

THE STAFF

In order that readers may know who carries the chief responsibilities in the activities of THE NATIONAL ASSOCIATION OF BIOLOGY TEACHERS and *The American Biology Teacher* it is the policy of the journal to publish twice a year, in the October and February issues, a complete list of all staff members. Lists of chairmen and personnel of committees are published in connection with reports of their activities.

All these individuals are deeply interested in the improvement of both the association and the journal. They welcome suggestions from members and are ready to give assistance to anyone interested in writing items or other articles for the journal.

Association Officers

President: Howard H. Michaud, Purdue University, Lafayette, Indiana.

President-elect: Ruth A. Dodge, Johnstown High School, Johnstown, New York.

First Vice President: Warren L. Bartlett, Brookline High School, Brookline, Massachusetts.

Second Vice President: Melvin A. Hintz, South Milwaukee High School, South Milwaukee, Wisconsin.

Secretary-Treasurer: John Harrold, Midland High School, Midland, Michigan.

Immediate Past President: E. Laurence Palmer, Cornell University, Ithaca, New York.

ELEMENTS OF BIOLOGY

by **Smallwood and Others**

With the Newest Discoveries in Biology, Copyright 1948

ELEMENTS OF BIOLOGY is a brand-new textbook including the newest discoveries in the subject. Simplicity of language and clear-cut diagrams are outstanding features which will be welcomed by all teachers.

New discoveries and investigations in the field of scientific research give ELEMENTS OF BIOLOGY features that are especially interesting.

The book is highlighted by simple descriptions of penicillin, streptomycin, the sulfa drugs, hormones, endocrines, ultraviolet rays, radioactive atoms, and new sources of vitamins. Similarly, recent advances in plant control, crop improvement, and conservation are developed as important phases of everyday biology and typify the practical nature of the book.

ELEMENTS OF BIOLOGY is the most colorful textbook in the subject. Artistic discrimination, rare in textbooks, has been employed in the makeup of the new book.

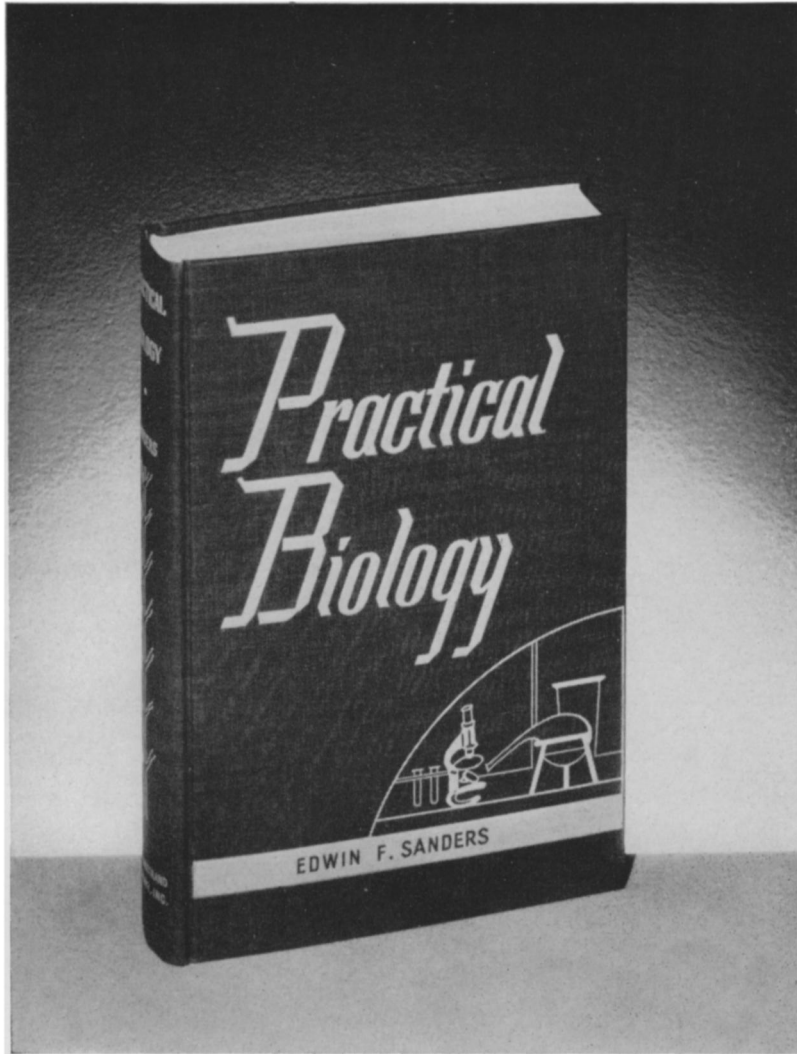

The division of work fits the seasons. There are 80 pages of comprehensive tests. The format is a size which makes it convenient for the pupil to carry the book home for study. The price is \$2.60 from which the usual discount is given to schools.

CAROLINA CULTURES

A Dependable Culture Service

Protozoa	Algae	Invertebrates
Amoeba proteus	Mixed Protozoa	Hydra
Paramecium	Spirogyra	Planaria
multi-micro-nucleatum	Volvox	Vinegar eels
P. caudatum	Chlamydomonas	Daphnia
Euglena	Pandorina	Rotifers
Stentor	Eudorina	Aelosoma
Vorticella	Gonium	Dero
Pelomyxa	Desmids	Nais
Paranema	Oscillatoria	Stylaria
Arcella	Nitella	Copepods
Euplotes	Chara	Ostracods
	Diatoms	Mixed Annelids
	Mixed Algae	

Class of 25—\$2.00; 50—\$3.50; 75—\$4.75; 100—\$6.00

Conjugating Paramecia (*Paramecium bursaria*). Two separate cultures of opposite mating types furnished per unit.

For demonstration \$3.50

For class of 25 students 5.00

Bacteria and Fungi. We carry cultures of more than a hundred species. Per culture .. \$2.00

Five or more cultures, each 1.50

Drosophila Cultures. Any of the commonly used strains can be supplied. Per culture .. \$2.50

Five or more cultures, each 2.00

Living Mealworms, Termites, Frogs, Turtles, Mice, and Rats.

Living Water Plants, Liverworts, Lichens, Mosses, and Ferns.

Aquarium and Terrarium Sets. Medium size \$3.50

Large size 5.00

Sterile Agar Slants, Tubes, and Plates; Preserved Specimens, Microscope Slides, Kodachromes, Dissecting Instruments, etc.

A new and original focus on man

GRUENBERG - BINGHAM

BIOLOGY AND MAN

This up-to-date social biology starts the story of man early in Unit One and keeps man the center of interest in each succeeding unit. Plants and animals are studied in relation to man and at a time when they are needed to fill out the complete picture of life. Develops scientific attitudes and scientific method. Stimulates thinking.
