ANESTHESIOLOGY REFLECTIONS FROM THE WOOD LIBRARY-MUSEUM

From Water to Ether: Oconee Hill Cemetery

In Athens in northeastern Georgia, Oconee Hill Cemetery stretches near East Campus Road, opposite Sanford Stadium, the home of the University of Georgia's Bulldogs. The cemetery's hill was named after part of the Oconee River, itself named after the Oconee tribe of Native Americans. Claiming southeastern Georgia's Okefenokee Swamp as their original homeland, the Oconees had their current name anglicized from the Itsati or Hitchiti-Creek word Okvni for "born from water." Many anesthesiologists treasure Oconee Hill Cemetery as the burial site for physician-pharmacist Crawford Williamson Long, M.D. (1815 to 1878), who etherized James Venable on March 30, 1842.
