TWENTY-SEVENTH ANNUAL MEETING

A complete account of the Twenty-seventh Annual Meeting of the American Diabetes Association, which was held in Atlantic City June 17-18, will be published in the August issue of this Journal. Comparative attendance at this and previous Meetings will be reported, as will the Annual Banquet and the Annual Business Meeting. The roster of Officers and Directors for the 1967-68 organizational year appears on the masthead above.

TWENTY-EIGHTH ANNUAL MEETING IN SAN FRANCISCO

The Sheraton-Palace Hotel in San Francisco will be the site of the Twenty-eighth Annual Meeting of the American Diabetes Association June 15-16, 1968. Further details concerning the Meeting will be announced in future issues of the Journal.

SIXTH RESEARCH SYMPOSIUM SEPTEMBER 29-30

Entitled "Diabetes, Pregnancy and the Newborn," the Sixth Research Symposium of the American Diabetes Association will be held at the Hotels Ambassador in Chicago, September 29-30. The symposium is an activity of the Committee on Research, of which Jerome W. Conn, M.D., Ann Arbor, is Chairman. Norbert Freinkel, M.D., and Marvin Cornblath, M.D., both of Chicago, are Co-Directors of the Symposium.

FIFTEENTH POSTGRADUATE COURSE

The American Diabetes Association will hold its Fifteenth Postgraduate Course, entitled "Diabetes in Review: Clinical Conference 1968," at the Sheraton-Cleveland Hotel in Cleveland, Jan. 24-26, 1968. Max Miller, M.D., and Penn G. Skillern, M.D., are Co-Directors of the Course. The program is being developed by the Co-Directors in collaboration with a program planning group of the Committee on Professional Education, consisting of Drs. George F. Cahill, Jr., Stefan S. Fajans, and David M. Kipnis.

RESEARCH AND DEVELOPMENT AWARD PROGRAM OF THE AMERICAN DIABETES ASSOCIATION

Applications for the research support program of the American Diabetes Association for the academic year 1968-69 must be received on or before Nov. 15, 1967. This program is designed to assist exceptionally promising young investigators in their transition to the level of established investigators. Each successful candidate will be supported by a Research and Development Award of the American Diabetes Association.

The top-rated applicant will receive the Elliott P. Joslin Research and Development Award for that year. The recipient of this Award may have this designation for only one year even though he may be granted a Research and Development Award for a second year.

The following policies have been established by the Committee on Research:

Eligibility

Applicants must be members of university-affiliated institutions within the United States and U.S. Possessions. Applicants should have had three years of relevant research experience with publications; residency training is not considered the equivalent of research experience.

The Committee on Research will give special consideration to the following:

1. Intent of applicant to pursue a full-time academic career.
2. Tangible evidence of research performance.

Stipend

The stipend will be \$12,000 per year plus the customary benefits of the sponsoring institution. If granted a one-year renewal, the salary increase for the second year will be in accordance with institutional policy, but will not exceed \$1,000, and will include the aforementioned institutional benefits. Recipients are required to devote 90 per cent of their time to research activities; an institution may supplement the salary in accordance with the standards of the respective institution.

Payment will be made on the fifteenth of each month to the sponsoring institution.

Institutional Overhead

It is understood that institutional expenses are *not* to be a part of the award.

Travel and Relocation

Expenses of travel and relocation are *not* reimbursable.

Term

The awards will be made for one academic year, July 1 through June 30. Candidates may apply on a competing basis for a one-year renewal period.

Submission of Applications

The sponsoring institution shall submit the application on behalf of the applicant. The application must be routed through the usual administrative channels of the sponsoring institution and include endorsement by the applicant's preceptor and the department head. Except for renewal applications, an institution may submit only one application per year.

Applications must be received by the American Diabetes Association no later than November 15 of the year preceding the academic year in which the award is desired. Notification of awards will be made by February 15.

Application forms may be obtained from Mr. J. Richard Connelly, Executive Director, American Diabetes Association, Inc., 18 East 48th Street, New York, New York 10017.

