

Hemodynamic Responses to Crystalloid and Colloid Fluid Boluses during Noncardiac Surgery: Erratum

In the online first article that published on November 1, 2021, the unit of measure in figure 1 was mislabeled as “mmHg.” The correct label is $\text{L} \cdot \text{min}^{-1} \cdot \text{m}^{-2}$. The corrected figure and legend appear below.

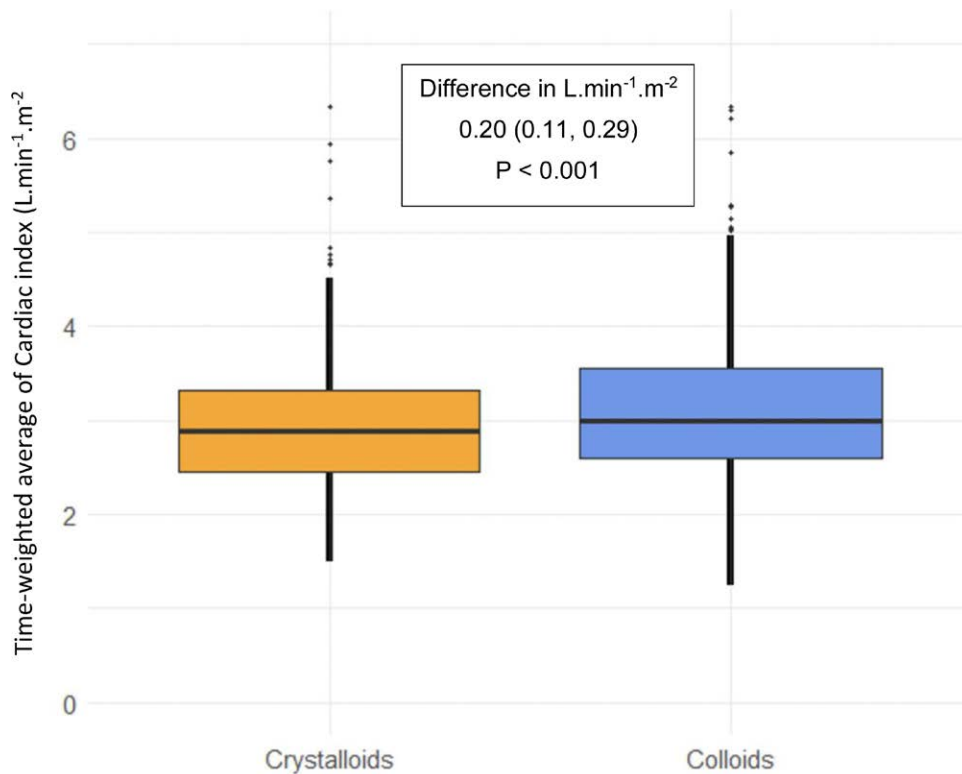

Fig. 1. Time-weighted average of cardiac index plotted by choice of fluids. The time-weighted average of the cardiac index was compared between fluid groups using a linear model with adjustments for smoking status and preoperative hemoglobin. Using $N = 973$ measurements, a significant difference in means was detected.

The authors regret this error. The online version and PDF of the article have been corrected.
