News from Our Branches*

Dr. Roberts foresees his new organization as a nucleus of intellectual activity with scientists from different disciplines working with meteorologists. It will not be large, nor will it try to diversify to cover

Bull. Amer. Meteor. Soc.*, **41, 694.

the field, because it is considered a supplement to university and other research. On the other hand, it could work on a global scale and handle projects too large for any existing single institution. It will be a planning center, furnishing the auspices for *ad hoc* groups, and an incentive for developing meteorological careers. The national center will not sponsor contracts, nor will it consider its function to be the evaluation of project work. ●
