
Erratum

An incorrect figure was inadvertently printed in the article by Marchetti et al., "Massive Isolation, Morphological and Functional Characterization, and Xenotransplantation of Bovine Pancreatic Islets," which was published in the April 1995 issue (44:375–381, 1995). The correct figure and legend are printed below.

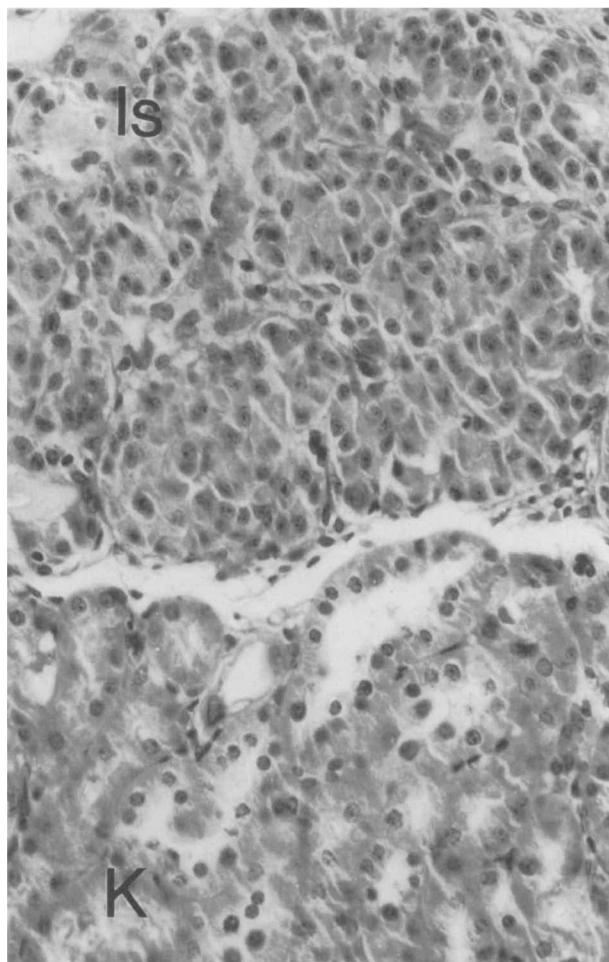

FIG. 7. Hematoxylin-eosin staining of bovine islets under the kidney capsule of a nude mouse 28 days from implantation (magnification 250 \times). Is, islets; K, kidney.
