RESIDENT SHORT REVIEW
Nodal Involvement by CD30⁺ Cutaneous Lymphoproliferative Disorders and Its Challenging Differentiation From Classical Hodgkin Lymphoma
Lhara Sumarriva Lezama, MD; Dita Gratinger, MD, PhD

INSTRUCTIONS FOR AUTHORS
(Also available at www.archivesofpathology.org)

ERRATUM
A letter to the editor in the November 2017 issue (Holmes EW, Samarasinghe S, Emanuele MA, Meah F. Biotin Interference in Clinical Immunoassays: A Cause for Concern. Arch Pathol Lab Med. 2017;141[11]:1459–1460) incorrectly lists an oral dose of biotin as 10-mg in the first sentence of the third paragraph. The correct dose is 100-mg. The sentence should have read, “Healthy subjects who take a single 1-mg or 100-mg oral dose of biotin have mean peak serum biotin concentrations of 8.6⁴ and 495⁵ ng/mL, respectively, occurring between 1 and 3 hours post dose and declining with half-lives of 8 to 19 hours.”

Prepare Submissions Now for the CAP18 Abstract Program

Abstract and case study submissions to the College of American Pathologists (CAP) 2018 Abstract Program will be accepted beginning at noon Monday, January 8 through 5 p.m. Central time Friday, March 9, 2018.

Accepted submissions will appear on the Archives of Pathology & Laboratory Medicine Web site as a Web-only supplement to the September 2018 issue. Awards will be presented to the winners of the Top 5 Junior Member Abstract Program.

The CAP18 meeting will be held October 20–24 in Chicago. Visit the Archives Web site (www.archivesofpathology.org) for additional abstract program information as it becomes available.
