

January 1 of the year in which the award is made. The research will not necessarily be judged in comparison to the work of more mature and experienced workers. The candidate should be a resident of the United States or Canada.

Nominations: Nominations for the award will be solicited from the Members of the American Diabetes Association. Such nominations will be requested by repeated notices to be published in *DIABETES*. Names of nominees will be sent to the Chairman of the Committee on Scientific Awards and must be received before December 1 of the year preceding the award. The nomination should be accompanied by full information concerning the nominee's personality, training and research work. Six copies of each item should be submitted. No Member may send in more than one nomination. A list of the nominee's publications, if any, and six copies of the publication or manuscript for which the award is to be given should also accompany the nomination. At the discretion of the Committee on Scientific Awards, the award may be given for work published during the year prior to December 1 of the year preceding the award. The nominee should be actively engaged at that time in the line of research for which the award is to be made.

Announcement: The name of the winner will be announced in *DIABETES*. The winner will be invited to present a paper on his work at the Annual Meeting. Papers considered for the award must be submitted with the idea that they will be published in whole or in part in *DIABETES* if found acceptable to the Editor and/or Editorial Board. If the Committee should decide that no outstanding work has been presented for this consideration, the award will not be made.

Award: In addition to the monetary award and medal, traveling expenses will be given to make it possible for the recipient to receive his award in person at the Annual Meeting.

NEWS OF AFFILIATE ASSOCIATIONS

The *DIABETES ASSOCIATION OF THE DISTRICT OF COLUMBIA* has scheduled a meeting for Sunday, September 15, to begin at 2:30 p.m. at the Washington Hospital Center Auditorium. The eye as affected by diabetes, and surgery and the diabetic will be the subjects for discussion.

The *DIABETES LAY SOCIETY OF GREATER KANSAS CITY* has established a workshop for Public School Nurses with the cooperation of the Kansas City Public School system. The workshop, planned for October 3, will be a half-day session starting at 1:00 p.m., at the Public Library in Kansas City. Participants from the fifty-seven schools in the city are expected to attend. The principal theme of the workshop will be the special care and control of the juvenile diabetic.

The *NEW YORK DIABETES ASSOCIATION* will present its Sixteenth Annual Symposium at the Barbizon-Plaza Hotel on Saturday, October 12. The theme of the Symposium will be "Genetic and Environmental Factors in Diabetes Mellitus." The preliminary program follows:

Morning Program, 9:00-12:15: "General Genetic Aspects of Diabetes," by Nancy E. Simpson, Ph.D., Associate Professor of Departments of Biology and Pediatrics, Queen's University, Kingston, Ontario, Canada; "Is Diabetes a Hetero-

geneous Group of Disorders?" by David L. Rimoin, M.D., Ph.D., Assistant Professor of Medicine and Pediatrics and Director of the Medical Genetics Clinic, Washington University School of Medicine; "Environmental Modifications of Carbohydrate Metabolism," by Robert E. Greenberg, M.D., Associate Professor of Pediatrics, and Norman Kretchmer, M.D., Ph.D., Professor and Chairman, Department of Pediatrics, Stanford University Medical School.

Afternoon Program, 1:45-4:30: "The Physiology of Starvation Diabetes," by M. G. Herrera, M.D., Assistant Professor of Medicine, Harvard School of Public Health and Research, Elliott P. Joslin Laboratory; "Experimental Aspects of Diabetes Mellitus," by Bruno W. Volk, M.D., Director of the Isaac Albert Research Institute and Clinical Professor of Pathology, State University of New York Downstate Medical Center, and Sydney S. Lazarus, M.D., Associate Director and Chief of Pathology, Isaac Albert Research Institute; and "What Is Diabetes Mellitus," by I. Arthur Mirsky, M.D., University Professor-at-Large, and Director of the Laboratory of Clinical Science, University of Pittsburgh.

NEWS NOTES

PROGRAM OF OUTPATIENT EDUCATION IN CONTROL OF DIABETES MELLITUS

The Diabetes Detection and Education Center, 916 East 15th Street, Minneapolis, Minnesota, has developed a program of medical and paramedical education for physicians, nurses, public health personnel, and dietitians. The course includes five days of intensive instruction in the medical, nursing and dietetic team approach to management of diabetes mellitus in the outpatient. Classes were held on July 22 and August 5. Future classes will be given August 26, September 9, September 23, October 7, October 28, November 4, November 18, December 2, December 16, and December 30. Further information may be obtained by writing Donnell D. Etzwiler, M.D., Project Director, or Ephraim B. Cohen, M.D., Adult Diabetes.

CLINICAL PATHOLOGY CONGRESS

The seventh International Congress of Clinical Pathology will be held in Montreal July 13-19, 1969, under the joint auspices of the Canadian Association of Pathologists, the Canadian Society of Clinical Chemists and the Canadian Association of Medical Bacteriologists. The tentative program includes a symposium on "Inborn Errors in Metabolism" to be held on Friday, July 18. Inquiries regarding the Congress should be directed to: VII International Congress of Clinical Pathology, P.O. Box 8, Station "G," Montreal 18, Canada.
