NOMINATIONS FOR LILLY AWARD DUE DECEMBER 15, 1984

The 1985 Lilly Award will be given at the forty-fifth Annual Meeting of the American Diabetes Association. The following stipulations govern the contest for this annual award, which is supported by Eli Lilly and Company and consists of \$2,000 and a medal.

PURPOSE: To recognize demonstrated research in the field of diabetes, taking into consideration independence of thought and originality.

ELIGIBILITY: Any investigator in an appropriate field of work closely related to diabetes who is less than forty years of age on January 1, 1985. The research will not necessarily be judged in comparison with the work of more mature and experienced workers. The candidate should be a resident of the United States or Canada.

NOMINATION: Nominations for the award will be solicited from members of the American Diabetes Association. Such nominations will be requested by repeated notices to be published in *Diabetes* and *Diabetes Care*. Nominations must be received prior to December 15, 1984. The nominations should be accompanied by full information concerning the nominee's personality, training, and research work. Fifteen copies of each item should be submitted.

No member may send in more than one nomination. The nominee should be actively engaged at that time in the line of research for which the award is to be made. Nominations should be addressed to the Committee on Research, American Diabetes Association, Inc., 2 Park Avenue, New York, New York 10016.

AWARD: In addition to the monetary award and medal, travel expenses will be given to make it possible for the recipient to receive the award in person at the Annual Meeting.

ANNOUNCEMENT: The name of the winner will be announced in *Diabetes* and *Diabetes Care*. The winner will be invited to present a paper on his or her work at the Annual Meeting's Scientific Sessions.

ADA FEASIBILITY GRANT PROGRAM

Applications for Feasibility Grants from the American Diabetes Association are due *February 1, 1985* for funding beginning August 1, 1985. Applications for two years of support for amounts up to \$25,000 per year will be considered. Funding for the second year will be provided only upon receipt of a report satisfactory to the Committee on Research of the recipient's research activities and progress. Grants are limited to institutions within the United States and U.S. possessions. These grants carry no commitment for overhead costs or tuition. The funds may *not* be used for training stipends, postdoctoral fellowships, professional salaries, or other nontechnical salaries. Otherwise, the funds are unencumbered other than that they are to be used in research activities related to diabetes mellitus for the project described in the year of the award. The funds may be used for equipment and/or supplies and/or salary for technical assistance. Funds up to \$1,000 may also be used for travel to diabetes-related scientific meetings.

The purpose of this program is to assist investigators who want to test the feasibility of diabetes-related new and imaginative ideas in order to obtain preliminary data upon which a subsequent grant application could be based and submitted to NIH or other funding agencies. The program is intended primarily for new investigators without prior NIH or other significant support, for established investigators in the field of diabetes who are proposing projects which constitute a major departure from their ongoing research, or for established investigators in other fields who are proposing projects in which they will transfer their special ex-

pertise to diabetes-related research. Investigators who have previously received pilot and feasibility money may not reapply for such funding in the same area of work.

Descriptive outlines and application forms may be obtained from the Contracts and Grants office of your institution or from Lauren Smith, American Diabetes Association, Inc., 2 Park Avenue, New York, New York 10016.

LIONS CLUBS INTERNATIONAL RESEARCH PROGRAM

The American Diabetes Association has again been selected to administer the Lions Clubs International Research Program for 1984. This program funds Research Grants in the United States and throughout the world. Grants are restricted to research related to diabetic retinopathy and may be in the form of Pilot and Feasibility Grants, Research and Development Awards, and Fellowships. Deadline for applications is December 21, 1984. For applications, contact the American Diabetes Association, Inc., 2 Park Avenue, New York, New York 10016, ATTENTION: Lions Clubs International Research Program.

12th IDF CONGRESS

The 12th Congress of the International Diabetes Federation will be held in Madrid, Spain on September 23–28, 1985. The Congress will be held at

the Palacio de Exposiciones y Congresos, Paseo de la Castellana, 99, Madrid, Spain.

The program will include Update Lectures, Memorial Lectures, Workshops, Symposia, Free Communications, and Poster Sessions with more than 50 main topics on basic and clinical diabetology.

Also, as an essential part of the program, 2½ days will be spent on diabetes education and 2½ days on comprehensive patient care, mainly addressed to non-physicians and diabetic patients. These sessions will run parallel to the basic and clinical diabetology programs.

The deadline for abstract reception at the Secretariat is January 15, 1985. The address of the Secretariat is as follows: 12th Congress of the International Diabetes Federation, % Andres Mellado, 33 1° A Madrid 15, Spain. Tel: 449 04 30 and 279 04 95. Telex: 22040 NSPA.
