
   Shiga toxins and *Salmonella* risk assessment for *E. coli* in leafy greens, 700
   Translocation of *E. coli* into beef striploins, 1334
   Vaccination of cows and calves with *E. coli* O157 SRP extract, 1599
   Zoonotic bacteria in bulk tank milk and filters from U.S. dairies, 759
*Escherichia coli* O103
   Multiplex PCR detection of Shiga toxin-producing *E. coli*, 228
*Escherichia coli* O111
   Multiplex PCR detection of Shiga toxin-producing *E. coli*, 228
*Escherichia coli* O113
   Multiplex PCR detection of Shiga toxin-producing *E. coli*, 228
*Escherichia coli* O145
   Multiplex PCR detection of Shiga toxin-producing *E. coli*, 228
Escherichia coli O157
Attachment of E. coli O157 to stainless steel, 1359
E. coli risk for beef carcasses, 1422
Multiplex PCR detection of Shiga toxin–producing E. coli, 228
Shiga toxins and E. coli O157, 373
Transport of cattle and E. coli O157, 1605
Escherichia coli O157:H7
Antimicrobial effects of weak acids, 893
Comparison of pathogen contamination route of leafy greens, 1536
Control of E. coli O157:H7 in beef, 2018
Decontamination of orange surfaces, 1684
Detection of E. coli O157:H7 in raw ground beef, 6
E. coli and psychrotrophic bacteria inhibition in brine-injected beef, 359
E. coli O157:H7 genetic diversity in bovine fecal samples, 1186
E. coli O157:H7 translocation and decontamination, 1048
EHEC virulence gene expression in ground beef, 1434
Fate of E. coli in noninact beef, 1054
Fecal prevalence of E. coli O157:H7 in beef steers, 912
Growth and survival of pathogens in beer, 1670
Growth probability of E. coli O157:H7 in ground beef, 622
Internalization of E. coli O147:H7 in mung bean, 1224
Irrigation water and persistence of E. coli O157:H7 on spinach, 709
Levulinic acid against parasites, 140
Microbiological survey of lettuce in Japan, 1543
Orange peel products reduce E. coli O157:H7 in ruminants, 1917
Pathogen cross-contamination during produce wash, 352
Prevalence and molecular characterization of E. coli O157:H7 in sheep, 1413
Reduce E. coli O157:H7 and Salmonella by simulated chilling and aging, 289
Reduction in dietary WDGS and E. coli O157, 1611
Salmonella and E. coli O157:H7 concentration from water, 1934
Slicing under chlorinated water, 2142
Small molecule screening for compounds that inhibit E. coli O157:H7, 2148
Survival of E. coli and C. jejuni in bottled water, 254
Thermal inactivation of stress-adapted E. coli O157:H7 in beef, 531
Virulence of E. coli O157:H7 on fresh-cut lettuce, 718
Escherichia coli O26
Multiplex PCR detection of Shiga toxin–producing E. coli, 228
Essential oil
Multiplex PCR detection of Shiga toxin–producing E. coli, 228
Essential oil
Essential oil effect on growth boundaries of Listeria and Salmonella, 45
Evaluation of antifungal activity by gaseous contact, 2192
Esterified legume protein
Inhibiting bacterial propagation in raw milk, 1475
Ethanol
C. difficile in cattle at harvest in the United States, 1618
Growth of B. cereus in wet noodles, 658
Ethoxyquin dimer
Investigations of ethoxyquin dimer in rats, 1574
Ethylene-co-vinyl acetate
Incorporation of nisin in EVA films by melt processing, 1137
Ethyl vanillin
Inhibition of Cronobacter by vanilla compounds, 2062
Eugenol
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55
Executive function
Predicting hygienic food handling behaviors, 925
ExPEC
ExPEC in retail meats, 38
Exposure
Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
Exposure assessment
Occurrence of M. avium subsp. paratuberculosis in raw milk, 1126
Extended spectrum β-lactamase (ESBL)
ESBL in farm animals at slaughter, 446
Virulence and ESBL of Klebsiella in meat sources, 559

Factorial design
Antimicrobial activity of egg white, 24
Farmed fish
Antimicrobial resistance of vibrios isolated from farmed fish, 380
Fattening pig
ESBL in farm animals at slaughter, 446
FDA-regulated products
Effectiveness of food recalls in NYC retailers, 111
Feathers
Control of Salmonella in poultry, 2024
Fecal sample
ESBL in farm animals at slaughter, 446
Feline calcivirus
Comparison of foodborne viral reduction by a nonthermal pressure process, 1840
Ozone inactivation of norovirus surrogates, 836
Fermentation
Pathogen growth in no-knead dough, 285
Fermentation product
Inhibitory activity of fermented whey, 94
Fermented sausages
Prevalence of foodborne pathogens at meat factories, 812
Fermented suuc
Survival of H. pylori in Turkish suuc, 2055
Filtration
Rapid detection method for HAV, 1756
Financial impact
Financial impact of a milk-dioxin incident, 967
Fish
Total and inorganic arsenic in marine animals, 450
Vibrio spp. in fish and shellfish, 1345
Vitamin A fish poisoning, 1581
Fishery products
Risk-based monitoring for histamine, 302
Fish samples
TVC assay of raw fish samples, 776
flu short variable region sequencing
C. jejuni and C. coli in Hungary, 905
Fluorescence-based screening assay
TVC assay of raw fish samples, 776
Fluorquinolone
Nalidixic acid–resistant Salmonella Typhimurium, 610
Food allergen
LC-MS in food allergen detection, 316
Foodborne
Foodborne disease caused by Cryptosporidium and Giardia, 1944
Foodborne hazards associated with catfish consumption, 500
Salmonellosis attribution from New Zealand outbreak data, 438
Vaccination of cows and calves with E. coli O157 SRP extract, 1599
Foodborne botulism
Home-canned vegetables and botulism outbreaks, 2090
Foodborne disease
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592
A novel detection method for four violative vector species, 1883
Effect of washing on reducing human NoVs on vegetables, 1908
Foodborne illness
Beef grinding practices, 1022
Foodborne illness surveillance by local health departments, 432
Listeriosis associated with Mexican-style cheese, 949
Foodborne pathogen(s)
Influence of NaCl and NaNO3 on bacterial sinigrin hydrolysis, 2162
Microbiological safety of imported seafood, 1451
Microbial quality of foods in elementary schools, 1564
Omnich heating treatment on foodborne pathogens in juices, 899
Prevalence of foodborne pathogens in grilled chicken, 1320
Foodborne pathogenic bacteria
Bacterial flora of cabbage during growing, 645
Food chain
MRSA in a pork production chain, 126
Food contact surface
- Rapid ATP assessment of hygienic status of food contact surfaces, 686

Food deserts
- Retail food safety risks in food deserts, 1717

Food hygiene
- Predicting hygienic food handling behaviors, 925

Food irradiation
- Consumer burger preparation, 1708
- Detection of irradiated dry-cured ham using RPLC-GC-MS, 960
- Irradiation of calicivirus on lettuce, 1500

Food isolates
- Evaluation of the potential pathogenicity of food enterococci, 465

Food pathogens
- Enrichment media specificity revealed by microarray analysis, 1030

Food poisoning
- Characterization of S. aureus from different origins, 1852
- Identification of toxicity and fish species in fish poisoning, 789
- Risk-based monitoring for histamine, 302

Food recalls
- Effectiveness of food recalls in NYC retailers, 111

Food safety
- Consumer food safety perceptions and practices, 1922
- Control of listeriae on pork scrapple, 394
- Factors associated with working while ill, 215
- Fate of E. coli in nonintact beef, 1054

- Heavy metals and PCBs in salted anchovies, 796
- Inhibiting bacterial propagation in raw milk, 1475
- Molecular stress response in E. coli, 849
- Ohmic heating treatment on foodborne pathogens in juices, 899
- Poststorage irradiation in tomatoes, 990
- Rapid ATP assessment of hygienic status of food contact surfaces, 686
- Survival of E. coli O157 and risk reduction, 2000

Food safety assessment
- Enrichment media specificity revealed by microarray analysis, 1030

