

# ZERO to 60

## in 350 milliseconds

EII Model 200 Analog and Digital Meteorological Systems have the quick response, accuracy, and long life that you need for reliable weather observation.

In rain. Snow. Sleet. Freezing Rain. Dust.  
And sand.

With complete reliability!

These systems utilize EII's thermal resistive wind sensors, with no moving parts to wear out, fall off, or break!

Whether you need wind speed and direction only, or pressure, temperature, and humidity, too, EII has a system that will meet your requirements.

A rack-mounted signal conditioning unit displays the desired parameters. Options include connecting cable, remote power supply, and arctic package.

Call now for complete information!

## announcements

### **Eleventh Annual Conference of the Canadian Applied Mathematics Society**

The Eleventh Annual Conference of the Canadian Applied Mathematics Society will be held from 29 May to 1 June 1990 at the Hotel Nova Scotian in Halifax, Nova Scotia, Canada. This conference is intended to provide a forum for discussion of basic problems in mechanics of ocean waves, mathematical modeling, and computational fluid mechanics. For further information contact Professor Matiur Rahman, Conference Chair, Applied Mathematics Department, Technical University of Nova Scotia, P.O. Box 1000, Halifax, Nova Scotia, Canada B3J 2X4, telephone (902) 420-7724, fax (902) 420-7551.

### **Climatic Fluctuations and Water Management Seminar**

An international seminar on Climatic Fluctuations and Water Management will be held 11-14 December 1989 in Cairo, Egypt. This seminar is sponsored by the Ministry of Public Works and Water Resources, Government of Egypt, United Nations Environmental Programme, and International Water Resources Association. The four main objectives will be analysis of observed climatic fluctuations and review of present state of the art for forecasting, estimation of impacts of observed and future climatic fluctuations on water and related resources planning and management, identification of possible policy options and responses by the governments to deal with the impacts, and sensitization of decision makers on the present and future problems. For more information contact Dr. Asit K. Biswas, President-elect, International Water Resources Association, 76 Woodstock Close, Oxford OX2 8DD, England, fax: 44-865-0726753, or telex: 83147 VIA ORG.

### **WMO Technical Conference**

The World Meteorological Organization Technical Conference on the Economic and Social Benefits of Meteorological and Hydrological Services will be held 26-30 March 1990 in Geneva, Switzerland. For more information contact The Secretary-General, World Meteorological Organization, Case postale No. 5, CH-1211 Geneva 20, Switzerland.

Notice of registration deadlines for meetings, workshops, and seminars, deadlines for submission of abstracts or papers to be presented at meetings, and deadlines for grants, proposals, awards, nominations, and fellowships must be received at least three months before deadline dates.—*News Ed.* ●
