ANESTHESIOLOGY REFLECTIONS FROM THE WOOD LIBRARY-MUSEUM

“Pure Nitrous Oxide” Advertised by F. D. Davis, D.D.S.

DR. F. D. DAVIS

is a GRADUATE of the Pennsylvania College of Dental Surgery, and is the ONLY dentist in Minerva who is a graduate.

His office is supplied with all the latest improved appurtenances for the skillful practice of Oral Surgery.

He makes a SPECIALTY of gold, amalgam, and plastic fillings—inserting artificial crowns on the roots of frail teeth, and the treatment of all diseases pertaining to the Oral Cavity.

Artificial teeth are the only substitute for the loss of the natural organs. They should always be well made, perfectly fitted, and in color, size, shape, and so far as possible, in arrangement, should duplicate the natural teeth. He attains these requirements in all cases.

Teeth extracted without pain by the use of pure Nitrous Oxide Gas.

Prices reduced and all work guaranteed.

Office: Corner Mill and High Streets, over Roller's Drug Store, Minerva, O.

Very Respectfully,
F. D. Davis, D. D. S.,
DENTAL OFFICE:
Corner Mill and High Sts., Over Roller's
Drug Store, Minerva, O.

[OVER]

[OVER]

From the town of Minerva, Ohio, Fremont D. Davis, D.D.S. (*left*), advertised painless dentistry “by the use of pure Nitrous Oxide Gas” (*right*). Sadly, his personal health was hardly pain free. While driving back into Minerva, Dr. Davis's buggy was struck after a railroad flatcar bumped into a switch. As his horse bolted, the hapless dentist was “dragged out over the dashboard and severely injured.” This trade card is part of the Wood Library-Museum's Ben Z. Swanson Collection.