Food safety objective
- PFSO approach for commercially sterile foods, 1956

Food service
- Designing a national restaurant inspection disclosure tool, 1869
- Microbial quality of foods in elementary schools, 1564
- Food workers
  - Factors associated with working while ill, 215
  - Free chlorine
    - Pathogen cross-contamination during produce wash, 352
  - Free-range pigs
    - Selected POPs bioaccumulation in outdoor-farmed pigs, 261
  - Freezing
    - Physical factors in the viability of G. bineulatum, 844
  - Fresh cabbage
    - E-beam processing of fresh-cut cabbage, 115
  - Fresh cut
    - Pathogen cross-contamination during produce wash, 352
  - Fresh-cut onions
    - Antimicrobial effect of commercial fermentation product, 470
  - Fresh fish
    - Microbial ecology of Tunisian fresh fish, 1762
    - Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468
- Salmonella and E. coli O157:H7 concentration from water, 1934
- Fresh-squeezed orange juice
- Decontamination of fresh orange juice, 1238
- Frozen
  - Irradiation of frozen seafood, 641
- Fruit juice
  - Recovery of Alicyclobacillus from fruit juice, 1370
- Fruit products
  - Norovirus screening of fruit products, 425
- Fumigation
  - Salmonella control, 665
- Fumonisins
  - Fumonisin B1-producing A. niger in California raisins, 672
  - Survey of fumonisins B1 and B2 in corn, 1374
- Functional coatings
  - Functional coatings and brewery surface microorganisms, 1891
- Fungal contamination
  - Quantitative analysis of mycoflora on commercial fruits in Japan, 1488
- Fusarium
  - Inhibition of Fusarium by oat compounds, 2188
  - Ozone treatment of malting barley, 2134
- Fusarium mycotoxins
  - Fusarium mycotoxins in rice and by-products, 1169

Gallic acid
- Gallium maltolate
  - Gallium maltolate treatment of cattle, 524
- Gaminara
  - Salmonella and E. coli in chili peppers, 874
- Gamma
  - Irradiation of frozen seafood, 641
  - Radiation inactivation of Y. pestis in bologna, 627
- Gamma irradiation
  - Bacterial radiosensitization in broccoli, 1065
  - Salmonella Enteritidis in irradiated eggs, 2031
- Gamma radiation
  - Gamma radiation and nisin against Listeria on meat, 193
- Gaseous contact
  - Evaluation of antifungal activity by gaseous contact, 2192
- Gene expression
  - Gene expression of L. monocytogenes on RTE food, 1104
- Genetic diversity
  - E. coli O157:H7 genetic diversity in bovine fecal samples, 1186
- Geographic information systems
  - GIS mapping to track retail foods safety risks, 1524
- Germinant
  - Mild heat germination and inactivation of B. cereus spores, 2079
- Giardia
  - Foodborne disease caused by Cryptosporidium and Giardia, 1944
- Giblets
  - Campylobacter in poultry products in Poland, 986
- Glycoside
  - Hydrocyanic acid in cassava chips, 980
- Gnathostoma
  - Physical factors in the viability of G. bineulatum, 844
- Goat
  - Prevalence of Listeria spp. and L. monocytogenes in farm dairies, 919
- Good hygienic practices
  - Food handling and quality in long-term care facilities, 1504
- Grading
  - Designing a national restaurant inspection disclosure tool, 1869
- Grain-fedveal
  - AMR in Campylobacter, Salmonella, and E. coli from retail grain-fedveal, 1245
- Gram-negative bacteria
  - Microbial ecology of Tunisian fresh fish, 1762
- Grapes
  - Fumonisin B1-producing A. niger in California raisins, 672
- Green fluorescent protein
  - Time course of maternal and fetal invasion by L. monocytogenes, 248
- Green onions
  - Ozone inactivation of norovirus surrogates, 836
- Grilled chicken
  - Prevalence of foodborne pathogens in grilled chicken, 1320
- Ground beef
  - Beef grinding practices, 1022
  - EHEC virulence gene expression in ground beef, 1434
  - Growth probability of E. coli O157:H7 in ground beef, 622
- Multiplex PCR detection of Shiga toxin-producing E. coli, 228
- Ground chicken
  - Salmonella growth kinetics in ground chicken, 735
Group II strains
Growth of group II *C. botulinum*, 1797

Growth
Growth of *Salmonella* on chicken as affected by inoculum size, 1630
Predictive microbiology model for *Salmonella* on chicken, 279

Growth boundaries
Essential oil effect on growth boundaries of *Listeria* and *Salmonella*, 45

Growth characteristic
Growth of *B. cereus* in wet noodles, 658

Growth limits
Growth limits of *L. monocytogenes* in a cheese matrix, 1805

Growth prediction
*Salmonella* growth kinetics in ground chicken, 735

Growth rate
Growth of group II *C. botulinum*, 1797

Growth temperature
Growth of group II *C. botulinum*, 1797
High-pressure inactivation of *V. parahaemolyticus*, 751

Gulf of Thailand
Total and inorganic arsenic in marine animals, 450

Ham
*M. avium* detection in meat products, 636

Heat washing
Consumer burger preparation, 1708
Meta-analysis of antimicrobial soaps, 1875

Heat
*Anisakis* heated under controlled conditions, 2119

Heat inactivation
Antibiotics in milk, 311

Thermal inactivation of AI and NDV in fat-free egg product, 1161

Heat resistance
Heat resistance of spores of a psychrotolerant *B. cereus* isolate, 1662
Thermal resistance of *E. coli* in apple juice, 1231

Heat-treated sucuk
Survival of *H. pylori* in Turkish sucuk, 2055

Heavy metals
Heavy metals and PCBs in salted anchovies, 796

*Helicobacter pylori*
Survival of *H. pylori* in Turkish sucuk, 2055

Hepatitis A virus
Effects of an oxidative agent and lectins on HAV binding, 157

Rapid detection method for HAV, 1756

Herbs
Effect of antimicrobial spice and herb extracts on RTE shrimp, 1119

Hexane extracts
Inhibition of *Fusarium* by oat compounds, 2188

Hibiscus concentrate
Antimicrobial formulations against *S. enterica* on organic leafy greens, 1676

Hierarchical classification
*L. monocytogenes* in turkey flocks, 1096

High fat foods
Detection of irradiated dry-cured ham using RPLC-GC-MS, 960

High hydrostatic pressure
High hydrostatic pressure of MNV-1 in contaminated oysters, 209

High-pressure inactivation of *V. parahaemolyticus*, 751

High pressure homogenization
Comparison of foodborne viral reduction by a nonthermal pressure process, 1840

High-performance liquid chromatography
Determination of PAHs in honey, 1692

High-throughput screening
Small molecule screening for compounds that inhibit *E. coli* O157:H7, 2148

Histamine
Risk-based monitoring for histamine, 302

Home canned vegetables
Home-canned vegetables and botulism outbreaks, 2090

Home-style dehydrators
*Salmonella* reduction on whole-muscle chicken, 1079

Honey
Determination of PAHs in honey, 1692

Hot peppers
Aflatoxins and mold growth in hot peppers during storage, 830

Housefly
Transmission of *Salmonella* by housefly, 1012

Human norovirus
Human norovirus binding to lettuce and raspberries, 1364

Hybridization
EHEC hybridization array system, 365

Hydrocyanic acid
Hydrocyanic acid in cassava chips, 980

Hydroponics
Comparison of pathogen contamination route of leafy greens, 1536

Hydroxy fatty acids
Inhibition of *Fusarium* by oat compounds, 2188

Hydrophilic acid

*Hysterobylacium*
Anisakidae in teleosts and cephalopods in Sardinia, 1769

Identification
EHEC hybridization array system, 365

III worker
Factors associated with working while ill, 215

Immunocytology
Internalization of *E. coli* O147:H7 in mung bean, 1224

Immunoseparation
Multiplex immunoassay for detection of foodborne pathogens, 2039

Immunosuppressed
High hydrostatic pressure of MNV-1 in contaminated oysters, 209

Imported seafood
Microbiological safety of imported seafood, 1451

Inactivation
Inactivation of *C. sakazakii* biofilm by trans-cinnamaldehyde, 200
Virolysis of feline calicivirus and human GII.4 norovirus, 2113
Yeast inactivation by combined treatments, 1751

Inactive yeast
Patulin reduction in apple juice, 149

Index organisms
Indicator organisms, 1387

Indicator
Indicator organisms, 1387

Comparative pathogen contamination route of leafy greens, 1536

Industrial feeds
Real-time PCR detection of ruminant material in feed, 1300

Infant formula
Isolation of *Cronobacter*, 387

Infant milk formula
Bioluminescent imaging of *C. sakazakii*, 573

Infection
Propagules of *S. mays* in maize, 676

Infectious diseases
Effectiveness of food recalls in NYC retailers, 111

Inhibition
Probiotic bacteria in whey cheese, 1194
Recovery of *Alicyclobacillus* from fruit juice, 1370

Inoculum size
Antimicrobial activity of egg white, 24
Growth of *Salmonella* on chicken as affected by inoculum size, 1630

