FEASIBILITY GRANTS

These grants provide up to \$40,000/yr for 2 yr for new and innovative diabetes research. The funds are to be used for equipment, supplies, and salary for technical assistance. Established diabetes investigators must propose marked departures from current research. Investigators in other fields are encouraged to apply their expertise to diabetes research. Applicants must be U.S. citizens or permanent residents and be members of U.S. university-affiliated institutions or equivalent within the U.S. or U.S. possessions. Application deadlines are 3 August 1990 and 1 February 1991 for funding beginning 1 January 1991 and 1 July 1991, respectively.

RESEARCH AND DEVELOPMENT AWARDS

These awards provide a maximum of \$65,000/yr for 3 yr to support young investigators with 2–5 yr of postdoctoral research experience. The funds support an investigator's salary and research program and enable the investigator to initiate an independent research effort that will lead to future long-term research funding. Applicants must be U.S. citizens or permanent residents and hold independent faculty positions at U.S. university-affiliated institutions within the U.S. and U.S. possessions. Application deadlines are 3 August 1990 and 1 February 1991 for funding beginning 1 January 1991 and 1 July 1991, respectively.

MEDICAL STUDENT RESEARCH FELLOWSHIP PROGRAM

These awards provide \$25,000/yr for 5 yr to accredited U.S. medical schools to support training of medical students. Selected students must be U.S. citizens or permanent residents in good standing who have completed at least 1 yr of medical school. Application deadline is 14 September 1990 for 1 January 1991 funding.

MENTOR-BASED POSTDOCTORAL FELLOWSHIP PROGRAM

These awards, in the amount of \$30,000/yr for 3 yr, are given to support a postdoctoral fellow working with an established diabetes investigator. The investigator must be a U.S. citizen or permanent resident and hold an appointment at a U.S. research institution. The fellow must have an MD or PhD degree, no more than 3 yr of postdoctoral research experience, and cannot serve an internship or residency during the award period. Application deadline is 12 October 1990 for 1 July 1991 funding.

LIONS CLUB INTERNATIONAL CLINICAL RESEARCH PROGRAM IN DIABETIC EYE DISEASE

This program supports clinical or applied research in diabetic retinopathy in the U.S. and abroad. Awards up to \$40,000/

yr for 2 yr will be given to support new treatment regimens, epidemiology, and translation research. In addition, funds will be provided to support the training of foreign investigators in U.S. research institutions, to enable U.S. investigators to conduct training programs in foreign institutions, and to provide equipment for clinical research in diabetic retinopathy. Application deadline is 1 February 1991 for 1 July 1991 funding.

CLINICAL RESEARCH GRANT PROGRAM

Grants of up to \$50,000/yr are provided for 3 yr for studies that directly involve humans. In vitro research on human blood or tissue samples to measure effects of environmentally induced (e.g., diet, drugs) changes qualifies as clinical research under this program; simply using human tissues for laboratory research does not qualify. The funds may be used for equipment, supplies, and/or salary (excluding principal investigator's salary). Applicants must be U.S. citizens or permanent residents and hold faculty-level appointments at U.S. university-affiliated institutions. Application deadline is 1 February 1991 for 1 July 1991 funding.
