
Subject Index

A

Adipose tissue, 83
Alternative therapy, 182

B

Basal metabolic rate, 152
Borderline diabetes, 30

C

C-peptide, 136
Calorie intake, 152
Calorie restriction, 161, 165
Carbohydrate, 172
Cell proliferation, 89
Cesarean section, 79
Childhood IQ, 121
Congenital malformation, 94
Consequences in offspring, 115
Contraception, 147
Country of birth, 35

D

Diabetes after GDM, 131
Diagnostic criteria, 30
Diastolic function, 56
Diet, 161, 165

E

Energy requirements, 152
Epidemiology, 3, 191
Exercise, 175, 179, 182

F

Fetus, 51
 Growth, 44, 61, 99
 Pancreatic β -cell, 89
Follow-up, 131
Free oxygen radicals, 94
Fuel metabolism, 94

G

Gestation, 157
Gluconeogenesis, 83
Glucose
 Intolerance, 179
 Response, 172
 Tolerance, 109, 126, 131, 136, 142, 193

Tolerance Test, 14
 Oral, 8

Glycosuria, 30
Growth, 121
Growth factors, 51

I

Idazoxan, 109
Impaired glucose tolerance, 3
Incidence, 35
Infant, 66
Infant heart, 56
Insulin, 18, 136, 186
 Receptors, 18
 Resistance, 18
 Secretion, 18, 109
 Sensitivity assessment, 39
 Treatment, 193
Intrauterine
 Environment, 126
 Hyperglycemia, 109
Iron, 151
Islet function, 115

K

Ketonemia, 165

L

Lipids, 142
Liver, 51
Low-protein diet, 115

M

Macrosomia, 61, 66, 79, 89, 161, 186, 193
Meals, 172
Metabolic disturbances, 157
Metabolism
 Maternal, 99
 Offspring, 106

N

Natural history of GDM, 142
Neonate, 71
Newborn behavior, 121
Nutrition, 44, 172

O

Obesity, 61, 121, 165
Offspring of diabetic mothers, 121

P

Pancreatic β -cells, 99
Perinatal
 Complications, 74
 Morbidity and mortality, 14
 Outcome, 25
Pima Indians, 126
Placenta, 44
Placental transfer, 83
Preconception counseling, 147
Preeclampsia, 79
Prevalence, 25
Prior GDM, 136
Proinsulin, 136
Prospective study, 8

R

Race, 25
Receptors, 51

S

Screening, 3
Screening test, 14
Severity, 35
Starvation, 83
Superoxide dismutase, 94

T

Translation, 191
Treatment of hypoglycemia, 71
Treatment, 157
Type II diabetes, 175

U

Ultrasound, 66

V

Vitamin-mineral supplements, 151

W

Weight gain during pregnancy, 151
