

Correction: Melanocytic Nevi, Nevus Genes, and Melanoma Risk in a Large Case–Control Study in the United Kingdom

In this article (1), which was published in the August 2010 issue of *Cancer Epidemiology, Biomarkers & Prevention*, the authors regret that the G and A alleles are labeled incorrectly for rs7023329 and rs2284063. "G" should be replaced by "A" and "A" should be replaced by "G" in all references to these two SNPs throughout the article and Supplementary material.
