

In the article by McGahon et al, entitled “BCR-ABL Maintains Resistance of Chronic Myelogenous Leukemia Cells to Apoptotic Cell Death” which appeared in the March 1, 1994 issue (Vol 83, No 5, pp 1179-1187), a correction should be noted. The last two authors (D.R. Green and T.G. Cotter) contributed equally to the strategy, design, supervision, and support of the research and therefore share senior authorship of the paper.
