The deadline for advertising insertion orders is the 15th, two months prior to date of issue. Orders received after deadline are subject to space availability. Deadline for copy or negative is the 1st day of month, one month prior to date of issue. For advertising information contact: Lilly G. Albo, American Meteorological Society, 45 Beacon Street, Boston, Mass. 02108 (617-227-2425).

employment announcements

The American Meteorological Society issues employment announcements monthly, setting forth opportunities for positions in the atmospheric and oceanographic fields. The employers describe the prerequisites and requirements for the openings.

Members and nonmembers of the AMS may subscribe to the announcements. The subscription price per annum for twelve monthly issues is $5 for AMS Members and Associate Members, $2 for AMS Student Members, and $25 for non-members.

The purpose of the Employment Announcements is to provide a means by which those seeking positions in the atmospheric and related fields and those requiring personnel to fill such openings may have a convenient means of communication. Organizations that wish to avail themselves of this service should contact Jean Cooper, American Meteorological Society, 45 Beacon Street, Boston, Mass. 02108 (617-227-2425), for details and charges.

Preprint

Seventh Conference on Aerospace and Aeronautical Meteorology and Symposium on Remote Sensing from Satellites

November 16–19, 1976
Melbourne, Fla.

The Seventh Conference on Aerospace and Aeronautical Meteorology and Symposium on Remote Sensing from Satellites, sponsored by the AMS and AIAA, was held 16–19 November 1976 in Melbourne, Fla. Sixty-one papers were arranged in sessions devoted equally to meteorological inputs needed in support of aircraft operations and the launching of aerospace vehicles and the use and interpretation of data from instruments aboard satellites.

Topics include: Turbulence and Wind Shear Modeling • Measurement of Turbulence and Wind Shear • Satellite Measurements of Atmospheric Constituents and Temperature Structure • Applications of Satellite Imagery • Meteorological Instrumentation for Support of Aircraft Operations • Meteorological Support to Aerospace Operations • Measurement and Dissipation of Fog • Spacecraft Systems and Remote Radiation Measurement • Processing and Applications of Satellite Data

327 pages

$15 AMS Members
$20 Nonmembers