Inorganic arsenic
Total and inorganic arsenic in marine animals, 450

Integrated cell culture/real-time reverse transcription PCR

Rapid detection method for HAV, 1756

Intensive sampling
Acceptance sampling plans for *E. coli* O157, 539

Intention-behavior gap
Predicting hygiene food handling behaviors, 925

Downloaded from http://meridian.allenpress.com/jfp/article-pdf/74/12/2199/1684810/0362-028x_74_12_2199.pdf by guest on 26 June 2020
Internalization
Internalization of E. coli O147:H7 in mung bean, 1224
Internal transcribed spacer
PCR detection of Alternaria DNA in foodstuffs, 240
Intervention strategies
Orange peel products reduce E. coli O157:H7 in ruminants, 1917
Intestinal inflammation
Yoghurt feeding and recurrence of IBD, 801
Intestinal microbiota
Yoghurt feeding and recurrence of IBD, 801
Intra- and interspecies genetic variation
A novel detection method for four violative vector species, 1883
Ionizing
Irradiation of frozen seafood, 641
Ionophore
Fecal prevalence of E. coli O157:H7 in beef steers, 912
Ireland
Campylobacter and Salmonella in retail chicken in Ireland, 1912
Iron
Gallium maltolate treatment of cattle, 524
Irradiation
Control of E. coli O157:H7 in beef, 2018
Control of Salmonella in chicken, 1833
E-beam inactivation of norovirus in food, 1155
Poststorage irradiation in tomatoes, 990
Irrigation water
Irrigation water and persistence of E. coli O157:H7 on spinach, 709
IS629
Emergence of O157 strains in clade 8, 1324
Isoelectric solubilization
Listeria after protein recovery process, 1348
Isolation
Isolation methods for C. difficile, 130
Isolation of Cronobacter, 387
Isotherm model
Myctotoxin adsorption by yeast products, 1175
Istanbul
Norovirus contamination of ready-to-eat food items in Istanbul, 840
Jalapeño
Salmonella and E. coli in chili peppers, 874
Japan
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592
Jerky
Packaging–storage control L. monocytogenes in jerky and sausage, 188
Juice extractor
Decontamination of fresh orange juice, 1238
Jujube fruit
Effects of oligochitosan on jujube fruit postharvest rot, 783
Kimchi
Antifungal δ-dodecalactone from LAB, 651
Kinetics
High hydrostatic pressure inactivation of foodborne microorganisms, 2097
Klebsiella spp.
Virulence and ESBL of Klebsiella in meat sources, 559
Korea
Lipophilic shellfish toxins along the south coast of Korea, 2127
Nalidixic acid–resistant Salmonella Typhimurium, 610
Korean standard
Lipophilic shellfish toxins along the south coast of Korea, 2127
Lactate
Control of listeriae on pork scrapple, 394
Growth probability of E. coli O157:H7 in ground beef, 622
Lactic acid
Inhibitory activity of fermented whey, 94
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468
Lactic acid bacteria
Bactometer system for monitoring bacterial populations in salchichón, 145
Characterization of dairy and human lactic acid bacteria, 1379
Influence of NaCl and NaNO3 on bacterial sinigrin hydrolysis, 2162
Lactic acid bacteria exhibit autoinducer-2-like activity, 631
L. monocytogenes surrogate for UHP and PEF, 1655
Microbial ecology of Tunisian fresh fish, 1762
Proteolytic activity of LAB and fungal biota in dry-cured ham, 826
Lactobacillus
Phages as control agents of beer spoilage, 2157
Preselection of Lactobacillus isolates by C. elegans, 86
Lactobacillus gasseri
L. gasseri aggregation and adhesion to specific pathogens, 1482
Lactobacillus plantarum
Antifungal δ-dodecalactone from LAB, 651
Lactoperoxidase activity
Effect of saccharides on lactoperoxidase system, 134
Lactose intolerance
Raw milk systematic review and meta-analysis, 1814
Lactuca sativa
Survival of E. coli O157 and risk reduction, 2000
Lag time
L. monocytogenes response to pH and aω shifts, 78
Leaf surface
Comparison of pathogen contamination route of leafy greens, 1536
Leafy greens
Pathogen cross-contamination during produce wash, 352
Risk assessment for E. coli in leafy greens, 700
Lectin
Effects of an oxidative agent and lectins on HAV binding, 157
Lethality
Additional cooking procedures to achieve lethality performance standards, 1741
Lettuce
Irradiation of calicivirus on lettuce, 1500
Microbiological survey of lettuce in Japan, 1543
Ozone inactivation of norovirus surrogates, 836
Rapid detection method for HAV, 1756
Susceptibility of Salmonella spp. to bacteriocins of B. thuringiensis, 274
Virulence of E. coli O157:H7 on fresh-cut lettuce, 718
Levulinic acid
Control of listeriae on pork scrapple, 394
Levulinic acid
Control of Salmonella in poultry, 2024
Ligand-like molecules
Human norovirus binding to lettuce and raspberries, 1364
Limit of detection
Detectability of L. monocytogenes, 1282
Lincomycin
Antibiotics in milk, 311
Linezolid
C. difficile in cattle at harvest in the United States, 1618
Lipophilic shellfish toxin
Lipophilic shellfish toxins along the south coast of Korea, 2127
Liquid chromatography
LC-MS in food allergen detection, 316
Liquid chromatography–tandem mass spectrometry
Identification of toxicity and fish species in fish poisoning, 789
Lipophilic shellfish toxins along the south coast of Korea, 2127
Liquid egg product
Thermal inactivation of AI and NDV in fat-free egg product, 1161
Listeria
Chiller heating for Listeria control, 999
Listeria after protein recovery process, 1348
Prevalence and resistance of L. monocytogenes in chicken, 1017
Listeria innocua
Detectability of L. monocytogenes, 1282
Predictive model for L. innocua inactivation in poultry products, 1261
Listeria monocytogenes
Behavior of microorganisms in pulque, 580
Comparison of pathogen contamination route of leafy greens, 1536
Control of listeria on pork scrapple, 394
Cross-responses in BAC-adapted L. monocytogenes, 1112
Decontamination of orange surfaces, 1684
Detectability of L. monocytogenes, 1282
Detection of L. monocytogenes, 1930
Effect of antimicrobials on L. monocytogenes, 994
Enrichment media specificity revealed by microarray analysis, 1030
Essential oil effect on growth boundaries of Listeria and Salmonella, 45
Food safety objectives for L. monocytogenes in restaurants, 1569
Gamma radiation and nisin against Listeria on meat, 193
Gene expression of L. monocytogenes on RTE food, 1104
Growth and survival of pathogens in beer, 1670
Growth limits of L. monocytogenes in a cheese matrix, 1805
Growth of L. monocytogenes in minced tuna, 176
Listeria survival in response to heat and aroma compounds, 2070
Listeriosis associated with Mexican-style cheese, 949
L. monocytogenes in cheese plants, 816
L. monocytogenes inhibition by combined antimicrobials, 122
L. monocytogenes in retail establishments, 1083
L. monocytogenes in turkey flocks, 1096
L. monocytogenes response to pH and Δm shifts, 78
L. monocytogenes serotyping, 403
L. monocytogenes surrogate for UHP and PEF, 1655
Microbiological survey of lettuce in Japan, 1543
Molecular ecology of Listeria in small RTE processing plants, 63
Packaging–storage control L. monocytogenes in jerky and sausage, 188
Prevalence of foodborne pathogens at meat factories, 812
Prevalence of Listeria spp. and L. monocytogenes in farm dairies, 919
Risk assessment of listeriosis, 1268
Time course of maternal and fetal invasion by L. monocytogenes, 248
Zoonotic bacteria in bulk tank milk and filters from U.S. dairies, 759
Listeria spp.
Molecular ecology of Listeria in small RTE processing plants, 63
Listeriosis
L. monocytogenes contamination of deli meats at retail, 1860
Time course of maternal and fetal invasion by L. monocytogenes, 248
Local health departments
Foodborne illness surveillance by local health departments, 432
Logistic model
Salmonella growth kinetics in ground chicken, 735
Long-term care facilities
Food handling and quality in long-term care facilities, 1504
Loop-mediated isothermal amplification (LAMP)
Rapid and sensitive detection of V. parahaemolyticus by LAMP, 1462
Salmonella Typhimurium detection from pork processing environments, 294
Low socioeconomic status
Retail food safety risks in food deserts, 1717
Luminex
Shiga toxins and E. coli O157, 373
Macrolides
Antibiotics in milk, 311
Magnetic nanobeads
Multiplex immunoassay for detection of foodborne pathogens, 2039
Mating
Ozone treatment of malting barley, 2134
Manitol–egg yolk–polymyxin agar
Enumeration of B. cereus spores in milk, 461
Manure
Relationship between virulence genes and E. coli, 18
Marker peptides
LC-MS in food allergen detection, 316
Mass spectrometry
LC-MS in food allergen detection, 316
Mastitis milk
Characterization of S. aureus from different origins, 1852
Mathematical modeling
Modeling inactivation of Salmonella in liquid egg, 882
Matrix-assisted laser desorption and ionization–time-of-flight mass spectrometry
Comparative study of Cronobacter identification technologies, 2182
MBC
Inhibition of Cronobacter by vanilla compounds, 2062
Meat
Antimicrobial effect of ammonium hydroxide, 475
Antimicrobial-resistant S. aureus in retail meats, 1625
Gamma radiation and nisin against Listeria on meat, 193
Lactic acid bacteria exhibit autoinducer-2–like activity, 631
Microbiological hygiene of meat in Burkina Faso, 1547
M. paratuberculosis in food, 480
Virulence and ESBL of Klebsiella in meat sources, 559
Meat factories
Prevalence of foodborne pathogens at meat factories, 812
Meat products
M. avium detection in meat products, 636
Melt processing
Incorporation of nisin in EVA films by melt processing, 1137
Membrane filter
Efficacy of sequential application of decontamination agents, 743
Meta-analysis
Meta-analysis of antimicrobial soaps, 1875
Metals
Metals in farmed fish from Tenerife Island, 1938
Methicillin
MRSA in a pork production chain, 126
Methicillin-resistant S. aureus (MRSA)
Antimicrobial-resistant S. aureus in retail meats, 1625
Method validation
Evaluation of a Poisson-based approach for validation of qPCR, 1404
Mexican oregano
Evaluation of antifungal activity by gaseous contact, 2192
Mexican-style cheese
Listeriosis associated with Mexican-style cheese, 949
MIC
Inhibition of Cronobacter by vanilla compounds, 2062
Micelles
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55
Microarray
Gene expression of L. monocytogenes on RTE food, 1104
Microbead
Shiga toxins and E. coli O157, 373
Microbial analysis
Antimicrobial effect of ammonium hydroxide, 475
Microbial attachment
Functional coatings and brewery surface microorganisms, 1891
Microbial competition
Salmonella growth kinetics in ground chicken, 735
Microbial diagnostic microarray
Incorporation of nisin in EVA films by melt processing, 1137
Metals in farmed fish from Tenerife Island, 1938
Meta-analysis
Evaluation of sequential application of decontamination agents, 743
Microbiological hygiene of meat in Burkina Faso, 1547
Microbial loads
Ozone treatment of malting barley, 2134
Microbial quality
Antimicrobial effect of commercial fermentation product, 470
Microbial reduction
Pork decontamination by acid spray-steam condensation, 1338
Microbial safety
TVCA assay of raw fish samples, 776
Microbiological quality
Decontamination of fresh orange juice, 1238
Food handling and quality in long-term care facilities, 1504
Microbial ecology of Tunisian fresh fish, 1762
Microbial quality of foods in elementary schools, 1564
Microclimate
Transport of cattle and E. coli O157, 1605
Microsporidia
Levulinic acid against parasites, 140
Microwave
Anisakis heated under controlled conditions, 2119

