

## In Appreciation

---

On behalf of the ASME Heat Transfer Division, I wish to express our deepest appreciation to Yogesh Jaluria for his dedicated service and excellent leadership as Editor of the ASME Journal of Heat Transfer from 2005 to 2010. Since he started as an Associate Technical Editor of the JHT beginning in 1993, his high standards, attention to detail, and creative ideas were readily recognized by his peers. When he assumed the role as Editor of the JHT in 2005, his dedication, vision, and leadership has helped the Journal to become one of the most renowned ASME Journals and widely read heat transfer publications worldwide. The impact and visibility of the JHT has grown significantly under his leadership, and as representative of the ASME heat transfer community, I cannot express enough gratitude and appreciation to Yogesh Jaluria for his dedicated service to the ASME Heat Transfer Division throughout his professional career.

**James F. Klausner**  
Chair of the Executive Committee  
of the Heat Transfer Division of ASME
