

SUBJECT INDEX

- Activated sludge
 - and bulking systems 101-111
 - and edible oil refinery wastewater 225-234
 - and pulp and paper wastewater treatment, Finland 199-206
 - and strong fermentation wastewater treatment 65-73
- Activated sludge flocs, settleability, effect of temperature and pH 249-254
- Aerated lagoon treatment plant, and paper mill effluents 255-263
- Agricultural wastewaters, and stratified facultative lagoon 43-50
- Agro-industrial treatment plants 101-111
- Agro-industries, vegetable residues, treatment 33-41
- Ammonium fertilizer effluent, aerobic treatment, fixed-film biological system 75-84
- Anaerobic biological fluidized bed process, and monosodium glutamate fermentation 149-155
- Anaerobic digestion, vegetable residues, agro-industries 33-49
- Anaerobic filter treatment, dairy wastewater 191-198
- Anaerobic filter, and edible oil refinery wastewater treatment 225-234
- Anaerobic Fluidized-Bed Reactor 157-166
- Anaerobic fluidized-bed treatment, brewery wastes 157-166
- Anaerobic industrial waste treatment, brewery wastes 157-166

- Black liquor, rotating disc system treatment 207-214
- Brewery wastewater treatment
 - anaerobic fluidized-bed treatment 157-166
 - stable refuse 25-32
- Bulking sludge
 - control, agro-industrial treatment plants 101-111
 - and mixed activated sludge systems 101-111

- Citric acid wastewater, two-phase contact treatment process 175-182
- Coagulation, food industry wastewater 1-8
- Coliphage, removal from wastewater effluent 59-63

- Composting, vegetable residues 33-41
- Contact process, and citric acid wastewater treatment 175-182
- Crops, and wastewater irrigation 51-57

- Dairy effluents, physico-chemical pretreatment 93-100
- Dairy sludge, agricultural use 93-100
- Dairy wastewater, anaerobic filter treatment 191-198
- Discontinuous activated sludge process, and edible oil refinery wastewater treatment 215-223
- Dissolved Air Flotation treatment plant, edible oil refinery wastewater 225-234

- Edible oil refinery industry wastewater treatment alternatives 225-234
 - and pollution 215-223
- Environmental pollution, and edible oil refinery wastewater 215-223

- Fermentation waste, activated sludge treatment 65-73
- Finland, pulp and paper industry wastewater 199-206
- Fish processing, and wastewater reuse 113-121
- Fixed-film biological system, and ammonium fertilizer effluent aerobic treatment 75-84
- Fixed-film reactor 75-84
- Food industry, wastewater 1-8

- Granules, upflow activated sludge blanket reactor, formation and maintenance 272-280

- Hawaii, and sugar cane wastewater 131-140
- Helminth eggs, and vegetable contamination 51-57

- Irrigation, wastewater, and vegetable contamination 51-57

- Monosodium glutamate fermentation wastewater, treatment, anaerobic biological fluidized

- bed process 149-155
- Municipal solid waste, vegetable residues, treatment 33-41
- Olive mill plants, wastewater treatment 235-240
- Packed-bed reactor, anaerobic, poultry processing wastewater 9-16
- Paper mill effluent, biological treatment 255-263
- Pharmaceutical industry wastewater, activated sludge treatment 65-73
- Phased-recycled flocs system, in treatment of citric acid wastewater 175-182
- Phototrophic bacteria, and wastewater effluent coliphage removal 59-63
- Physico-chemical pretreatment, dairy effluent 93-100
- Plastic medium upflow anaerobic filter, and dairy wastewater treatment 191-198
- Poultry processing, wastewater 9-16
- Pulp and paper industry wastewater treatment, activated sludge 199-206
- Refuse, and brewery wastewater treatment 25-32
- Rotating disc system treatment
 - biofilm kinetics 207-214
 - black liquor 207-214
- Sequencing batch reactor activated sludge process, and soybean fermentation wastewater 85-92
- Settleability, activated sludge, temperature and pH effects 249-254
- Sludge
 - dairy, agricultural use 93-100
 - granular, parameters affecting 275-280
- Soybean fermentation wastewater
 - activated sludge process 141-147
 - biological treatment 141-147
 - nutrient and BOD removal, sequencing batch reactor activated sludge process 85-92
- Stratified facultative lagoon, treatment, agricultural wastewater 43-50
- Sugar beet wastewater treatment, management and anaerobic technologies 123-130
- Sugar cane wastewater treatment 131-140
 - management 131-140
- Sunflower seed oil, industry, wastewater treatment 241-248
- Temperature
 - and anaerobic filter treatment, wastewater 191-198
 - and upflow activated sludge blanket reactor 183-190
- Textile industry
 - Turkey, wastewater types 265-274
 - wastewater treatment 17-24, 265-274
- Thailand, and fish processing industry 113-121
- Tuna processing, and wastewater 113-121
- Turkey
 - agro-industrial wastewaters 175-182
 - textile industry wastewaters, treatment 265-274
- Upflow anaerobic sludge blanket reactor
 - and edible oil refinery wastewater treatment 225-234
 - granule formation, and maintenance 275-280
 - and high temperature wastewater treatment 183-190
 - mesophilic, and effect of short-term performance increase 183-190
 - and sugar beet wastewater 123-130
 - and winery wastes 167-174
- Vegetables, helminth egg contamination 51-57
- Vegetable residues, anaerobic digestion, and composting 33-41
- Wastewater, *see named types*
- Winery wastewater, upflow anaerobic sludge blanket treatment 167-174
