Retraction notices

Retraction notice to "Inhaled foreign bodies: management according to early or late presentation"

Sameh Ibrahim Sersar a,*, Usama Ali Hamza a, Wael AbdelAziz Abdel Hameed a, Reda Ahmed AbulMaaty a, NourEldean Noaman Gowaeli a, Sherif Abdou Moussa b, Shawki Mahmoud AlMorsi c, Muna Mohammed Hafez d

a Cardiothoracic Surgery, Mansoura University, 35516, Egypt
b Anaesthesia and ICU, Mansoura University, 35516, Egypt
c ENT, Mansoura University, 35516, Egypt
d Pediatrics, Mansoura University, 35516, Egypt

This article has been retracted at the request of the authors and/or the Editor-in-Chief.
Reason: The authors have plagiarized part of a paper that had already appeared in Clin. Radiol., 59 (2004) 609–615, doi:10.1016/j.crad.2004.01.006. One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not been copied from another article prepared by another group of authors. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and we apologize to readers of the journal and the original authors that this was not detected during the submission process.

Retraction notice to "Iatrogenic perforation of the right pulmonary artery"

John J. Trujillo *, Sergio Beltrame, Stefano Urso, Gonzalo Aldamiz-Echevarria

Department of Cardiac Surgery, Clínica Capio, Plaza del Madroño 11, C.P 02006, Albacete, Spain

This article has been retracted at the request of the author and/or the Editor-in-Chief.
Reason: The authors have described the same case that had already appeared in Eur. J. Cardio-Thorac. Surg., 34 (2008) 903, doi:10.1016/j.ejcts.2008.06.043. One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and we apologize to readers of the journal that this was not detected during the submission process.
