

MEIER AND SHOEMAKER ESSENTIALS OF BIOLOGY

NEW EDITION

This standard high school biology provides ample material for an entire year's work for students in secondary schools.

Looking Forward

The time for preparing your work for the second half of the school year is here.

THE NEW ESSENTIALS OF BIOLOGY. Material for the late winter, spring, and summer work may be selected easily.

Where else can you find another biology textbook of 725 pages, with 464 illustrations, with such modern text material, excellent printing, and superior binding for only \$1.80?

THE MEIER AND MEIER NOTEBOOK. It may be used with any biology textbook or in schools where two or more textbooks are in use. It is adaptive for use in community high schools, township high schools or senior high schools. In addition to the material commonly found in the ordinary workbook it gives directions for field work, suggestions for the study of living materials in the laboratory with spaces for notes, and it serves as a course of study. \$0.84.

THE MEIER HERBARIUM AND PLANT DESCRIPTION. A new printing of the Meier Herbarium and Plant Description has come from the press. This book has been used by many thousands of schools. It gives students an opportunity to make studies of special problems, such as: trees in forests, in parks, and along city streets; roadside plantings, plants that prevent erosion, and shrubbery surrounding the home. Studies may also be made of weeds and other harmful plants. The blank page at the right may be used for drawings or for mounting leaves and other distinguishing parts. \$1.12. Packages of 25 sheets with directions and index \$0.48.

To Our Readers:

A part of the success of the **American Biology Teacher** is due to the generous support that our advertisers have given us.

We owe it to ourselves, as educators, to become more familiar with the abundance of excellent teaching aids and devices that these concerns produce.

A post card to any of our advertisers will bring you catalogues or circulars listing many products of real pedagogical interest and value.

Nomination for Membership

in the

National Association of Biology Teachers

Please fill in blank below or write out on separate sheet and mail to P. K. Houdek, Secretary-Treasurer, Robinson, Illinois.

..... 1941

I nominate of the

School, at, for membership in the National Association of Biology Teachers, which includes subscription to the **American Biology Teacher**.

Featherweight Light Screen

For Photosynthesis

The new Turtox light screen weighs only 10 grams, yet is completely weather-proofed, adequately ventilated and durable enough to give years of service. Priced at only 75¢ each (7.50 per dozen), you can afford to have each student carry out his own photosynthesis experiment.

Ask us to send one for your inspection.

The Sign of the Turtox Pledges Absolute Satisfaction

WHY ABSTRACTS?

A good abstract:

- “(1) enables the reader to determine whether or not a paper is of sufficient interest to him to warrant his reading it;
- (2) it enables the teacher and general reader to keep themselves informed on the trend of current biological investigations with a minimum of effort; and
- (3) it enables any reader to peruse the article more intelligently than he could otherwise.”

(Smith, R. C., Jour. Ec. Ent.
31 (5): 564. N 11, 1938.)

USE BIOLOGICAL ABSTRACTS

A non-profit service by biologists for biologists, a modern necessity for every biology department library. Are you primarily a zoologist, botanist, geneticist, bacteriologist? Subscribe personally for your special section and keep up with progress. Complete annual index goes to every section subscriber.

Send your order now!

NEW!

The B&L MODEL A LABORATORY MICROSCOPE

Here is a new Bausch & Lomb Laboratory Microscope designed especially for teaching elementary Botany, Zoology and Biology in high school or college. Its rugged, simple construction makes it an ideal instrument for the hard usage received in classroom service. Here are some of its features:

1. Standard rack and pinion, coarse adjustment and B&L Patent, side fine adjustment.
2. Large stage—alcohol and reagent proof.
3. Iris diaphragm permanently centered for light control and extra size mirror, plane and concave.
4. Revolving, dustproof nosepiece, centered and parfocalized.
5. Takes all standard objectives and eye-pieces.

This instrument is standard in every respect, and students who are trained in its use are well prepared for future work with more advanced models. For complete details, write to Bausch & Lomb Optical Co., 718 St. Paul St., Rochester, N. Y.

