

# SEASON'S GREETINGS

*A. Norman Cranin, DDS*

*A. Norman Cranin is the Editor-in-Chief of  
Journal of Oral Implantology.*

**F**arewell to the first year of the millennium and to volume 26—with sadness. It has been an excellent year and was celebrated by more and better articles and a plethora of brilliant colors. Last year, our 3D issue won a Golden Pen award from the International College of Dentists (thanks to the efforts of Drs David Steflik and Charles Weiss). And, sadly, we've seen the demise of several members—Drs Chérchève, Ricciardi, and Northcutt, whose obituaries were published.

My office staff, Ethel Bruck, Monica Grant, and I want to offer gratitude to

all of the reviewers last year and particularly to Drs Ronald Craig, Mohamed Sharawy, Alan Simons, Shankar Iyer, Jack Hahn, John Ley, Craig Misch, Peter Wohrle, Jack Lemons, Paul Mentag, Dave Steflik, TK Vaidyanathan, Edmond Demirdjan, Cheryl Biber, and Mark Kaufman.

To Vincent Shuck, Joyce Sigmon, and Laurie Storen of the AAID and to Marissa Barlow and her successor, Melissa Rodenbeek, of Allen Press, deepest thanks for their many invaluable contributions.

From all of us to all of our readers, subscribers, and friends, a joyous holiday season.
