

# corrigenda

In the May 1996 *Bulletin* article, “An Eight-Year (1987–1994) Time Series of Rainfall, Clouds, Water Vapor, and Sea Ice Derived from SSM/I Measurements,” by Ralph R. Ferraro et al., three errors were discovered in the manuscript. These errors should be corrected as follows:

- 1) In Table 3, the coefficient  $a_2$  should be 0.40 when using the 19V, 22V brightness temperature channels.
- 2) Equation (5) should read  $LWP = a_0[\ln(290 - TB_1) - a_1 - a_2 \ln(290 - TB_2)]$ .
- 3) In Fig. 9, the first test in the check for sea ice should be  $TB_{22V} < 44 + 0.85TB_{19V}$ .