JEWELL MODELS FOR BIOLOGY

We are now remodeling in new form certain models in our Pedestal Series so that the cost may be brought within the means of a larger number of schools. The following list should interest all teachers of biology:

1. **CHICK, 33-HOUR SERIAL**—The posterior faces of our J262 Chick model. Upright Plaque Series, with hardwood frame. Eight sections shown, fully colored. Ready for shipment early in March.
2. **CHICK, 48-HOUR SERIAL**—The posterior faces of our J263S Chick model. Also in Upright Plaque form, with hardwood frame and standards. Eleven sections, including one face showing the primitive streak and post-anal gut. Fully colored. Ready for shipment about March 15th.
3. **PIG, 10mm. SERIAL**—The posterior faces of our J291S Pig model in Serial Sections. Fully colored. In the planning stage.
4. **PIG, 10mm. WHOLE MOUNT**—One of the three original whole mounts used in making the J291S serial sections. This will be mounted on a hardwood, polished pedestal. Height of model proper is 16 inches. Valuable for use with the above. Ready for shipment by March 15th.
5. **J565A FEMALE GAMETOPHYTE DEVELOPMENT**—Molds made from the same originals as in our J565 Pedestal Series (See The American Biology Teacher, December 1940). Eleven models on a plaque 15 inches square. In two colors, important parts numbered as on the key card. Ready now. Price only \$19.00.
6. **J565AC**—The same as above, but with all details *fully colored* exactly as in our J565 set which sells for \$48.00. Ready now. Price only \$36.00.
7. **DICOT ROOT CROSS SECTION**—A complete cross section of that which is shown in part in our J550 Dicot Root, Pedestal Series. Diameter over 10 inches. Mounted with nicked rod on a polished, hardwood base. Also made in the CLASSROOM and FULLY COLORED CLASSROOM types. In the planning stage.

FOR FURTHER INFORMATION AND PRICES ON THESE MODELS WRITE TO US AT CARLINVILLE, ILLINOIS. WE WILL WRITE TO YOU GIVING FURTHER DETAILS AS SOON AS THE MODELS ARE READY.

THE AMERICAN BIOLOGY TEACHER

Publication of The National Association of Biology Teachers.

Issued monthly eight times during the school year from October to May.

Publication Office—N. Queen St. and McGovern Ave., Lancaster, Pennsylvania.

Correspondence concerning manuscripts may be addressed to any of the Associate Editors or directly to the Editor-in-Chief. Books and pamphlets for review should be sent to the Editor-in-Chief. Subscriptions, renewals, and notices of change of address should be sent to P. K. Houdek, Secretary-Treasurer, Robinson, Ill. Annual membership, including subscription, \$1.00.

Association Officers

President: George W. Jeffers, State Teachers College, Farmville, Virginia.

President-elect: Homer A. Stephens, Ingalls Junior-Senior High School, Atchison, Kansas.

First Vice President: Miss Helen Trowbridge, Glenbard Township High School, Glen Ellyn, Illinois.

Second Vice President: M. A. Russell, Highland Park High School, Highland Park, Michigan.

Secretary-Treasurer: P. K. Houdek, Township High School, Robinson, Illinois.

Representative on National Science Committee: George W. Jeffers.

PRESERVED ANIMALS AND PLANTS

- **PACKED IN UNIT LOTS FROM FRESHLY COLLECTED MATERIAL.**
- **OFFERED IN A RANGE OF TYPES AND SIZES TO MEET THE REQUIREMENTS OF EVERY BIOLOGY CLASS.**

SINCE a true understanding of the anatomy of plants and animals can be obtained only through individual dissection by the students, these units of preserved organisms fulfill a very definite need in modern biology training. They are packed from freshly collected material during the late summer and fall months and selections are made to include the types of plants and animals most commonly preferred by experienced teachers.

By purchasing these unit lots you save the time and trouble of searching through supply catalogs, comparing sizes, types and prices. You are assured of animal specimens with internal anatomy properly fixed and preserved, of plant types collected at the proper time of year to show the critical organs. Moreover, our

method of packing—in sturdy enameled buckets with rubber-sealed tops—provides dependable preservation without evaporation or corrosion and enables you to hold any excess material from one semester to the next.

Unit lots in any quantity to meet the needs of your class may be selected from the listings in our Biological Supply Catalog No. 47 or our separate literature covering preserved animals and plants. Either will be sent on request if not in your files.

● Because every article listed therein is sure to prove an economical purchase from the standpoint of service and satisfaction our catalogs have enjoyed nation-wide patronage and confidence for over three decades. You too, can rely on them for all science laboratory needs.