Milk
Antibiotics in milk, 311
Enumeration of B. cereus spores in milk, 461
Modified rapid chemiluminescent phosphatase detection method, 1144
M. paratuberculosis in food, 480
Occurrence of M. avium subsp. paratuberculosis in raw milk, 1126

Milk-fed veal
Antimicrobial resistance in E. coli isolated from milk-fed veal, 1328

Milling
Effect of milling on T-2 and HT-2 toxins, 1700

Minced beef
Multiplex PCR for E. coli O26, 13

Minority racial/ethnic populations
Retail food safety risks in food deserts, 1717

Model
Predictive microbiology model for Salmonella on chicken, 279

Modeling
Costs and burden of STEC O157 in The Netherlands, 545
Growth of L. monocytogenes in minced tuna, 176
Meta-analysis of antimicrobial soaps, 1875
Occurrence of M. avium subsp. paratuberculosis in raw milk, 1126

Risk assessment for E. coli in leafy greens, 700

Models of health behavior
Predicting hygienic food handling behaviors, 925

Modified atmosphere packaging
Control of Salmonella in chicken, 1833

Cross-responses in BAC-adapted L. monocytogenes, 1112

Virulence of E. coli O157:H7 on fresh-cut lettuce, 718

Modified Moore swab
Salmonella and E. coli O157:H7 concentration from water, 1934

Moisture enhanced
Thermal inactivation of stress-adapted E. coli O157:H7 in beef, 531

Molecular pathogen detection
Evaluation of a Poisson-based approach for validation of qPCR, 1404

Molecular subtyping
Molecular ecology of Listeria in small RTE processing plants, 63

Mollusks
Total and inorganic arsenic in marine animals, 450

Monitoring
Campylobacter in poultry products in Poland, 986

Monitoring plan
Risk-based monitoring for histamine, 302

Montevideo
Salmonella and E. coli in chili peppers, 874

Most probable number
Acceptance sampling plans for E. coli O157, 539

Enumeration of B. cereus spores in milk, 461

Mouse
High hydrostatic pressure of MNV-1 in contaminated oysters, 209

MS2 bacteriophage
Comparison of foodborne viral reduction by a nonthermal pressure process, 1840

Multidrug-resistant (MDR) Salmonella
Outbreak of multidrug-resistant Salmonella Newport infections, 1315
Transmission of Salmonella by houseflies, 1012

Multilocus sequence typing (MLST)
Antimicrobial-resistant Campylobacter from retail meats, 616
Characterization of a probiotic B. cereus strain, 1189

Multiple correspondence analysis
Occurrence of M. paratuberculosis in bulk tank milk and filters from U.S. dairies, 759

Multivariate analysis of antimicrobial soaps, 1875

Mycobacterium avium
M. avium detection in meat products, 636
Mycobacterium avium subsp. paratuberculosis
M. paratuberculosis in food, 480

Occurrence of M. avium subsp. paratuberculosis in raw milk, 1126

Mycospora
Quantitative analysis of mycflora on commercial fruits in Japan, 1488

Mycotoxin
Mycotoxin adsorption by yeast products, 1175

Nalidixic acid
Nalidixic acid-resistant Salmonella Typhimurium, 610
National Animal Health Monitoring System (NAHMS)
Zoonotic bacteria in bulk tank milk and filters from U.S. dairies, 759

Natural
Survival of C. perfringens in naturally cured meats, 410

Natural antimicrobial
Influence of NaCl and NaNO3 on bacterial sinigrin hydrolysis, 2162
Natural flora
Growth of L. monocytogenes in minced tuna, 176
Natural ingredients

Naturally cured processed meats inoculated with C. perfringens, 417
Natural occurrence
Fusarium mycotoxins in rice and by-products, 1169
Natural preservatives
Antimicrobial effect of commercial fermentation product, 470
Neutralizing agents
Toxicity and efficacy of selected neutralizing agents, 820

Neural network
Predictive microbiology model for Salmonella on chicken, 279

Newcastle disease virus
Thermal inactivation of AI and NDV in fat-free egg product, 1161

New sanitizer
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468

Nigeria
Occurrence of Arcobacter in feces of Nigerian chicken, 119

Nisin
Cross-responses in BAC-adapted L. monocytogenes, 1112
Effect of antimicrobials on L. monocytogenes, 994

Gamma radiation and nisin against Listeria on meat, 193

Incorporation of nisin in EVA films by melt processing, 1137

Nitrile
Naturally cured processed meats inoculated with C. perfringens, 417
Survival of C. perfringens in naturally cured meats, 410

Nitrite
Survival of C. perfringens in naturally cured meats, 410

Nonheated foods
Microbial quality of foods in elementary schools, 1564

Nonintact
E. coli O157:H7 translocation and decontamination, 1048
Translocation of E. coli into beef striploins, 1334

Nonintact beef
Fate of E. coli in nonintact beef, 1054
Thermal inactivation of stress-adapted E. coli O157:H7 in beef, 531