1968 LILLY AWARD

The twelfth Lilly Award will be given at the Twenty-eighth Annual Meeting of the American Diabetes Association at the Sheraton-Palace Hotel in San Francisco on June 15-16, 1968. The following stipulations govern the contest for this annual award, which is supported by Eli Lilly and Company and consists of \$1,000 and a medal.

Purpose: To recognize demonstrated research in the field of diabetes, taking into consideration independence of thought and originality.

Eligibility: Any investigator in an appropriate field of work, closely related to diabetes, who is less than forty years of

age on January 1 of the year in which the award is made. The research will not necessarily be judged in comparison to the work of more mature and experienced workers. The candidate should be a resident of the United States or Canada.

Nominations: Nominations for the award will be solicited from the Members of the American Diabetes Association. Such nominations will be requested by repeated notices to be published in DIABETES. Names of nominees will be sent to the Chairman of the Committee on Scientific Awards and must be received before December 1 of the year preceding the award. The nomination should be accompanied by full information concerning the nominee's personality, training and research work. Six copies of each item should be submitted. No member may send in more than one nomination. A list of the nominee's publications, if any, and six copies of the publication or manuscript for which the award is to be given should also accompany the nomination. At the discretion of the Committee on Scientific Awards, the award may be given for work published during the year prior to December 1 of the year preceding the award. The nominee should be actively engaged at that time in the line of research for which the award is to be made.

Announcement: The name of the winner will be announced in DIABETES. The winner will be invited to present a paper on his work at the Annual Meeting. Papers considered for the award must be submitted with the idea that they will be published in whole or in part in DIABETES if found acceptable to the Editor and/or Editorial Board. If the Committee should decide that no outstanding work has been presented for this consideration, the award will not be made.

Award: In addition to the monetary award and medal, traveling expenses will be given to make it possible for the recipient to receive his award in person at the Annual Meeting.

AVAILABLE BOOKS ON DIABETES FOR PATIENT INFORMATION

The following is a *partial* list of books for the instruction of those who have diabetes and their families. The list is published for the convenience of members of the American Diabetes Association and readers of DIABETES upon the suggestion of the Committee on Information for Diabetics; however, listing of the books does not constitute endorsement or recommendation by the Association.

DIABETES AS A WAY OF LIFE—Revised Edition, 1964 (\$4.50)

Author: T. S. Danowski, M.D.

Publisher: Coward-McCann, Inc., 200 Madison Avenue, New York, N.Y. 10016

HOW TO LIVE WITH DIABETES—Revised Edition, 1965 (\$4.50)

Authors: Henry Dolger, M.D., and Bernard Seeman

Publisher: W. W. Norton & Co., 55 Fifth Avenue, New York, N.Y. 10003

MODERN PILGRIM'S PROGRESS FOR DIABETICS—2nd Edition, July 1967 (About \$4.00)

Author: Garfield G. Duncan, M.D.

Publisher: W. B. Saunders Co., West Washington Sq., Philadelphia, Pa. 19105

ORGANIZATION SECTION

A HANDBOOK FOR DIABETIC CHILDREN—3rd Edition, 1964 (\$3.75)

Authors: Alfred E. Fischer, M.D., and Dorothea L. Horstmann, R.N.

Publisher: Intercontinental Medical Book Corp., 381 Park Avenue S., New York, N.Y. 10016

A DIABETIC NOTEBOOK—Revised Edition, 1967 (\$4.25)

Authors: Blair Holcomb, M.D., E. Murray Burns, M.D., and John W. Partridge, M.D.

Published by: John W. Partridge, M.D., 2222 N.W. Lovejoy Street, Portland, Oregon 97210

DIABETIC MANUAL—10th Edition, 1959 (\$3.75)

Author: Elliott P. Joslin, M.D.

Publisher: Lea & Febiger, 600 South Washington Sq., Philadelphia, Pa. 19106

YOUR DIABETES AND HOW TO LIVE WITH IT—2nd Edition, 1961 (\$1.50)

Authors: Floyd L. Rogers and Ruth M. Leverton, Ph.D.

