Article on CIC-3 and cancer drug resistance

In the article on CIC-3 and cancer drug resistance in the March 2007 (1) issue, the legend for Fig. 4B was incorrect. The apparent IC_{50} values were reported incorrectly and should be as follows: *black circle*, $IC_{50} = 1790.14 \pm 174$; *red circle*, $IC_{50} = 470.50 \pm 43$.