Nonionic
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55

O157:H7 concentration from water, 1934
Salmonella O157:H7 translocation and decontamination, 1048
O157, 539
into beef striploins, 1334
Nonleachable
Antibacterial activity of reactive quaternary ammonium compounds, 2107
Non-O157 Shiga toxin–producing Escherichia coli (STEC)
Non-O157 STEC in beef abattoirs of Argentina, 2008
Non-O157:H7 verocytotoxigenic E. coli (STEC)
Fate of E. coli in nonintact beef, 1054
Nonproteolytic bacteria
Growth of group II C. botulinum, 1797
Nonsequenced genomic DNA
Detection of Alcaligenes spp. using DNA chip, 933
Nonthermal processing
E-beam processing of fresh-cut cabbage, 115
Poststorage irradiation in tomatoes, 990
Nontoxicigen
C. difficile in cattle at harvest in the United States, 1618
Norovirus (NoV)
E-beam inactivation of norovirus in food, 1155
Effect of washing on reducing human NoVs on vegetables, 1908
Four-week norovirus stability, 1847
High hydrostatic pressure of MNV-1 in contaminated oysters, 209
Irradiation of calicivirus on lettuce, 1500
Norovirus contamination of ready-to-eat food items in Istanbul, 840
Virosil of feline calicivirus and human GII.4 norovirus, 2113
Norovirus presence
Norovirus screening of fruit products, 425
Norovirus (NoV) transmission
Effect of washing on reducing human NoVs on vegetables, 1908
Northern Greece
Prevalence and resistance of L. monocytogenes in chicken, 1017
Nut(s)
Behavior of Salmonella on pecans, 588
Inactivation of Salmonella on pecans, 1441
Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603
O-antigen
Multiplex PCR detection of Shiga toxin–producing E. coli, 228
Oats
Inhibition of Fusarium by oat compounds, 2188
Occurrence
L. monocytogenes in cheese plants, 816
Survey of fumonisins B1 and B2 in corn, 1374
Octanoic acid
L. monocytogenes inhibition by combined antimicrobials, 122
odc gene
Characterization of ornithine decarboxylase from O. oeni, 1309
Oenococcus oeni
Characterization of ornithine decarboxylase from O. oeni, 1309
Official control
Food safety objectives for L. monocytogenes in restaurants, 1569
Ohmic heating
Ohmic heating treatment on foodborne pathogens in juices, 899
Oligochitosan
Effects of oligochitosan on jujube fruit postharvest rot, 783
Olive extract
Antimicrobial formulations against S. enterica on organic leafy greens, 1676
Olive packing
ZnCl2 as a preservative in table olives, 2169
On-line coupled reversed-phase liquid chromatography and mass spectrometry
Detection of irradiated dry-cured ham using RPLC-GC-MS, 960
Oral exposure
Time course of maternal and fetal invasion by L. monocytogenes, 248
Orange juice
Ohmic heating treatment on foodborne pathogens in juices, 899
Oranges
Decontamination of orange surfaces, 1684
Organic
Survival of C. perfringens in naturally cured meats, 410
Organic acid(s)
Listeria after protein recovery process, 1348
Toxicity and efficacy of selected neutralizing agents, 820
Organic leafy greens
Antimicrobial formulations against S. enterica on organic leafy greens, 1676
Ornithine decarboxylase
Characterization of ornithine decarboxylase from O. oeni, 1309
Osmotic
L. monocytogenes response to pH and aw shifts, 78
Outbreak(s)
Foodborne hazards associated with catfish consumption, 500
Foodborne illness surveillance by local health departments, 432
Hemorrhagic diarrhea caused by C. sakazakii, 2177
Outbreak of multidrug-resistant Salmonella Newport infections, 1315
Salmonella screening tool for complaint-based surveillance, 106
Salmonellosis attribution from New Zealand outbreak data, 438
Outbreak investigation
Outbreak of Salmonella serotypes Newport and Reading, 1035
Overgrowth
Detectability of L. monocytogenes, 1282
Oxygen respirometry
TVC assay of raw fish samples, 776
Oyster(s)
Effects of an oxidative agent and lectins on HAV binding, 157
High hydrostatic pressure of MNV-1 in contaminated oysters, 209
High-pressure inactivation of V. parahaemolyticus, 751
Salmonella from oysters served raw in restaurants, 1025
Ozone
Ozone inactivation of norovirus surrogates, 836
Ozone treatment of malting barley, 2134
Packaging
Aflatoxins and mold growth in hot peppers during storage, 830
Control of E. coli O157:H7 in beef, 2018
Packaging—storage control L. monocytogenes in jerky and sausage, 188
Packaging materials
UV decontamination of chicken, packaging, and contact surfaces, 565
Pasteurization
Modeling inactivation of Salmonella in liquid egg, 882
Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603
Raw milk systematic review and meta-analysis, 1814
Pathogen(s)
Control of listeriae on pork scrapple, 394
Fate of E. coli in nonintact beef, 1054
Probiotic bacteria in whey cheese, 1194
Relationship between virulence genes and E. coli, 18
Pathogen detection
Multiplex real-time PCR assay for Vibrio pathogen detection, 939
Pathogen enrichment media
Enrichment media specificity revealed by microarray analysis, 1030
Pathogenic bacteria
Bacterial radiosensitization in broccoli, 1065
Patulin
Biodegradation of patulin by yeasts, 154
Patulin reduction in apple juice, 149
PCR
A novel detection method for four violative vector species, 1883
Characterization of S. aureus in Urfa cheese, 1788
EHEC hybridization array system, 365
Identification of toxicity and fish species in fish poisoning, 789
Modified enrichment for Campylobacter, 221
Multiplex PCR detection of Shiga toxin–producing E. coli, 228
PCR detection of Alternaria DNA in foodstuffs, 240
Rapid and sensitive detection of V. parahaemolyticus by LAMP, 1462
Salmonella Typhimurium detection from pork processing environments, 294
PCR ribotype 078
C. difficile in cattle at harvest in the United States, 1618
Subject Index

Pecan
Behavior of Salmonella on pecans, 588
Inactivation of Salmonella on pecans, 1441

Pediococcus
Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603

Penicillium
Proteolytic activity of LAB and fungal biota in dry-cured ham, 826
Quantitative analysis of mycoflora on commercial fruits in Japan, 1488

Performance standards
Additional cooking procedures to achieve lethality performance standards, 1741
Alternative procedures to achieve stabilization performance standards, 101

Peroxycetic acid
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468

Persistence
Four-week norovirus stability, 1847
Irrigation water and persistence of E. coli O157:H7 on spinach, 709
Persistant organic pollutants (POPs)
Selected POPs bioaccumulation in outdoor-farmed pigs, 261

pH
Antimicrobial activity of egg white, 24
Antimicrobial effect of ammonium hydroxide, 475
Effect of polyphosphate additives on pH, 1735

Growth limits of L. monocytogenes in a cheese matrix, 1805

Heat resistance of spores of a psychrotolerant B. cereus isolate, 1662

Comparison of foodborne viral reduction by a nonthermal pressure process, 1840

Phosphate
Growth probability of E. coli O157:H7 in ground beef, 622

Phytopathogenic bacteria
Bacterial flora of cabbage during growing, 645

Pillared clays
ZEN removal by montmorillonite K10 and pillared montmorillonite K10, 954

Plague
Radiation inactivation of Y. pestis in bologna, 627

Plant-derived antimicrobial compound
trans-Cinnamaldehyde fails to combat Campylobacter in chicks, 1729

Plasmid
Antimicrobial-resistant enterococci in poultry, 1639

Poison distribution
Evaluation of a Poisson-based approach for validation of qPCR, 1404

Poland
Campylobacter in poultry products in Poland, 986
Polychlorinated biphenyls (PCBs)
Heavy metals and PCBs in salted anchovies, 796
Polycyclic aromatic hydrocarbons
Determination of PAHs in honey, 1692
Polyester cloth
EHEC hybridization array system, 365
Polyphosphates
Effect of polyphosphate additives on pH, 1735
Population-based telephone survey
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592

Pork
Additional cooking procedures to achieve lethality performance standards, 1741
Alternative procedures to achieve stabilization performance standards, 101
Characcterization of S. aureus from different origins, 1852
Inactivation of pork pathogens by steam-ultrasound treatment, 769
MRSA in a pork production chain, 126
Pork decontamination by acid spray-steam condensation, 1338
Salmonella Typhimurium detection from pork processing environments, 294
Pork myosin
Proteolytic activity of LAB and fungal biota in dry-cured ham, 826

Pork sausage
Risk assessment for salmonellosis, 553
Pork scrapple
Control of listeriae on pork scrapple, 394
Positive PCR results

Norovirus screening of fruit products, 425
Postharvest processing
High salinity relay to reduce V. vulnificus in oysters, 1902
Postharvest quality
Effects of oligochitosan on jujube fruit postharvest rot, 783
Postpackage pasteurization
Predictive model for L. innocua inactivation in poultry products, 1261
Potassium sorbate
ZnCl2 as a preservative in table olives, 2169
Potential source of contamination
Bacterial flora of cabbage during growing, 645

Poultry
Antimicrobial-resistant enterococci in poultry, 1639
Effect of breeder vaccination on Salmonella in broilers, 727
Effect of polyphosphate additives on pH, 1735
Microbiological quality of WIC and AC broilers, 1531
Occurrence of Arcobacter in feces of Nigerian chicken, 119

UV decontamination of chicken, packaging, and contact surfaces, 565

Poultry cages
Control of Salmonella in poultry, 2024

Poultry carcasses
Prevalence and resistance of L. monocytogenes in chicken, 1017

Poultry products
Predictive model for L. innocua inactivation in poultry products, 1261

Poultry samples
Automated MPN comparison, 1558

Powdered infant formula
Hemorrhagic diarrhea caused by C. sakazakii, 2177

Precipitation
Listeria after protein recovery process, 1348

Prediction
Growth of L. monocytogenes in minced tuna, 176

Predictive microbiology
Predictive microbiology model for Salmonella on chicken, 279

Prevalence
Growth of B. cereus in wet noodles, 658
Growth of Salmonella on chicken as affected by inoculum size, 1630
Predictive model for L. innocua inactivation in poultry products, 1261
Salmonella screening tool for complaint-based surveillance, 106

Pregnancy
Listeriais associated with Mexican-style cheese, 949
Pregnant guinea pig
Time course of maternal and fetal invasion by L. monocytogenes, 248

Preharvest
E. coli risk for beef carcasses, 1422
Preservative
ZnCl2 as a preservative in table olives, 2169
Pressure inactivation
High hydrostatic pressure inactivation of foodborne microorganisms, 2097