Publisher: University of Nebraska Press, Lincoln, Nebraska 68508

DIABETIC CARE IN PICTURES—3rd Edition, 1960 (\$5.00)

Authors: Joseph Rosenthal, M.D., and Helen Rosenthal, B.S.

Publisher: J. B. Lippincott Co., East Washington Sq., Philadelphia, Pa. 19105

DIABETES FOR DIABETICS—1965 (\$3.95)

Author: George F. Schmitt, M.D.

Publisher: Diabetes Press of America, Inc., 30 S.E. 8th St., Miami, Fla. 33131

THE DIABETIC'S HANDBOOK—2nd Edition, 1959 (\$5.00)

Author: Anthony M. Sindoni, Jr., M.D.

Publisher: The Ronald Press Company, 79 Madison Ave., New York, N.Y. 10010

LIVING WITH DIABETES—1952 (\$2.50)

Author: Edward Tolstoi, M.D.

Publisher: Crown Publishers, Inc., 419 Park Avenue S., New York, N.Y. 10016

THE NEW WAY TO LIVE WITH DIABETES—1966 (\$3.95)

Authors: Charles Weller, M.D., and Brian Richard Boylan

Publisher: Doubleday & Co., Inc., Garden City, N.Y. 11531

Individual mimeographed copies of the foregoing list may be secured from the Association upon request; however, for the guidance of patients, the list contains the statement that selection should be made only by their physicians.

These books are not available from the American Diabetes Association and all orders should be sent directly to the respective publishers.

FILM ON COMA AVAILABLE

"Nonketoacidotic Coma," a fifteen-minute black and white film featuring T. S. Danowski, M.D., of Pittsburgh, is available through the Committee on Professional Education of the American Diabetes Association for showing to Affiliate Associations, County and State Medical Societies, and other professional audiences around the country. The film discusses five types of nonketoacidotic coma associated with diabetes. The

first type is incidental to the diabetes and the main cause may be a stroke, barbiturate poisoning, or uremia. The second type is related to the presence of hypoglycemia and can be caused by an excess of insulin, chlorpropamide, tolbutamide, or may be the hypoglycemic tail type which represents an early phase of diabetes in some patients. The third type is lactic acidosis and includes tissue hypoxia caused by shock, decreased lactate conversion to pyruvate and decreased plasma bicarbonate without ketoacidosis. The fourth and fifth types are the hyperosmolar types and include hypernatremic and hyperglycemic patients. Hypernatremic patients have a serum sodium in excess of 160 mEq./L., an acetone of zero to trace, a normal plasma and CO₂ value and blood sugar may be normal or increased. The hyperglycemic patient may have a blood sugar in excess of 600 mg. per 100 ml., an acetone of zero to trace, a normal plasma and CO₂ value, and the serum sodium may be increased. A variant of the hyperglycemic type occurs in patients with severe burns.

The film was produced by Campbell Moses, M.D., former Director of the Addison H. Gibson Laboratory, School of Medicine, University of Pittsburgh. It is available for use without charge. The American Diabetes Association will prepay shipping charges to organizations requesting the film. However, films should be returned prepaid if possible.

NOVEMBER 12-18 IS DIABETES WEEK

Following the usual practice of observing official Diabetes Week the week before Thanksgiving, Diabetes Week this year will be November 12-18. Affiliate Associations and Committees on Diabetes of County and State Medical Societies are urged to note this date in making plans for their Public Education and Detection programs.

ADA FORECAST FEATURES ARTICLE ON VASCULAR DISORDERS

"Vascular Disorders in Diabetes," by John A. Colwell, M.D., appears in the July-August issue of ADA FORECAST now at press. The article discusses types of diabetic vascular disorders, symptoms and findings, and methods of treatment. It is illustrated with three diagrams to show arterial circulation in the lower abdomen and legs, an artery opened lengthwise to depict surgical removal of a clot, and a partially blocked leg artery. Copies of the July-August issue will be available at 35¢ each, or six for \$2.00.

lems in diabetes with the faculty in a relaxed and unhurried atmosphere.

