

*Reconstructing Prehistoric Pueblo Societies.* Edited by WILLIAM A. LONGACRE. Albuquerque, New Mexico, 1970. University of New Mexico Press for the School of American Research. Tables. Maps. Graphs. Illustrations. Index. Bibliography. Pp. xi, 247. Cloth. \$8.50.

This publication brings together for presentation to a wider audience papers prepared for the second in a series of advanced seminars held under the sponsorship of the School of American Research, Santa Fe, New Mexico, April 9-13, 1968. The central theme of the seminar was prehistoric Pueblo social organization. Through the application of archaeological techniques to regional data these scholars attempt to discover inferences that might lead to improved hypotheses about aspects of early cultural systems.

After a review of historical trends in archaeological research relating to the Southwest, William A. Longacre focuses on a perspective for modern research "directed toward the reconstruction of prehistoric Pueblo society" to establish a background for the other papers. James N. Hill, R. Gwinn Vivian, William D. Lipe, Jeffrey S. Dean, Douglas W. Schwartz, and Paul S. Martin then present papers that draw specific examples from findings at particular sites, or inferences from research related to particular topics. These all refer back to the main theme—prehistoric social organization in the Southwest. Edward P. Dozier and David F. Aberle, in the two final papers, comment on theoretical and methodological propositions, and on the possibility of drawing meaningful inferences concerning social organization in prehistoric Southwestern societies through use of the proposed theories and methods.

This book will be useful for supplementary reading in courses on archaeological theory and method, or in any instance where one desires to present a cross section of "current thinking among archaeologists."

LYMAN TYLER

*The Southwestern Journals of Adolph F. Bandelier, 1883-1884.* Edited and Annotated by CHARLES H. LANGE and CARROLL L. RILEY with the assistance of ELIZABETH M. LANGE. Albuquerque, New Mexico, 1970. University of New Mexico Press. Photographs. Maps. Drawings. Glossary. Bibliography. Index. Pp. xviii, 528. Cloth. \$20.00.

MEMO TO PAUL H. EZELL: Yes, Paul, reviewing *does* make a difference! The editors of this second of four volumes projected to publish Adolph F. Bandelier's journals moved the notes to the end as you suggested in your *HAHR* review (48:3, August 1968, 552) of the first volume. Unfortunately, the printer set 667 notes in type just as small as that employed in the first book. Even worse, Paul, your comment about the value of "contemporary photographs of persons and places related to the context of the journal" went unheeded. You will find no visual material on Gila River Pima or other Indians like the Pueblo views in the first volume. Your plea for editorial identification of sketches brought no action; indeed, fewer are included in this volume. As you concluded, Paul, "probably only specialists will make much use of these journals." Who besides someone seeking insight into pioneering research in the United States cares what a Swiss immigrant Indianologist saw from a train window, or even trudging over a site once

occupied by prehistoric Indians? One cannot complain overmuch of economies by a publisher printing data for specialists.

The bulk of this volume presents specialists with Bandelier's almost daily journal entries for 1883 and 1884 when he visited eastern and southern Arizona, northeastern Sonora and northwestern Chihuahua besides Río Grande areas from San Juan to El Paso. The passage of time has endowed these records with some value as historical sources, despite Bandelier's specialized perspective. A good index lessens, Paul, the need for marginally perforated cards and code you foresaw a specialist requiring to mine the data.

HENRY F. DOBYNS

*Sources of Current Information on Latin America.* Compiled by PAQUITA VIVÓ. Washington, D. C., 1971. Squirrel Publications. Index. Pp. iii, 38. Paper. \$3.00.

A list of 150 periodicals that regularly include information on Latin America, emphasizing those that deal with current economic problems and development. Over a hundred government agencies and private institutions are also listed with their addresses. This publication, which will be of some use to libraries and students, may be ordered from the publisher at 1240 National Press Building, Washington, D. C. 20004.

R.G.

*Dateline Latin America: A Review of Trends and Events of 1970.* By NATHAN A. HAVERSTOCK and RICHARD C. SCHROEDER. Washington, D. C., 1971. The Latin American Service. Maps. Graphs. Tables. Illustrations. Bibliography. Index. Pp. 106. Paper. \$3.00.

Although this book is mainly a compendium of journalistic snippets describing the most sensational political occurrences in Latin America in 1970, it is, perhaps, useful as a summary of the structural ties between American governmental agencies and Latin American countries. This "news-in-review" approach precludes any but the most naive analysis of the events included. The authors' attempts at forecasting trends in the seventies suffer the same faults of shallowness and sensationalism. The only useful purposes of this book are that it provides an index to major news events in Latin America during 1970 of relevance to American foreign policy and contains a compilation of the many governmental agencies having significant dealings with Latin American countries.

J.M.

*Academic Writer's Guide to Periodicals.* Vol. I: *Latin American Studies.* Edited by ALEXANDER S. BIRKOS and LEWIS A. TAMBS. Kent, Ohio, 1971. Kent State University Press. Indices. Pp. 359. Cloth. \$10.00. Paper. \$7.50.

This is the first in a series of handbooks for writers of scholarly articles. It lists the journals that publish articles in English on Latin America and includes an index by subject, period, and geographical area covered. Through a questionnaire, information has been secured on the name of the editor, editorial address, frequency of publication, number of subscribers, subjects and areas covered, and edi-
