

## Correction: YAP/TEAD-Mediated Transcription Controls Cellular Senescence

In this article (Cancer Res 2013;73:3615–24), which appeared in the June 15, 2013, issue of *Cancer Research* (1), the loading control in Fig. 6D was inadvertently duplicated from the tubulin-loading control of Fig. 6A during the assembly of the figure. The authors reviewed the original scans and found the correct Western blots of the loading control 14-3-3 $\beta$  for Fig. 6D.

The online version of the article has been corrected and no longer matches the print. The correction does not affect in any way the article's conclusions, as the results are fully consistent with those shown in the original figure. The authors apologize for these errors.