Pressure resistance
High-pressure inactivation of V. parahaemolyticus, 751

Prevalence
L. monocytogenes in retail establishments, 1083
L. monocytogenes in turkey flocks, 1096
Microbiological safety of imported seafood, 1451
Microbiological survey of lettuce in Japan, 1543
Porcine salmonellosis in Spain, 1070
Prevalence and molecular characterization of E. coli O157:H7 in sheep, 1413

Prevalence and resistance of L. monocytogenes in chicken, 1017
Prevalence of foodborne pathogens at meat factories, 812
Prevalence of Listeria and L. monocytogenes in farm dairies, 919
Salmonella in retail meat products, 161
Salmonella prevalence in chicken meat in Japan, 270
Principal component analysis (PCA)  
Heavy metals and PCBs in salted anchovies, 796  

Probability  
Comparison of pathogen contamination route of leafy greens, 1536  
Growth probability of E. coli O157:H7 in ground beef, 622  

Probability of acceptance  
Acceptance sampling plans for E. coli O157, 539  

Probiotic(s)  
Characterization of a probiotic B. cereus strain, 1189  
Inhibitory activity of fermented whey, 94  
Preselection of Lactobacillus isolates by C. elegans, 86  

Probiotic evaluation studies  
L. gasseri aggregation and adhesion to specific pathogens, 1482  

Processed animal protein  
Real-time PCR detection of ruminant material in feed, 1300  

Processed meats  
Chiller heating for Listeria control, 999  
Naturally cured processed meats inoculated with C. perfringens, 417  
Survival of C. perfringens in naturally cured meats, 410  

Process hygiene  
Functional coatings and brewery surface microorganisms, 1891  

Produce  
Four-week norovirus stability, 1847  
Irradiation of calicivirus on lettuce, 1500  
Irrigation water and persistence of E. coli O157:H7 on spinach, 709  
Risk assessment for E. coli in leafy greens, 700  

Produce safety  
Electrolyzed oxidizing water for disinfecting avocados, 1552  

Propagules  
Propagules of S. maydis in maize, 676  

Propionate  
Control of listeriae on pork scrapple, 394  

Proteolytic activity  
Proteolytic activity of LAB and fungal biota in dry-cured ham, 826  

Proteomics  
LC-MS in food allergen detection, 316  

Psychrotolerance  
Heat resistance of spores of a psychrotolerant B. cereus isolate, 1662  

Psychrotrophic  
Microbial ecology of Tunisian fresh fish, 1762  

Psychrotrophic bacteria  
E. coli and psychrotrophic bacteria inhibition in brine-injected beef, 359  

Public health  
Biogenic amines in Egyptian foods, 681  
Foodborne disease caused by Cryptosporidium and Giardia, 1944  

Pulque  
Behavior of microorganisms in pulque, 580  

Pulsed electric field  
L. monocytogenes surrogate for UHP and PEF, 1655  

Pulsed-field gel electrophoresis (PFGE)  
Antimicrobial-resistant Campylobacter from retail meats, 616  
Characterization of a probiotic B. cereus strain, 1189  
C. jejuni and C. coli in Hungary, 905  
E. coli O157:H7 genetic diversity in bovine fecal samples, 1186  
Outbreak of Salmonella serotypes Newport and Reading, 1035  
Transmission of Salmonella by housefly, 1012  

Purification  
Antifungal δ-dodecalactone from LAB, 651  
Pycnidia  
Propagules of S. maydis in maize, 676  

qPCR  
Evaluation of a Poisson-based approach for validation of qPCR, 1404  
Quantitative  
LC-MS in food allergen detection, 316  
Quantitative  
LC-MS in food allergen detection, 316  
Quantitative detection  
Campylobacter and chicken meat, 2048  

Quantitative methods  
Evaluation of a Poisson-based approach for validation of qPCR, 1404  

Quantitative microbiology risk assessment  
Risk assessment for salmonellosis, 553  

Quantum dots  
Multiplex immunoassay for detection of foodborne pathogens, 2039  

Quaternary ammonium  
Antibacterial activity of reactive quaternary ammonium compounds, 2107  

Quorum sensing  
Lactic acid bacteria exhibit autoinducer-2–like activity, 631  

Radiation  
Irradiation of frozen seafood, 641  
Radiation inactivation of Y. pestis in bologna, 627  

Radiolytic hydrocarbons  
Detection of irradiated dry-cured ham using RPLC-GC-MS, 960  

Radiosensitization  
Bacterial radiosensitization in broccoli, 1065  

Raisins  
Fumonisin B2–producing A. niger in California raisins, 672  

Rats  
Investigations of ethoxyquin dimer in rats, 1574  

Raw chicken meat  
Campylobacter in poultry products in Poland, 986  

Raw meat  
Detection of E. coli O157:H7 in raw ground beef, 6  

Raw milk  
Inhibiting bacterial propagation in raw milk, 1475  
Multiplex PCR for E. coli O26, 13  
Prevalence of Listeria spp. and L. monocytogenes in farm dairies, 919  

Raw milk systematic review and meta-analysis, 1814  
Risk assessment of listeriosis, 1268  

Raw milk cheese  
Molecular stress response in E. coli, 849  

Raw milk testing  
Risk assessment of listeriosis, 1268  

Ready-to-eat (RTE)  
L. monocytogenes inhibition by combined antimicrobials, 122  
Norovirus contamination of ready-to-eat food items in Istanbul, 840  

Ready-to-eat (RTE) food  
Gene expression of L. monocytogenes on RTE food, 1104  

Ready-to-eat (RTE) meats  
Control of listeriae on pork scrapple, 394  

Ready-to-eat (RTE) processing plant  
Molecular ecology of Listeria in small RTE processing plants, 63  

Ready-to-eat (RTE) products  
Campylobacter in poultry products in Poland, 986  

Recall notifications  
Effectiveness of food recalls in NYC retailers, 111  

Recovery  
High-pressure inactivation of V. parahaemolyticus, 751  

Recurrence  
Yoghurt feeding and recurrence of IBD, 801  

Reduction  
Patulin reduction in apple juice, 149  
Refrigerated processed foods of extended durability  
Mild heat germination and inactivation of B. cereus spores, 2079  

Refrigeration temperature  
Virulence of E. coli O157:H7 on fresh-cut lettuce, 718
Relative humidity
  Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
Removal of virus
  Human norovirus binding to lettuce and raspberries, 1364
Repetitive sequence-based PCR
  Salmonella in retail meat products, 161
Restaurant
  Factors associated with working while ill, 215
Restaurant inspection
  Designing a national restaurant inspection disclosure tool, 1869
Retail

