
Zhipeng Duan

In the paper of Duan [1], there is an error in the range of the Prandtl number (Pr) for Eqs. (14) and (15). The correlations of Notter and Sleicher [2], Eqs. (14) and (15), are valid for $0.004 < Pr < 0.1$ not $0.04 < Pr < 0.1$.

The author would like to acknowledge M. M. Awad of Mansoura University, Mansoura, Egypt, for bringing this to my attention.
