
Electronic Calendar and Other EC-Related Resources

The evolutionary computation community maintains a number of electronic mailing lists which provide timely interactions, exchange of information, and sharing of software. Participants submit articles on research issues, recent results, notices on new technical reports, workshop announcements and calls for papers. A brief description of the more active lists follows.

GA-List is a moderated electronic digest for the interchange of information relating to genetic algorithms (GAs) as defined by Holland, and general issues of evolutionary computation. Submissions are put into digest form and sent to subscribers approximately once a week. To subscribe, send mail to **GA-List-Request@aic.nrl.navy.mil**.

The GA-List digest also includes a Calendar of recent and upcoming EC-related events.

The GA-List URL is **<http://www.aic.nrl.navy.mil/galist>**. The list of events is updated periodically. If you find any errors please send email to ga-list-request@aic.nrl.navy.mil.

An ftp archive site is maintained with back issues of GA-List and other useful information, including source code for genetic algorithm and other evolutionary algorithm packages. The ftp site can be accessed using anonymous ftp to **ftp.aic.nrl.navy.mil**. Use a username of "anonymous" and use your own email address as your password. In addition to the ftp site, the archive is also available on the World Wide Web via the GA-List URL. This also contains links to other GA and evolutionary computation information sources and links to the home pages of other research groups working in evolutionary computation.

Comp.AI.Genetic is a newsgroup intended for anyone interested in the general area of evolutionary computation. See your local systems administrator to obtain this news feed. A substantial FAQ sheet (frequently asked questions) on EC is maintained and is quite helpful.

EP-List is an electronic mailing focusing on Evolutionary Programming (EP) as defined by Fogel. To subscribe, send mail to **EP-List-Request@magenta.me.fau.edu**.

Genetic-Programming is an electronic mailing list focusing on genetic programming (GP) as defined by Koza. To subscribe send mail to **Genetic-Programming-Request@cs.stanford.edu**.