Romaine lettuce
  Slicing under chlorinated water, 2142
Root
  Comparison of pathogen contamination route of leafy greens, 1536
Roughness
  Attachment of E. coli O157 to stainless steel, 1359
rpoD
  Rapid and sensitive detection of V. parahaemolyticus by LAMP, 1462
Ruminant
  Real-time PCR detection of ruminant material in feed, 1300
Saccharides
  Effect of saccharides on lactoperoxidase system, 134
Saccharomyces cerevisiae
  Patulin reduction in apple juice, 149
Safe food handling
  Predicting hygienic food handling behaviors, 925
Safety
  Pathogen growth in no-knead dough, 285
Salad
  Norovirus contamination of ready-to-eat food items in Istanbul, 840
Salchichón
  Bactometer system for monitoring bacterial populations in salchichón, 145
Salinity
  High salinity relay to reduce V. vulnificus in oysters, 1902
Salmon
  Investigations of ethoxyquin dimer in rats, 1574
Salmonella
  Acute gastroenteritis and foodborne pathogen burden in Japan, 1592
  Additional cooking procedures to achieve lethality performance standards, 1741
  AMR in Campylobacter, Salmonella, and E. coli from retail grain-fed veal, 1245
  Behavior of microorganisms in pulque, 580
  Behavior of Salmonella on pecans, 588
  Campylobacter and Salmonella in retail chicken in Ireland, 1912
  Control of Salmonella in chicken, 1833
  Control of Salmonella in poultry, 2024
  Decontamination of orange surfaces, 1684
  Effect of breeder vaccination on Salmonella in broilers, 727
  Efficacy of sequential application of decontamination agents, 743
  Enrichment media specificity revealed by microarray analysis, 1030
  Essential oil effect on growth boundaries of Listeria and Salmonella, 45
  Gallium maltolate treatment of cattle, 524
  Inactivation of Salmonella on pecans, 1441
  Microbiological hygiene of meat in Burkina Faso, 1547
  Microbiological quality of WIC and AC broilers, 1531
  Microbiological survey of lettuce in Japan, 1543
  Modeling inactivation of Salmonella in liquid egg, 882
  Nalidixic acid–resistant Salmonella Typhimurium, 610
  Pathogen growth in no-knead dough, 285
  Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603
  Porcine salmonellosis in Spain, 1070
  Poststorage irradiation in tomatoes, 990
  Predictive microbiology model for Salmonella on chicken, 279
  Prevalence of foodborne pathogens at meat factories, 812
  Reduce E. coli O157:H7 and Salmonella by simulated chilling and aging, 289
Risk assessment
  Risk assessment for salmonellosis, 553
  Salmonella and E. coli in chili peppers, 874
  Salmonella from oysters served raw in restaurants, 1025
  Salmonella in retail meat products, 161
  Salmonella on raw poultry in China, 1724
  Salmonella prevalence in chicken meat in Japan, 270
  Salmonella reduction on whole-muscle chicken, 1079
  Salmonella screening tool for complaint-based surveillance, 106
  Zoonotic bacteria in bulk tank milk and filters from U.S. dairies, 759
Salmonella enterica
  Antimicrobial formulations against S. enterica on organic leafy greens, 1676
  Comparison of pathogen contamination route of leafy greens, 1536
Salmonella enterica Enteritidis
  Salmonella biofilms on bench cover materials, 32
Salmonella Enteritidis
  Antimicrobial activity of egg white, 24
  Salmonella control, 665
  Salmonella Enteritidis in irradiated eggs, 2031
  Salmonella growth kinetics in ground chicken, 735
Salmonella infection
  Preselection of Lactobacillus isolates by C. elegans, 86
Salmonella Newport
  Outbreak of Salmonella serotypes Newport and Reading, 1035
Salmonella Reading
  Outbreak of Salmonella serotypes Newport and Reading, 1035
Salmonella sp.
  Inhibitory activity of fermented whey, 94
Salmonella spp.
  Salmonella and E. coli O157:H7 concentration from water, 1934
  Susceptibility of Salmonella spp. to bacteriocins of B. thuringiensis, 274
Salmonella Typhimurium
Growth and survival of pathogens in beer, 1670
Inactivation of pork pathogens by steam-ultrasound treatment, 769
Salmonella Typhimurium detection from pork processing environments, 294
Salmonella Typhimurium DT104
Growth of Salmonella on chicken as affected by inoculum size, 1630
Salmonellosis
Salmonellosis attribution from New Zealand outbreak data, 438
Salt Growth probability of E. coli O157:H7 in ground beef, 622
High-pressure inactivation of V. parahaemolyticus, 751
Salted anchovies
Heavy metals and PCBs in salted anchovies, 796
Salted egg yolk
Modeling inactivation of Salmonella in liquid egg, 882
Sample size
Detection of E. coli O157:H7 in raw ground beef, 6
Sampling strategy
Risk-based monitoring for histamine, 302
Sardinia
Anisakidae in teleosts and cephalopods in Sardinia, 1769
Satureja
Essential oil effect on growth boundaries of Listeria and Salmonella, 45
Sausage
M. avium detection in meat products, 636
Packaging–storage control L. monocytogenes in jerky and sausage, 188
Scale up
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468
Screening
Salmonella screening tool for complaint-based surveillance, 106
Seafood
Irradiation of frozen seafood, 641
Sediment
Relationship between virulence genes and E. coli, 18
Selective enrichment
Isolation of Cronobacter, 387
Selective media
Detection of C. jejuni with various detection tools, 456
Semolina
Effect of milling on T-2 and HT-2 toxins, 1700
Sensory effects
Pork decontamination by acid spray-steam condensation, 1338
Sequential Efficacy of sequential application of decontamination agents, 743
Serotyping
L. monocytogenes serotyping, 403
Microbiological hygiene of meat in Burkina Faso, 1547
Serrano
Salmonella and E. coli in chili peppers, 874
Sheep
Prevalence and molecular characterization of E. coli O157:H7 in sheep, 1413
Prevalence of Listeria spp. and L. monocytogenes in farm dairies, 919
Shelf life
Antimicrobial effect of commercial fermentation product, 470
Probiotic bacteria in whey cheese, 1194
Shellfish
Vibrio spp. in fish and shellfish, 1345
Shifts
L. monocytogenes response to pH and a_w shifts, 78
Shiga toxin
 Fate of E. coli in nonintact beef, 1054
Shiga toxins and E. coli O157, 373
Shiga toxin genes
Multiplex PCR detection of Shiga toxin–producing E. coli, 228
Shiga toxin–producing Escherichia coli
Molecular stress response in E. coli, 849
Survival of E. coli in lemon and lime juices, 1746
Thermal resistance of E. coli in apple juice, 1231
Toxicity and efficacy of selected neutralizing agents, 820
Shiga toxin–producing Escherichia coli O157
Costs and burden of STEC O157 in The Netherlands, 545
Shigella
Behavior of microorganisms in pulque, 580
Short-wave UV light
Yeast inactivation by combined treatments, 1751
Shrimp
Detection of shrimp-derived components in food by real-time PCR, 1776
Effect of antimicrobial spice and herb extracts on RTE shrimp, 1119
Siderophore
Vaccination of cows and calves with E. coli O157 SRP extract, 1599
Silver
Antimicrobial materials and food hygiene, 1200
Simple rinse
Human norovirus binding to lettuce and raspberries, 1364
Simultaneous growth
Growth of L. monocytogenes in minced tuna, 176
Single-strength lemon and lime juices
Survival of E. coli in lemon and lime juices, 1746
Sinigrin
Influence of NaCl and NaNO3 on bacterial sinigrin hydrolysis, 2162
16S rRNA gene
Real-time PCR detection of ruminant material in feed, 1300
16S rRNA gene sequencing
Comparative study of Cronobacter identification technologies, 2182
Skin
Inactivation of pork pathogens by steam-ultrasound treatment, 769
Slaughterhouse
ESBL in farm animals at slaughter, 446
Small molecules
Small molecule screening for compounds that inhibit E. coli O157:H7, 2148
Snack food
Hydrocyanic acid in cassava chips, 980
Soap
Meta-analysis of antimicrobial soaps, 1875
Socioeconomic status
GIS mapping to track retail foods safety risks, 1524
Sodium dodecyl sulfate
Control of Salmonella in poultry, 2024
Sodium hypochlorite
Slicing under chlorinated water, 2142
Soilborne bacteria
Bacterial flora of cabbage during growing, 645
Solid-phase extraction
Determination of PAHs in honey, 1692
Source attribution
Salmonellosis attribution from New Zealand outbreak data, 438
Soybean
Effects of an oxidative agent and lectins on HAV binding, 157
Sparus aurata
Metals in farmed fish from Tenerife Island, 1938
Spice(s)
Effect of antimicrobial spice and herb extracts on RTE shrimp, 1119
Salmonella control, 665
Spinach
Comparison of pathogen contamination route of leafy greens, 1536
Irrigation water and persistence of E. coli O157:H7 on spinach, 709
Spoilage
Lactic acid bacteria exhibit autoinducer-2–like activity, 631
Spoilage microflora
Effect of antimicrobial spice and herb extracts on RTE shrimp, 1119
Spores
Mild heat germination and inactivation of B. cereus spores, 2079
Spray chilling
Reduce E. coli O157:H7 and Salmonella by simulated chilling and aging, 289
Stabilization
Alternative procedures to achieve stabilization performance standards, 101
Stainless steel
Attachment of E. coli O157 to stainless steel, 1359
Staphylococcus
Pathogen growth in no-knead dough, 285
Staphylococcus aureus
Additional cooking procedures to achieve lethality performance standards, 1741
Antimicrobial-resistant S. aureus in retail meats, 1625
Behavior of microorganisms in pulque, 580
Characterization of S. aureus from different origins, 1852
Characterization of S. aureus from milk, 1353
Characterization of S. aureus in Urfa cheese, 1788
Growth and survival of pathogens in beer, 1670
MRSA in a pork production chain, 126
Statistical process control
Indicator organisms, 1387
Steam
Inactivation of pork pathogens by steam-ultrasound treatment, 769
Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603
Steam condensation
Pork decontamination by acid spray-steam condensation, 1338
Stenocarpella maydis
Propagules of S. maydis in maize, 676
Sterilization
FSO approach for commercially sterile foods, 1956
Stool sample
Occurrence of Arcobacter in feces of Nigerian chicken, 119
Storage
Aflatoxins and mold growth in hot peppers during storage, 830
Stored grain
Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
Stored-product insects
Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
Strawberry
E-beam inactivation of norovirus in food, 1155
Stress
L. monocytogenes response to pH and aw shifts, 78
Stress adapted
Thermal inactivation of stress-adapted E. coli O157:H7 in beef, 531
Stress response mechanisms
Molecular stress response in E. coli, 849
stx2
Virulence of E. coli O157:H7 on fresh-cut lettuce, 718
Subtypes
Prevalence and resistance of L. monocytogenes in chicken, 1017
Supershedding
C. difficile in cattle at harvest in the United States, 1618
Surface decontamination
Decontamination of fresh orange juice, 1238
Surface hygiene
Rapid ATP assessment of hygienic status of food contact surfaces, 686
Surfactant
Biofilm inactivation by micelle-encapsulated essential oil compounds, 55
Surrogate
Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603
Surrogate organism
L. monocytogenes surrogate for UHP and PEF, 1655
Surveillance
Foodborne illness surveillance by local health departments, 432
Survey
Consumer food safety perceptions and practices, 1922
Survival
Predictive microbiology model for Salmonella on chicken, 279
Survival of E. coli in lemon and lime juices, 1746
Survival of H. pylori in Turkish sucek, 2055
Toxicity and efficacy of selected neutralizing agents, 820
Swine
Isolation methods for C. difficile, 130
Nalidixic acid–resistant Salmonella Typhimurium, 610
Porcine salmonellosis in Spain, 1070
Risk assessment for salmonellosis, 553
Transmission of Salmonella by housefly, 1012
Synergism
L. monocytogenes inhibition by combined antimicrobials, 122
Synthetic antioxidant
Investigations of ethoxyquin dinner in rats, 1574
T-2 and HT-2 toxins
Effect of milking on T-2 and HT-2 toxins, 1700
Taiwan
Identification of toxicity and fish species in fish poisoning, 789
TaqMan real-time PCR
Real-time PCR detection of ruminant material in feed, 1300
Technological characterization
Characterization of dairy and human lactic acid bacteria, 1379
Teleosts
Anisakidae in teleosts and cephalopods in Sardinia, 1769
Temperature
Abiotic and biotic factors affect efficacy of chlorfenapyr, 1288
Aflatoxins and mold growth in hot peppers during storage, 830
Antimicrobial activity of egg white, 24
Campylobacter and Salmonella in retail chicken in Ireland, 1912
Heat resistance of spores of a psychrotolerant B. cereus isolate, 1662
High hydrostatic pressure inactivation of foodborne microorganisms, 2097
Temporal self-regulation theory
Predicting hygienic food handling behaviors, 925
Tetrodotoxin
Identification of toxicity and fish species in fish poisoning, 789
Theory of planned behavior
Predicting hygienic food handling behaviors, 925
Thermal inactivation
Fate of E. coli in nonintact beef, 1054
Thermal inactivation of stress-adapted E. coli O157:H7 in beef, 531
Thermal inactivation kinetics
Modeling inactivation of Salmonella in liquid egg, 882
Thermal processing
FSO approach for commercially sterile foods, 1956
Thermal resistance
Thermal inactivation of AI and NDV in fat-free egg product, 1161
Thermal treatment
Listeria survival in response to heat and aroma compounds, 2070
Thermometer use
Consumer burger preparation, 1708
Through oven transfer adsorption desorption interface
Detection of irradiated dry-cured ham using RPLC-GC-MS, 960
Tigecycline
C. difficile in cattle at harvest in the United States, 1618
Tomato
Poststorage irradiation in tomatoes, 990
Tomato juice
Ohmic heating treatment on foodborne pathogens in juices, 899
Total aerobes
Automated MPN comparison, 1558
Total aerobic viable counts
TVC assay of raw fish samples, 776
Total arsenic
Total and inorganic arsenic in marine animals, 450
Total organic carbon
Irrigation water and persistence of E. coli O157:H7 on spinach, 709
toR
Rapid and sensitive detection of V. parahaemolyticus by LAMP, 1462
Traceback
Outbreak of multidrug-resistant Salmonella Newport infections, 1315
Traditional meat and fish foods
Biogenic amines in Egyptian foods, 681
Traditional methods
Bactometer system for monitoring bacterial populations in salchichón, 145

