Corrigenda

Cloning and characterization of a human ribosomal protein gene with enhanced expression in fetal and neoplastic cells

by Jing-hsing Ou, T.S.Benedict Yen, Yan-Fei Wang, Wing K.Kam and William J.Rutter

_Nucleic Acids Research, 15, 8919–8934 (1987)_

Figures 6 and 7 are reversed although the legends are correct.

Potential secondary structure at translation—initiation sites

by M.C.Ganoza, E.C.Kofoid, P.Marlière and B.G.Louis

_Nucleic Acids Research, 15, 345–360 (1987)_

In the paper entitled ‘Potential secondary structure at translation—initiation sites’, the column headings in Table 1 (page 349) are wrong. They should read:

<table>
<thead>
<tr>
<th>U</th>
<th>C</th>
<th>A</th>
<th>G</th>
<th>Total</th>
<th>U</th>
<th>C</th>
<th>A</th>
<th>G</th>
<th>Total</th>
</tr>
</thead>
</table>

as is obvious from the distributions in rows 35–37 of the table.

The authors apologize for this error, and wish to thank Dr P.Bonham-Smith of the University of Arizona at Tucson for calling it to their attention.
