Correction

Errors in Results

In the Research Letter titled "Use of Artificial Intelligence in Drug Development," published May 31, 2024, 2 percentages in the Results section were given incorrectly. The percentage of drugs for which AI was used for a cancer indication should have appeared as 32% instead of 27%, and the number and percentage of drugs for which AI was used for a neurological indication should have appeared as n = 46 and 28% instead of 24%. This article has been corrected.1
