

Erratum

Increased Cardiometabolic Risk Factors and Inflammation in Adipose Tissue in Obese Subjects Classified as Metabolically Healthy. *Diabetes Care* 2014;37:2813–2821

DOI: 10.2337/dc14-er11

During production, an error was introduced to the RESULTS section of the abstract. The sentence “Moreover, < 30% of patients classified as MHO according to fasting plasma glucose exhibited IGT or T2D” should read “Moreover, above 30% of patients classified as MHO according to fasting plasma glucose exhibited IGT or T2D.” We regret the error.

The online version reflects these changes.
