SOFT TISSUE CALCIFICATION IN CHRONIC RENAL FAILURE

Editor
Tilman B. Drueke
CONTENTS

1. Foreword: Extraskeletal calcifications in patients with chronic renal failure
   T. B. Drüeke ................................................................. 330

2. Effects of excess calcium load on the cardiovascular system measured with electron
   beam tomography in end-stage renal disease
   P. Raggi ................................................................. 332

3. Cardiovascular calcification in end-stage renal disease
   I. B. Salusky and W. G. Goodman ................................................. 336

4. The impacts of improved phosphorus control: use of sevelamer hydrochloride in patients
   with chronic renal failure
   N. Amin ................................................................. 340
