In the original article (Ref. 1), the first line of the caption for Figure 4 contained errors that could cause the reader to misinterpret the data. The corrected first line of the caption is as follows: “The scaled chain relaxation time for $N = 1000$, $P/\sigma_m = 25$ (squares), $N = 400$, $P/\sigma_m = 10$ (downward triangles), $N = 800$, $P/\sigma_m = 5$ (triangles), and $N = 160$, $P/\sigma_m = 4$ (circles).”
