Astronomy & Geophysics is a journal for the publication of serious scientific articles of interest to a broad range of astronomers and geophysicists. Contributions can take the form of Review Articles (up to 6000 words), Articles (up to 3500 words), News and Correspondence (up to 800 words). Articles are subject to peer review; other contributions are reviewed at the Editor’s discretion.

Articles and Review Articles cover any topic likely to be of interest to members of the RAS. You should introduce material at a level comprehensible to a graduate in the subject, but should not limit discussion to this level. Editorial policy is to encourage contributions of accuracy and scientific authority over a wide range of interest, with a topical slant where feasible. The Editor welcomes lively writing and a variety of personal styles, but reserves the right to reject material that is unsuitable.

It is helpful if articles can be provided in electronic form; we use Word6. Other word processor formats, Tex and LaTeX are also acceptable; RTF files are preferred. If preferred, use ftp to the directory /AandG in /pub at “earth.leeds.ac.uk”. Whatever submission route is preferred, authors should avoid unnecessary formatting. Manuscripts must include a brief, informative abstract of about 150 words. The body of the text should be divided into sections as appropriate, without numbering. Use SI units where appropriate and explain acronyms as necessary. The edited text is faxed to authors for approval as page proofs; corrections and changes must be returned promptly.

Illustrations, both images and diagrams, are welcome; we prefer a small number of high-quality illustrations. The Editor has discretion over which to accept: the main criteria are content and quality. Illustrations should be sent digitally in a vector file format, preferably TIF. Please do not embed files in the text but send them separately. Authors should also send printed copies. Good quality prints or transparencies are also suitable. Number figures in sequence and label with the main author’s name and the figure number. Give brief but informative figure captions.

References should follow the style of Monthly Notices of the RAS, giving abbreviated journal title and first and last page numbers. In the text, references should cite authors and date, using et al. for three or more authors. References to larger works such as books should include the page number. Authors alone are responsible for ensuring that their references are correct.

Astronomy and Geophysics can provide rapid publication for topical articles: at the Editor’s discretion, articles can be published within two months of submission.

A&G News pieces are shorter items of topical interest, reports on major international meetings, summaries of advances in specialist fields and so on. Suggestions are welcome: please contact the Editor. A&G Views publishes letters of general interest and timely scientific correspondence. Letters may be edited for reasons of clarity and space.

All contributions should be submitted to the Editor, Dr Sue Bowler, Astronomy and Geophysics, The School of Earth Sciences, The University of Leeds, Leeds LS2 9JT, Britain. Electronic submission is preferred: send discs or e-mail to “s.bowler@earth.leeds.ac.uk”.

Submission implies that the manuscript has not been previously published nor currently submitted for publication elsewhere. On acceptance of a manuscript, authors are required to transfer the copyright to the RAS. It is the authors’ responsibility to obtain permission to publish any copyright material. Sue Bowler, March 1999.