The registration fee is \$15.00 for members of the Florida Diabetes Association and \$35.00 for nonmembers. Members should send their registrations to R. T. Rengarts, M.D., P.O. Box 268, Sebring, Florida, and nonmembers to M. E. Morrow, M.D., 1503 Oak Street, Jacksonville, Florida. The program is accepted for fifteen accredited hours by the American Academy of General Practice.

NEWS OF

AFFILIATE ASSOCIATIONS

The Florida Diabetes Association and the Florida State Board of Health, in cooperation with the College of Medicine, University of Florida, and the School of Medicine, University of Miami, will sponsor the Fifteenth Annual Diabetes Seminar on September 28-30, at the Deauville Hotel, Miami Beach, Florida.

The program will begin on Thursday morning, September 28, with James E. Fulghum, M.D., as Moderator. Participants and their topics will be: "The Natural History of Diabetes," H. St. George Tucker, M.D.; "The Education of the Diabetic," Glen W. McDonald, M.D.; "The Use and Abuse of Insulin," Joseph C. Shipp, M.D.; "Alcohol Hypoglycemia," Leonard L. Madison, M.D. A panel discussion on "The Primary Lesion of Diabetes" will follow. In the afternoon, Seymour L. Altman, M.D., will be the Moderator of a program which will include: "The Endocrinology of the Diabetic Pregnancy," by Emery C. Miller, M.D.; "Infants Born to Diabetic Mothers," by Ira H. Gessner, M.D.; "The Juvenile Diabetic," by E. T. Davidson, M.D.; and a panel discussion on "Lactic Acidosis and Diabetes."

On Friday morning, September 29, William C. Thomas, M.D., will be the Moderator and the program will have the following papers: "Diabetes as Seen by the Endocrinologist," by Raymond V. Randall, M.D.; "Insulin: Its Synthesis and Release," by Herbert A. Burke, M.D.; and "Glucagon and Glucagonoma," by Robert B. Katims, M.D. The morning session will conclude with a panel discussion on "Insulinogenic and Noninsulinogenic Hypoglycemia." The afternoon session, at which R. T. Rengarts, M.D., will be Moderator, will include: "Diabetic Neuropathy," by Max Ellenberg, M.D.; "Cardiovascular Disease in Diabetes," by John A. Spittel, M.D.; "Diabetic Nephropathy," by James R. Cade, M.D.; "Nonrenal Infections in Diabetes," by Joseph E. Johnson, M.D.

The session on Saturday, September 30, will be conducted informally by the Moderators at designated cabanas at the pool and will give registrants an opportunity to discuss prob-

NEWS NOTES

CONFERENCE ON NUTRITION AND METABOLISM

The Twelfth Annual Conference on Nutrition and Metabolism will be held in Philadelphia on Wednesday afternoon, October 18. The Conference is sponsored by the Committee on Nutrition and Metabolism of the Philadelphia County Medical Society, the Philadelphia Pediatric Society and the Council on Foods and Nutrition of the American Medical Association. Further information may be obtained from Dr. Michael G. Wohl or Dr. Charles R. Shuman, Co-Chairmen, Committee on Nutrition and Metabolism, Philadelphia County Medical Society, 2100 Spring Garden Street, Philadelphia, Pa. 19130.

PERSONALS

FRANCIS D. W. LUKENS, M.D., a Past President of the American Diabetes Association, delivered the Forty-third Kober Lecture of the Georgetown University School of Medicine in Washington, D.C., on April 19. His lecture, entitled "Diabetes Mellitus—1967," was one of a series to honor the memory of Dr. George M. Kober, a former Dean of the medical school. The lecturer this year was chosen by the Association of American Physicians.

Dr. Lukens was Professor of Medicine at the University of Pennsylvania prior to his retirement in 1966. At present, he is Chief of Staff of the Veterans Administration Hospital in Pittsburgh. For the past three years he has performed extensive research in adrenal cortex and diabetes, experimental diabetes, and insulin and protein metabolism.