trans-Cinnamaldehyde
Inactivation of C. sakazakii biofilm by trans-cinnamaldehyde, 200
trans-Cinnamaldehyde fails to combat Campylobacter in chicks, 1729

Translocation
E. coli O157:H7 translocation and decontamination, 1048

Transmission
Salmonellosis attribution from New Zealand outbreak data, 438

Transportation
Transport of cattle and E. coli O157, 1605

Trends in food handling and consumption practices, 1513

Triclosan
Antimicrobial materials and food hygiene, 1200
Salmonella biofilms on bench cover materials, 32

Trout
Listeria after protein recovery process, 1348

Talbogia violacea
T. violacea extracts inhibit conidial germination, 1007

Typhi
Salmonella and E. coli in chili peppers, 874

Typhimurium
Salmonella and E. coli in chili peppers, 874

Ultrasound
Inactivation of pork pathogens by steam-ultrasound treatment, 769
Yeast inactivation by combined treatments, 1751

Ultrastructure
Propagules of S. maydis in maize, 676
Urfa cheese
Characterization of S. aureus in Urfa cheese, 1788

UV light
UV decontamination of chicken, packaging, and contact surfaces, 565
UV polymerization
Antibacterial activity of reactive quaternary ammonium compounds, 2107

Vaccination
Effect of breeder vaccination on Salmonella in broilers, 727

Vaccine
Vaccination of cows and calves with E. coli O157 SRP extract, 1599

Validation
Determination of PAHs in honey, 1692
Novel sanitizer against nonpathogenic bacteria in solution and on leaves, 1468

Pediococcus sp. as a surrogate for Salmonella Enteritidis PT30, 603
Vanillic acid
Inhibition of Cronobacter by vanilla compounds, 2062
Vanillin
Inhibition of Cronobacter by vanilla compounds, 2062

Vector species
A novel detection method for four violative vector species, 1883

Vegetables
Survival of E. coli O157 and risk reduction, 2000

Vero cytotoxin-producing Escherichia coli O26
Multiplex PCR for E. coli O26, 13

Vibrio
Emergence of O157 strains in clade 8, 1324

Viable
Physical factors in the viability of G. binucleatum, 844

Vibrio
High salinity relay to reduce V. vulnificus in oysters, 1902
Multiplex real-time PCR assay for Vibrio pathogen detection, 939
Vibrio parahaemolyticus
Acute gastroenteritis and foodborne pathogen burden in Japan, 1592
Antimicrobial resistance of vibrios isolated from farmed fish, 380
High-pressure inactivation of V. parahaemolyticus, 751

Vibrio spp.
Rapid and sensitive detection of V. parahaemolyticus by LAMP, 1462

Vibrio spp.
in fish and shellfish, 1345

VIDAS
Detectability of L. monocytogenes, 1282

Video observation
Detection of C. jejuni with various detection tools, 456

Virolisis
Virolysis of feline calicivirus and human GII.4 norovirus, 2113

Virulence
Virulence of E. coli O157:H7 on fresh-cut lettuce, 718
Virulence factors
Evaluation of the potential pathogenicity of food enterococci, 465

Virulence gene expression
EHEC virulence gene expression in ground beef, 1434

Virulence genes
Antimicrobial resistance of vibrios isolated from farmed fish, 380
ExPEC in retail meats, 38

Viruses
E-beam inactivation of norovirus in food, 1155

Virus infectivity
Virolysis of feline calicivirus and human GII.4 norovirus, 2113

Vitamin A
Vitamin A fish poisoning, 1581

Vitamin B1
Growth of B. cereus in wet noodles, 658

Vitamins
Raw milk systematic review and meta-analysis, 1814

Vomiting
Factors associated with working while ill, 215

VTEC-STECEHEC
Survival of E. coli O157 and risk reduction, 2000

Wash
Pathogen cross-contamination during produce wash, 352

Wash treatment
Effect of washing on reducing human NoVs on vegetables, 1908

Water
Foodborne disease caused by Cryptosporidium and Giardia, 1944
Salmonella and E. coli O157:H7 concentration from water, 1934

Water activity
Growth limits of L. monocytogenes in a cheese matrix, 1805

Heat resistance of spores of a psychrotolerant B. cereus isolate, 1662
Inactivation of Salmonella on pecans, 1441

Water chill
Microbiological quality of WIC and AC broilers, 1531

Watershed
Relationship between virulence genes and E. coli, 18

Weak acid
Antimicrobial effects of weak acids, 893

Weibull distribution
Yeast inactivation by combined treatments, 1751

Western Mediterranean Sea
Anisakidae in teleosts and cephalopods in Sardinia, 1769

Wet noodle
Growth of B. cereus in wet noodles, 658

Whey cheese
Probiotic bacteria in whey cheese, 1194
Whole muscle
- Translocation of *E. coli* into beef striploins, 1334

Working while ill
- Factors associated with working while ill, 215

Yeast
- Mycotoxin adsorption by yeast products, 1175
- Reduction of aflatoxin in peanuts using *C. cerevisiae*, 1003

Yeast antagonists
- Biodegradation of patulin by yeasts, 154

Yeast culture
- Fecal prevalence of *E. coli* O157:H7 in beef steers, 912

*Yersinia enterocolitica*
- Enrichment media specificity revealed by microarray analysis, 1030
- Inactivation of pork pathogens by steam-ultrasound treatment, 769

*Yersinia pestis*
- Radiation inactivation of *Y. pestis* in bologna, 627

Yoghurt
- Yoghurt feeding and recurrence of IBD, 801

Zearalenone
- ZEN removal by montmorillonite K10 and pillared montmorillonite K10, 954

Zinc chloride
- ZnCl₂ as preservative in table olives, 2169

Zoonoses
- Foodborne disease caused by *Cryptosporidium* and *Giardia*, 1944

*Zygosaccharomyces bailii*
- Yeast inactivation by combined treatments, 1751
