

during the month of February. Those in the allied health professions who are interested in attending should write to J. Richard Connelly, Executive Director, at the Association's national office. The program is approved by The American Dietetic Association for seventeen hours of continuing education for Registered Dietitians.

RESEARCH GRANTS PROGRAM

The Research Grants Program inaugurated three years ago by the Association's Committee on Research is being continued for the current year. Awards in excess of \$5,000 will not be made and applications for amounts between \$3,000 and \$5,000 are appropriate. These grants carry no commitment for overhead costs and expenditure for travel is not permitted.

The funds are unencumbered other than that they are to be used in research activities related to diabetes mellitus. Their purpose is to provide, for example, a necessary piece of equipment for which funds are not otherwise available, which would be useful on several projects in a given laboratory. The grant may be used for equipment and/or supplies and/or salary for technical assistance. The funds may be used in connection with a single research project or may be employed in more than one.

Applications should be by letter addressed to Mr. J. Richard Connelly, Executive Director, American Diabetes Association, Inc., 18 East 48th Street, New York, New York 10017; and be endorsed by the director of the laboratory, the chairman of the department, the dean of the school, and, when required by the parent university, the institutional officer authorized to sign grant requests. Grants are limited to institutions within the United States and its possessions. Recipients may not transfer grants in whole or in part between institutions without prior approval of the Committee on Research.

The letter of application should include the following:

1. A complete outline of the applicant's past and present research activities.
2. A proposed budget listing in itemized form the envisioned use of the research grant.
3. A list of all related current support from other sources giving total amounts, source and period over which each grant extends.
4. Reasons for which application is being made for this grant.

Letters of application for grants to be awarded July 1 must be in the New York Office before March 1 of the same year. Renewal applications will compete with all other applications submitted for that particular year.

NEWS OF AFFILIATE ASSOCIATIONS

The GREATER AKRON AREA DIABETES ASSOCIATION will hold its Fourth Annual Postgraduate Seminar in Diabetes at the Holiday Inn in Akron, Ohio, on April 14, 1971. Speakers at the Seminar will include Dr. Robert F. Bradley, Medical Director, Joslin Clinic; Dr. George F. Cahill, Jr., Professor of Medicine and Director, Joslin Research Laboratories, Harvard
