

In the 1 July 2008 issue of the *Journal*, in the article by Reif et al. (Reif DM, McKinney BA, Motsinger AA, et al. Genetic basis for adverse events after smallpox vaccination. *J Infect Dis* 2008; 198:16–22), there are labeling errors in table 3: for both the 839 SNP of gene *IRF1* and the 2243290 SNP of gene *IL4*, the genotype labels for the second and third rows should be transposed; the corrected genotype labels are as follows (note that, although the labels have been transposed, the frequencies remain the same):

<i>IRF1</i> SNP 839		
GG	39 (46)	17 (37)
AG	43 (51)	24 (52)
AA	3 (4)	5 (11)
<i>IL4</i> SNP 2243290		
CC	53 (62)	34 (74)
AC	26 (31)	12 (26)
AA	6 (7)	0 (0)

The authors regret these errors.
